AYERS PREPARATIONS A dispatch from Greenville, Tenn., says AYERS PREPARATIONS. A VERS SARSAPARILLA, FOR PURIFYING THE BLOOD. The repetation this excellent medicine enjors, is derived from its cures, many of which are itrily instructions. Inversite cases of Scrofulous disease, where the system seemed saturated with corruptien, have been purified and cured by it. Scrofulous affections and disorders, which were aggravated by the scrofulous contam-ination until they were painfully afflicting, have been radically cured in such great num-bers in almost every section of the country that the public scarcely need to be informed of its virtues or uses. Scrofulous poison is one of the most destruc-tive enemies of our race. Often, this unseen and unfeit tenant of the organism undernines, the constitution, and invites the attack of en-feebling or fatal diseases, without exciting a suspicion of its presence. Again, it seems to breed in fection throughout the body, and then, on some favorable occasion, rapidly develop into one or other of its hideous forms, either ou the surface or among the vitals. In the latter, tubercles may be suddenly deposited in the lungs or heart, or tumors formed in the liver, or it shows its presence by cruptions on the slift, or foul ulcerations on some part of the body. Hence the occasion use of a bottle of this Sar-saparilla is advisable, even when no active symptoms of discase appear. Persons atflicted with the following complaints generally find immediate relief, and, at length, cure, by the use of this Sarsaparilla: St. Anthony's Fire, Kose or Erysipelas, Tetter, Salt Rheum, Scali Head, Ringworm, Sore Eyes, Sore Ears, and other eruptions or visible forms of scrofulous dis-case. Also in the nuore concealed forms, as Dys-pensia, Dropsy, Heart Discase, Fift, Epilepsy, Neuralgia, and the various Ulcerons affections of the muscular and nervous systems. It is not probable that there is much, if any, snow to delay or embarrass the work which will be pushed on from both ends with the accelerated activity with which race horses make the last few jumps before reaching the goal. The Congressional Committee, we believe, has settled or are settling the dispute in regard to the point of junction, so that we need fear no delay on that account. Altogether, it is safe to predict that April and not July will first see the trans-continental iron band joined, and the greatest engineering triumph of the century, perhaps of all past time, completed.
