ren's term.

We regret to say there will be no pub lic celebration of Independence Day in Columbia. Our citizens are proverbial for their philanthrophy and patriotism, and why they let the day go by without some public demonstration, we are unable to tell. To-morrow (Sunday), will be the ninety-third anniversary of the birth of American Independence-of the day when our forefathers, scorning to be slaves, stood up in the greatness of determined patriotism, and vowed that revolution should bear up the bouds of the free, triumphant over the subverted altar of oppression. By the assistance of an overruling Providence, the bonds of despotism were rent assunder, and the inalienable rights of men firmly established upon the everlasting rock of ages, over which the "Star Spangled Banner" triumphantly waves in proud defiance of all its enemies. And to-day, from the stormy Atlantic to the calm blue waters of the Pacific, from Southern plains, from Northern hills, from fertile vales and woodland wilds, there ascendeth up to Heaven the loud and joyous shout from thirty-five millions of the human race, echoing and re-echoing the sacred name of Liberty. When we reflect upon what has been, and what is, how is it possible not to feel a profound sense of the responsibility of this great republic to all future ages. What vast motives press upon us for lofty effort; what brilliant prospects invite our enthusiasm !

There is reveled, to-us in the unsealed books of history, the beginning and end of all that is marvelous in the struggle for the cause of Liberty, and naught visible of the past now remains save ruined temples, palaces, and broken columns, venerable in the majesty of decay. We stand the latest, and if we fall, probably the last example of self-government by the people. Such as we are, we have been from the beginning, simple, hardy, intelligent, accustomed to self-government and self-respect. Our government is mild, the press free, religion free, and knowledge reaches, or may reach, every individual, occupying, as our country now does, commanding ground, it should inspire the soul with strong desires to elevate the intellectual standard of man, and to imbue him with a due sense of his responsibility in the world. The position of this nation is the most exalted on the globe; she stands forth a beacon light to the downtrodden an d oppressed, and it is our duty as citizens to a ct in strict accordance with such a high prerogative. The world is gazing at us with intense anxiety and expectation-some to see us rise still higher on Eagle wings-others to watch our downfall, and the flight of Liberty screeching from the earth.

As our country bears in her bosom a greater power than was ever wielded by a thousand Caesars, if we do not prove treacherous to our proud position, she must continue to rise and ascend, and very pulsation of this ocean of stron

The great want of this age is menmeu who are not for sale; men who are honest, sound from center to circumference. true to the heart's core. Men who will condemn wrong in friend or foe, in themselves as well as others. Men whose consciences are as steady as the needle to the pole. Diseases incident to the climate and the season are already raging in Cuba, and the camps of both sides suffer. Cholera, dysentery and the vomito may not subdue the resolve of the Cubans to be free, but no resolve of less moral grandeur than this can withstand such forces, and we suspect they will subdue the desire of the Spaniards for power and dominion. Soon in Cuba the war will subside to such a state of suspended animation as we observe in the war of Spain with the South American Republics.

The great reason why physicians do not eure con-sumption is, they try to do too much : they give medicine to stop the cough, to stop chills, to stop might sweats, heetic fever, and by so doing they de-range the whole digestive powers, locking up the se-cretions, and eventually the patient sinks and dies.
