COLUMBIA, CLASSICAL –AND– TEMALE INSTITUTE ENTERS upon its seventh scholastic year on Ethe 20th of August. Its growth has been rapid and permanent, while past success and results, in view of its present prosperous condi- tion, promise enlarged usefulness for the future. Afready many of its students have entered the best Colleges, or are found in the various profes- sions and callings in lite. This Institution not only afficies opportunities to young then equal to the best Academices, but Young Ladles also enloy SPERIOR ADUCATIONAL ADVANTAGEs—a thorough and extended sourse in both SOLID AND ORNAMENTAL BRANCHES. Special attention given to the MITHAL SCIENCES, FIELDEL, GERMAN AND VOCAL & IN STAUMENTAL MUSIC, Including thorough Bass and Harmony. The pupils of this Behood will enjoy the advan special difference of experienced	passed, giving a piercing look into the carriage. I followed it, and I fancied I saw the yonng girl's hand quivering among the lilies in her lap. "You know Walter is with us, Lewis?" remarked Margaret, a little cloud on her face. "Yes, he is looking well." "He always looks well," said Mag, sig- nificantly. We were entering the avenue. Two splendid rose trees guarded the gate. The rustic trellises held an arch of blos- soming vines above their heads. I ques- tioned Mag as to the garden. "My gardeners say that they have been very successful this year. I think I appre- ciate the roses more than usual this year, for Alice enjoys them so much." My sister turned as she spoke, with a fond smile for the girl at her side, and then remembered to say, "Alice this is my brother Lewis. Mr. Vener, Miss Lee." So those golden brown eyes came up to mine again, and my look of admiration was rewarded with a smile, so sweet that I then and there fell in love with its owner. We drove through clouds of perfume to	the shutters, when I distinctly perceived the pungent odor of chloroform. Now if I had been in the body of the house, I should have decided that some unfortunate person among its inmates had experienced a midnight at- tack of toothache, but there were no chambers in the south wing but Alice Lee's and mine. Every pearly tooth in her rosy mouth was perfectly sound, I knew—so I was puzzled. The next reve- lation was the propinquity of a horse's neigh. The horses belonging to the house were or ought to have been at a distance from the house in a well-locked stable. This horse—nay, two of them, and an elegant phaeton, I could see at the front gate. At first I did not recognize the equipage. But I was impressed to believe there was some- thing wrong. A lark of Sutton's set, I described it to be, when I at length recog- nized the carriage. I dressed and set down at the window, watching the horses tossing their heads under the larches, their silver trapings glittering in the moon- light. Suddenly Sutton went walking rapidly down the walk bearing something in his arms, wrapped in a cloak. It might have	these points gives rise to various disor- ders of the system, especially colds, coughs and the like. The fluid which is sweated out of the body comes from the blood-vessels in the deeper part of the skin. A word more about the work of the little fatty glands, and this subject may be left- These little structures give exit to fatty matter, that by inducing a slightly greasy state of skin, prevents too great evapora- tion; it acts as a protection to the skin against irritants and it also earries off certain fatty acids from the body. In an irritative skin these glands get choked up by the retained fatty matter, and we then have pimples, as about the face,— <i>Cassell's Household Guide</i> , A CORRESPONDENT of the Cologne <i>Ga- zetta</i> describes how the soldiers have rc- venged themselves on the French peas- ants for certain alleged acts of cruelty performed by the latter on the German wounded : "An old woman," he says, "picked out the eyes of a wounded Ger- man captain while he was still alive,— Some Prussian huzzars entered the house informed by after seeing what had hap- pened, dragged the old woman, who was guite sementy wears old into the german	sister, to provide for and to superintend the education of the rest. Feeling his respon- sibilities as a son, and a brother, he deter- mined on learning the manufacturing of watch-work, with the idea, at some future day, of controlling his destines of a watch manufactory. After perfecting his mechan- ical studies and starting business in this eity, he made a trip to Europe, and there laid the foundation for the furtheranee of his early-laid plans. There are few men possessing the capabilities of Mr. F. A. Giles as a business man; he wields the vast interests and details of this establishment with perfect ease, and being practical in every department, he watches closely and jealously guards the utmost minutize of the business, so that at all times the public can feel safe, and the firm more than proud of the estimation so justly placed by the world at large on the