PREPOSTEROUS .- Atlee comes in with a fussy, important air, and wants to know if any of us ever saw anybody write with a hog pen? When he finds us all staring at him, wondering what has become of his wits, he adds: "I asked because I heard a man say, out here, just now, that he could write shoost as well mit a pig pen as mit a lcetle one."

THE body of a new-born white mule infant, was found lodged among a pile of drift-wood at the head of an Island in the Susquehanna river, opposite Safe Harbor recently. The infant was entirely naked with the top of its scull crushed in, and only a portion of its brains remaining, and is supposed to have been murdered and thrown into the river from some point above immediately after its birth.

MOVING WEST.—A number of enter-prising farmers in the vicinity of York, Pa., intend removing to the Western States this spring. The cheap and fertile lands of Illiuois, Missouri, Michigan and Minnesota offer inducements to the young farmers which they cannot resist, and they accordingly pull up stakes and leave the home of their kindred for the "land of the stranger."

THE FASHIONS .- Those New York journalists who give attention to the changes of fashion announce that there will be but a slight, scarcely a preceptible, change in the bonnet this spring. Its size is not to be disturbed, and those ladies who did not use up their last year's bonnets can now have an opportunity to make them useful for another season without in the least doing violence to the laws of fashion

Railroad Company will build a new, handsome, and commodious depot at Columbia, at no late day. True, "there's many a slip 'twixt the cup and the lip," but the prospects appear to be good.

NEW PATENT .- Julius Boden of Columbia, Pa., has received letters patent for a new and useful improved Automatic Boiler Feeder, dated March 23, 1869. This invention consists in making the expansive property of metals available in opening a valve to admit water to a boiler when it sinks to a certain level, and shut off again after sufficient water has been admitted. operating with certainty and efficiency, governed by the amount of water within the boiler, without the attention of the engineer .- Express.

PIANO FOR THE WHITE HOUSE.—The grand piano for the White House, made by Schomacker & Co., of Philadelphia, has been assigned to its proper position in the crimson room, at Washington. Harry W. Gray, Esq., a member of the above firm and formerly of Columbia, has the honor of accomplishing this object. The pianos made by this firm have a world-wide reputation, and the one now in the White House is a model of beauty and workmanship, As it is the custom on the election of a President to refurnish the White House entirely, there is always a great competition between the piano makers of the various cities, not so much on account of the immediate pro- affirmative; and Messrs. A GOOD PLAN .-- A short time since, at a wedding in South Carolina, a young lawyer moved that one man in the company should be selected as President; that this President should be duly sworn to keep entirely secret all the communication that should be for: warded to him in his official department that night; that each unmarried gentleman and lady whould write his or her name on a piece of paper, and under it place the name of the person they wished to marry, then hand it to the President for inspection, and if any lady and gentleman had reciprocally chosen each other, the President was to inform each of the result, and those who had not been reciprocal in their choice were to be kept entirely secret. After the appointment of the President, communications were ac-cordingly handed up to the chair, and it was found that twelve young ladies and gentlemen had reciprocal choices, and eleven of the twelve matches were solemn-

THE RIVER .- The water in the Susquebanna river, at this place, was rising at the rate of over an inch per hour this morning. At seven o'clock, the water was fifteen feet above low water mark, and at ten o'clock, fifteen feet and seven inches. The Boom is working admirably; no danger being apprehended of its breaking. It s supposed that before the week expires, the Boom will contain over two hundred and fifty million feet of logs. One drive, which will reach here to-day or to-morrow, contains over half of the above amount .-Williamsport Daily Standard, of Tuesday evening.

BOATING ACCIDENT - TWO MEN DROWNED .- A dispatch received at this place, states that seven men went out on Swatara Creek, at Middletown, on Tuesday afternoon, to take a sail. When out some distance, the boat sprung a leak and commenced to fill with water, when a man named Zimmerman jumped out and attempted to swim ashore, but the water being too high and current very strong, he was drowned. When Zimmerman jumped out the boat capsized, and B. C. Fralich formerly a clerk in the dry goods establishment of H. C. Fondersmith, this place, who could not swim, went under and also drowned. The other five men held on to the boat until assistance arrived. Both bodies were recovered.

" Moya" Ball.—The annual Easter oall of the Moyamensing Hose Company, of Philadelphia, came off on Monday evening, at the Academy of Music, and was one of the nost successful of the season. Quite a number of ladies and gentleman from this place were in attendance. One of the features of the entertainment was the presentation to Billy McMullen of three beautiful articleshandsome diamond breastpin, valued at \$2,500; an eighteen karat gold snuff box, valued at \$1,500; the third token consisted of a large frame of gold and red velvet, on which resolutions expressive of the feelings entertained for him by the company are inscribed on a sheet of card board thirty inches long. At the head of the resolution is a perfect crayon picture of the alderman ter inches wide by fourteen inches long.