watches manufactured by them. W. A. Wales, Esq., is one of those gen- tlemen who, once met, is not easily forgot- ten. Having experienced all the disadyan- tages possible in his early efforts to rise, he is always ready to cheer and encourage the young man striving to win himself position Active of limb and vigorous of intellect, he has exerted both mind and body to the fur- therance of any and every plan suggested for the good and interest of the business, and, in so doing, has rendered the associa-	of great delicacy, giving, as they do with their porfect angles, impulse through the fork to the vibrations of the balance. When we consider that it takes fully one hundred thousand of these to weigh one pound, or more than eight thousand to a single ounce, we are indeed at fault whether to admire the perfection of the work or applaud the genius who conceived the manner in which it is done. Now if I had been in the body of the house, I should have decided that some unfortunate person among its inmates had experienced a midnight at- tack of toothache, but there were no chambers in the south wing but Alice Lee's and mine. Every pearly tooth in her rosy mouth was perfectly sound, I knew—so I was puzzled. The next reve- lation was the propinquity of a horse's neigh. The horses belonging to the house were or ought to have been at a distance from the house in a well-locked stable. This horse—nay, two of them, and an elegant phaton, I could see at the front gate. At first I did not recognize the equipage. But I was impressed to believe there was some- thing wrong. A lark of Sutton's set, I described it to be, when I at length recog- nized the carriage. I dressed and set down at the window, watching the horses tossing their heads under the larches, their silver trapings glittering in the moon- light. Suddenly Sutton went walking rapidly down the walk bearing something in his arms, wrapped in a cloak. It might have been the figure of a corpse for any life or motion it appeared to have. He sprung into the carriage, placed himself so as to	these points gives rise to various disor- ders of the system, especially colds, coughs and the like. The fluid which is sweated out of the body comes from the blood-vessels in the deeper part of the skin. A word more about the work of the little fatty glands, and this subject may be left- These little structures give exit to fatty matter, that by inducing a slightly greasy state of skin, prevents too great evapora- tion; it acts as a protection to the skin against irritants and it also carries off certain fatty acids from the body. In an irritative skin these glands get choked up by the retained fatty matter, and we then have pimples, as about the face.— Cassell's Household Guide, A CORRESPONDENT of the Cologne Ga- zetta describes how the soldiers have rc- venged themselves on the French peas- ants for certain alleged acts of cruelty performed by the latter on the German wounded : "An old woman," he says, "picked out the eyes of a wounded Ger- man captain while he was still alive.— Some Prussian huzzars entered the house immediately after seeing what had hap- pened, dragged the old woman, who was quite seventy years old, into the garden and there literally tramped her to death with their boots and spurs, after which they buried her then can there which	sister, to provide for and to superintend the education of the rest. Feeling his respon- sibilities as a son, and a brother, he deter- mined on learning the manufacturing of watch-work, with the idea, at some future day, of controlling his destinies of a watch manufactory. After perfecting his mechan- ical studies and starting business in this eity, he made a trip to Europe, and there laid the foundation for the furtheranee of his early-laid plans. There are few men possessing the capabilities of Mr. F. A. Giles as a business man; he wields the vast interests and details of this establishment with perfect ease, and being practical in every department, he watches closely and jealously guards the utmost minutize of the business, so that at all times the public can feel safe, and the firm more than proud of the estimation so justly placed by the world at large on the watches manufactured by them. W. A. Wales, Esq., is one of those gen- tlemen who, once met, is not easily forgot- ten. Having experienced all the disadyan- tages possible in his early efforts to rise, he is always ready to cheer and encourage the young man striving to win himself position Active of limb and vigorous of intellect, he has exerted both mind and body to the fur- therance of any and every plan suggested for the good and interest of the business, and, in so doing, has rendered the associa- tion one of pleasure as well as profit to all concerned. In G. C. F. Wright, Esq., the junior mem-	of great delicacy, giving, as they do with their porfect angles, impulse through the fork to the vibrations of the balance. When we consider that it takes fully one hundred