CLEAN UP .- The names of those com posing the standing committees appointed by our borough Council, were published in these columns a few numbers back. Mr. Hippy is chairman of the street committee. He is an energetic practical man, and we have every resson to believe that he will set to work immediately to rid the borough of a portion of the mud and filth accumulated during the winter, and now acting as an embargo upon the traveling public, ere warm weather is upon us. Walnut street between Third and Fourth, is in a miserable condition; as are other streets which have been semi-annually treated to a layer of dirt, generally taken from somebody's cellar as a convenient way of getting rid of ferent plans already proposed, and moved it at the expense of the tax-payers of the orough.

YE VELOCIPEDE.—Prof. Almy has had in operation a Velocipede School in Odd THE NEW DEPOT.—We have pretty reliable information that the Pennsylvania which time a number of our citizens have tried to ride the two wheeled machine. The hall has been crowded nightly with ladies and gentlemen. Some of the attempts to ride the "animal" were ludicrous in the extreme. Light was too heavy, or his feet too big-don't know which; Kauffman lacked confidence in himself; while Clark rode with grace; and Case used skill and strength; Block seemed too loose to balance himself and Breneman had perseverance, notwithstanding the number of times he rolled over the floor; Eberlein, Case and Clark may be set down as very expert riders. while Young, Erwin, Allison and others would soon become proficient "equestrians." Altogether the thing afforded healthful exercise and innocent amusement for all classes.

> Advertise.—Every business man who wants to increase his trade should advertise. Advertising brings the merchant's goods to the constant notice of the customer. Advertising enables the business man of small capital to turn his stock quickly and often. Advertising enables the rich merchant to do business on less capital. Advertising builds up trade rapidly, establishes a permanent trade, and keeps an old trade active. Advertising makes fortunes for men in business who otherwise would fail in their undertakings. Advertising should be constant and judicious. Advertising in a newspaper pays as a rule,in proportion to the number of readers it reaches Advertise in the SPY; it reaches the most intelligent and prosperous families in this and adjoining counties. It is read by at least ten thousand people weekly. Advertising makes up for the disadvantages of a poorly located business stand. The one has he customers constantly at the door, whilst advertising draws customers right to the place.

As the request did not include statement of the object of the meeting, he alled upon Mr. Craig to state it. Mr. Craig then informed the Council that hey had been called together for the par pose of deciding upon a difference of opinion which existed between himselfand the bal ince of the Building Committee as to how

the stalls in the new Market House should be completed. He was opposed to the plan as adopted, and so were the persons who expected to occupy the stalls. In support of the latter statement, he presented the following petition, signed by over one hundred of the stall renters: To the Council of the Borough of Columbia :

To the Council of the Borough of Columbia:

The undersigned, renters of stalls in the Columbia Market, understanding that it is the present intention of the Market Committee to place the tables under the upryles, so the petitioners will have their backs to their customers, in the new Market House, respectfully ask that the Market Committee place the tables so that your petitioners stand on the opposite side of table from the customers, facing them, it requiring no more room, and no greater expense. On Saturday last, the 27th ult., the three men were arrested by Officer Krauss and taken before the Mayor where they had a hearing on the charge of cruelty to an animal, the charge being preferred under the law recently enacted by the State Legislature, which provides for the arrest and punishment of those who treat ananimal with cruelty. The Malaria of Spring.—Everybody should now be on their guard against the great danger of disease arising from malarious causes. Fever and Ague prevails to an alarming extent every Spring in nearly all parts of the country, and many persons are easily predisposed to it on account of some imprudence during the winter months. Indeed, very much of the sickness we notice in the Spring of the year may be traced to causes which were engondered in the "cold term." But whether the cause lies hidden in the system or not, it is certain that disease will develop itself at the first opportunity, hence no one should hesitate for a moment to set about combat, ting and overthrowing it. To accomplish this purpose nothing is so useful and reliable as Mishlers Herb Bitters. It is a positive antidote for any malarious or impoisoned atmosphere and a certain protection against every morbid influence which produces disease. We say in all candor to our readers that they should give heed to our advice on this subject. THE MALARIA OF SPRING .- Every-

Mr. Stauffer referred to the geological formation of Lancaster county. The Mesozoic red sand-stone, that spreads North and South of the boundary between the counties of Lancaster, Pauphin and Lebanon, is a portion of the Palisade range. It extends from Rockland, on the Hudson river, southward through New Jersey, Pennsylvania and Virginia, east of the Blue Ridge, in a continuous line of about three hundred and fifty miles in length. It crosses the Delaware, between Trenton and Kintnerville, the Schuylkill about twelve miles below Reading and the Susquehanna river between Highspire, in Dauphin county, and Bainbridge in Lancaster county, inclining southward in York county to Virginia. This red shale extends over the larger portion of the northern tier of townships, usually termed gravel land. The soil is mostly red and variable in fertility. He called attention to the Gneiss formation in the southern portion of the county and also to the limestone valley.—Express.