thousand of these to weigh one pound, or more than eight thousand to a single ounce, we are indeed at fault whether to admire the perfection of the work or applaud the genius who conceived the manner in which it is done. Impossible as this statement may seem to the uninitiated, there are still greater wonders performed. Steel screws, perfect in every particular—head, slot and thread—yet so small that it takes more than five hundred thousand of them to weigh a pound, or more than forty thousand to a single ounce! and to be seen to advantage the eye must be aided by a magaifying glass of some power. The facility with which the precious stones are cut up and worked is astonish- ing, when we consider their extreme hard- ness and brittle nature ; but ingenuity has again displayed itself and been brought to bear especially upon this point, and every obstacle overcome, so that the hardest stone is worked with comparative easo. Among the stones used for jeweling purposes are the ruby, apphire, Spanish topaz, garnet, chrysolite, and aqua-mairne, the more val- uable of which are used in the higher grade of watch. The process of working these gems is one requiring great care, and they undergo many operations before they are brought to an acceptable condition. To make the roller jewels, working in the slot

I went to the spot myself, and heard the story confirmed by an official of the post office, who had refused to believe it, but found	sister, to provide for and to superintend the education of the rest. Feeling his respon- sibilities as a son, and a brother, he deter- mined on learning the manufacturing of watch-work, with the idea, at some future day, of controlling his destinies of a watch manufactory. After perfecting his mechan- ical studies and starting business in this city, he made a trip to Europe, and there haid the foundation for the furtheranee of his early-laid plans. There are few men possessing the capabilities of Mr. F. A. Giles as a business man; he wields the vast interests and details of this establishment with perfect ease, and being practical in every department, he watches closely and feel safe, and the firm more than proud of the estimation so justly placed by the world at large on the watches manufactured by them. W. A. Wales, Esq., is one of those gen- tlemen who, once met, is not easily forgot- ten. Having experienced all the disadyan- tages possible in his early efforts to rise, he is always ready to cheer and encourage the young man striving to win himself position Active of himb and vigorous of intellect, he has exerted both mind and body to the fur- therance of any and every plan suggested for the good and interest of the business, and, in so doing, has rendered the associa- tion one of pleasure as well as profit to all concerned. In G. C. F. Wright, Esq., the junior mem- ber of the tirm, we find all the elements of the true business man. Bold and determin- ed in the prosecution of trade, gonial, gone	of great delicacy, giving, as they do with their porfect angles, impulse through the fork to the vibrations of the balance. When we consider that it takes fully one hundred thousand of these to weigh one pound, or more than eight thousand to a singleounce, we are indeed at fault whether to admire the perfection of the work or applaud the genius who conceived the manner in which it is done. Impossible as this statement may seem to the uninitiated, there are still greater wonders performed. Steel screws, perfect in every particular—bead, slot and thread—yet so small that it takes more than five hundred thousand of them to weigh a pound, or more than forty thousand to a single ounce ! and to be seen to advantage the eye must be aided by a magaifying glass of some power. The facility with which the precious stones are cut up and worked is astonish- ing, when we consider their extreme hard- ness and brittle nature ; but ingenuity has again displayed itself and been brought to bear especially upon this point, and every obstacle overcome, so that the hardest stone is worked with comparative easo. Among the stones used for jeweling purposes are the ruby, sapphire, Spanish topaz, garnet, chrysolite, and aqua-mairne, the more val- uable of which are used in the higher grade of watch. The process of working these gems is one requiring great care, and they undergo many operations before they are brought to an acceptable condition. To make the roller jewels, working in the slot of the fork, the rough stone is first sawn into slys, after which it is sawn into squares; they are then taken to the lathe

Attainments, and not age, is the standard of admittance. Bos from town or yielding are admitted as</td><td>passed, giving a piercing look into the carriage. I followed it, and I fancied I saw the yonng girl's hand quivering among the lilies in her lap. "You know Walter is with us, Lewis?" remarked Margaret, a little cloud on her face. "Yes, he is looking well." "He always looks well," said Mag, sig- nificantly. We were entering the avenue. Two splendid rose trees guarded the gate. The rustic trellises held an arch of blos- soming vines above their heads. I ques- tioned Mag as to the garden. "My gardeners say that they have been very successful this year. I think I appre- ciate the roses more than usual this year, for Alice enjoys them so much." My sister turned as she spoke, with a fond smile for the girl at her side, and then remembered to say, "Alice this is my brother Lewis. Mr. Vener, Miss Lee." So those golden brown eyes came up to mine again, and my look of admiration was rewarded with a smile, so sweet that I then and there fell in love with its owner. We drove through clouds of perfume to the door. There were ladies and gentle- men upon the broad terrace. "I have other guests," said Margaret aside. I had met some of them before—all nice people. The summer promises to be gay. I knew that I was very happy that even-</td><td>the shutters, when I distinctly perceived the pungent odor of chloroform. Now if I had been in the body of the house, I should have decided that some unfortunate person among its inmates had experienced a midnight at- tack of toothache, but there were no chambers in the south wing but Alice Lee's and mine. Every pearly tooth in her rosy mouth was perfectly sound, I knew—so I was puzzled. The next reve- lation was the propinquity of a horse's neigh. The horses belonging to the house were or ought to have been at a distance from the house in a well-locked stable. This horse—nay, two of them, and an elegant phaton, I could see at the front gate. At first I did not recognize the equipage. But I was impressed to believe there was some- thing wrong. A lark of Sutton's set, I described it to be, when I at length recog- nized the carriage. I dressed and set down at the window, watching the horses tossing their heads under the larches, their silver trapings glittering in the moon- light. Suddenly Sutton went walking rapidly down the walk bearing something in his arms, wrapped in a cloak. It might have been the figure of a corpse for any life or motion it appeared to have. He sprung into the carriage, placed himself so as to support his burden, gathered up the reins and whirled rapidly away. The instant he was gone, a horrible sus- picion broke over me. I spang up and</td><td>these points gives rise to various disor- ders of the system, especially colds, coughs and the like. The fluid which is sweated out of the body comes from the blood-vessels in the deeper part of the skin. A word more about the work of the little fatty glands, and this subject may be left- These little structures give exit to fatty matter, that by inducing a slightly greasy state of skin, prevents too great evapora- tion; it acts as a protection to the skin against irritants and it also carries off certain fatty acids from the body. In an irritative skin these glands get choked up by the retained fatty matter, and we then have pimples, as about the face.— Cascell's Household Guide, A CORRESPONDENT of the Cologne Ga- zetta describes how the soldiers have rc- venged themselves on the French peas- ants for certain alleged acts of cruelty performed by the latter on the German wounded : "An old woman," he says, "picked out the eyes of a wounded Ger- man captain while he was still alive.— Some Prussian huzzars entered the house immediately after seeing what had hap- pened, dragged the old woman, who was quite seventy years old, into the garden and there literally tramped her to death with their boots and spurs, after which they buried her then and there. I went to the spot myself, and heard the story confirmed by an official of the post office, who had refused to believe it, but found it was true on digging up the mutilated</td><td>sister, to provide for and to superintend the education of the rest. Bos from town or vicinity are adminited as Boarders from MONDAY TO Future Inclusive, at</td> <td>passed, giving a piercing look into the carriage. I followed it, and I fancied I saw the yonng girl's hand quivering among the lilies in her hap. "You know Walter is with us, Lewis?" remarked Margaret, a little cloud on her face. "Yes, he is looking well." "He always looks well," said Mag, sig- nificantly. We were entering the avenue. Two splendid rose trees guarded the gate. The rustic trellises held an arch of blos- soming vines above their heads. I ques- tioned Mag as to the garden. "My gardeners say that they have been very successful this year. I think I appre- ciate the roses more than usual this year, for Alice enjoys them so much." My sister turned as she spoke, with a fond smile for the girl at her side, and then remembered to say, "Alice this is my brother Lewis. Mr. Vener, Miss Lee." So those golden brown eyes came up to mine again, and my look of admiration was rewarded with a smile, so sweet that I then and there fell in love with its owner. We drove through clouds of perfume to the door. There were ladies and gentle- men upon the broad terrace. "I have other guests," said Margaret aside. I had met some of them before—all nice people. The summer promises to be gay. I knew that I was very happy that even- ing singing with Alice Lee. But there was an evil influence in the house. I</td> <td>the shutters, when I distinctly perceived the pungent odor of chloroform. Now if I had been in the body of the house, I should have decided that some unfortunate person among its inmates had experienced a midnight at- tack of toothache, but there were no chambers in the south wing but Alice Lee's and mine. Every pearly tooth in her rosy mouth was perfectly sound, I knew—so I was puzzled. The next reve- lation was the propinquity of a horse's neigh. The horses belonging to the house were or ought to have been at a distance from the house in a well-locked stable. This horse—nay, two of them, and an elegant phæton, I could see at the front gate. At first I did not recognize the equipage. But I wasimpressed to believe there was some- thing wrong. A lark of Sutton's set, I described it to be, when I at length recog- nized the carriage. I dressed and set down at the window, watching the horses tossing their heads under the larches, their silver trapings glittering in the moon- light. Suddenly Sutton went walking rapidly down the walk bearing something in his arms, wrapped in a cloak. It might have been the figure of a corpse for any life or motion it appeared to have. He sprung into the carriage, placed himself so as to support his burden, gathered up the reins and whirled rapidly away. The instant he was gone, a horrible sus- picion broke over me. I spang up and rushed down stairs. The chamber in which Alice slept was full of the scent of</td> <td>these points gives rise to various disor- ders of the system, especially colds, coughs and the like. The fluid which is sweated out of the body comes from the blood-vessels in the deeper part of the skin. A word more about the work of the little fatty glands, and this subject may be left- These little structures give exit to fatty matter, that by inducing a slightly greasy state of skin, prevents too great evapora- tion; it acts as a protection to the skin against irritants and it also carries off certain fatty acids from the body. In an irritative skin these glands get choked up by the retained fatty matter, and we then have pimples, as about the face.— <i>Cassell's Household Guide</i>, A CORRESPONDENT of the Cologne <i>Ga- zetta</i> describes how the soldiers have rc- venged themselves on the French peas- ants for certain alleged acts of cruelty performed by the latter on the German wounded : "An old woman," he says, "picked out the eyes of a wounded Ger- man captain while he was still alive.— Some Prussian huzzars entered the house immediately after seeing what had hap- pened, dragged the old woman, who was quite seventy years old, into the garden and there literally tramped her to death with their boots and spurs, after which they buried her then and there. I went to the spot myself, and heard the story confirmed by an official of the post office, who had refused to believe it, but found it was true on digging up the mutilated corpse. Another woman, who was caught cutting off a dying man's finger in order</td> <td>sister, to provide for and to superintend the education of the rest. Feeling his respon- sibilities as a son, and a brother, he deter- mined on learning the manufacturing of watch-work, with the idea, at some future day, of controlling his destinies of a watch manufactory. After perfecting his mechan- ical studies and starting business in this city, he made a trip to Europe, and there laid the foundation for the furtheranee of his early-laid plans. There are few men possessing the capabilities of Mr. F. A. Giles as a business man; he wields the vast interests and details of this establishment with perfect ease, and being practical in every department, he watches closely and feel safe, and the firm more than proud of the estimation so justly placed by the world at large on the watches manufactured by them. W. A. Wales, Esq., is one of those gen- tlemen who, once met, is not easily forgot- ten. Having experienced all the disadyan- tages possible in his early efforts to rise, he is always ready to cheer and encourage the young man striving to win himself position Active of limb and vigorous of intellect, he has exerted both mind and body to the fur- therance of any and every plan suggested for the good and interest of the business, and, in so doing, has rendered the associa- tion one of pleasures as well as profit to all concerned. In G. C. F. Wright, Esq., the junior mem- ber of the irm, we find all the elements of the true business man. I went to the spot myself, and heard the story confirmed by an official of the post office, who had refused to believe it, but found it was true on digging up the mutilated corpse. Another woman, who was caught cutting off a dying man's finger in order to take his ring, was tied to a cart and	sister, to provide for and to superintend the education of the rest. Feeling his respon- sibilities as a son, and a brother, he deter- mined on learning the manufacturing of watch-work, with the idea, at some future day, of controlling his destinies of a watch manufactory. After perfecting his mechan- ical studies and starting business in this city, he made a trip to Europe, and there laid the foundation for the furtheranee of his early-laid plans. There are few men possessing the capabilities of Mr. F. A. Giles as a business man; he wields the vast interests and details of this establishment with perfect ease, and being practical in every department, he watches closely and feel safe, and the firm more than proud of the estimation so justly placed by the world at large on the watches manufactured by them. W. A. Wales, Esq., is one of those gen- tlemen who, once met, is not easily forgot- ten. Having experienced all the disadyan- tages possible in his early efforts to rise, he is always ready to cheer and encourage the young man striving to win himself position Active of limb and vigorous of intellect, he has exerted both mind and body to the fur- therance of any and every plan suggested for the good and interest of the business, and, in so doing, has rendered the associa- tion one of pleasures as well as profit to all concerned. In G. C. F. Wright, Esq., the junior mem- ber of the irm, we find all the elements of the true business man. Bold and determin- ed in the prosecution of trade, gonial, gone- rous, and decided in character, he has won himself a host of friends, both in active and private life. Those coming under his im- mediate control are always subjects of his	of great delicacy, giving, as they do with their porfect angles, impulse through the fork to the vibrations of the balance. When we consider that it takes fully one hundred thousand of these to weigh one pound, or more than eight thousand to a singleonnce, we are indeed at fault whether to admire the perfection of the work or applaud the genius who conceived the manner in which it is done. Impossible as this statement may seem to the uninitiated, there are still greater wonders performed. Steel screws, perfect in every particular—bead, slot and thread—yet so small that it takes more than five hundred thousand of them to weigh a pound, or more than forty thousand to a single ounce ! and to be seen to advantage the eye must be aided by a magaifying glass of some power. The facility with which the precious stones are cut up and worked is astonish- ing, when we consider their extreme hard- ness and brittle nature ; but ingenuity has again displayed itself and been brought to bear especially upon this point, and every obstacle overcome, so that the hardest stone is worked with comparative easo. Among the stones used for jeweling purposes are the ruby, sapphire, Spanish topaz, garnet, chrysolite, and aqua-mairne, the more val- uable of which are used in the higher grade of watch. The process of working these gems is one requiring great care, and they undergo many operations before they are brought to an acceptable condition. To make the roller jewels, working in the slot of the fork, the rough stone is first sawn into slys, after which it is sawn into squares ; they are then taken to the lathe and turned with diamond-pointed tools, then polished by means of diamond pow- der, and when completed the subject of all this labor is but one-sizteenth of an inch

Attainments, and not age, is the standard of admittance. Boys from town or vicinity are admitted as produced rates. For Circulars c further particulars, address	passed, giving a piercing look into the carriage. I followed it, and I fancied I saw the yonng girl's hand quivering among the lilies in her hap. "You know Walter is with us, Lewis?" "emarked Margaret, a little cloud on her face. "Yes, he is looking well." "He always looks well," said Mag, sig- nificantly. We were entering the avenue. Two splendid rose trees guarded the gate. The rustic trellises held an arch of blos- soming vines above their heads. I ques- tioned Mag as to the garden. "My gardeners say that they have been very successful this year. I think I appre- ciate the roses more than usual this year, for Alice enjoys them so much." My sister turned as she spoke, with a fond smile for the girl at her side, and then remembered to say, "Alice this is my brother Lewis. Mr. Vener, Miss Lee." So those golden brown eyes came up to mine again, and my look of admiration was rewarded with a smile, so sweet that I then and there fell in love with its owner. We drove through clouds of perfume to the door. There were ladies and gentle- men upon the broad terrace. "I have other guests," said Margaret aside. I had met some of them before—all nice people. The summer promises to be gay. I knew that I was very happy that even- ing singing with Alice Lee. But there was an evil influence in the house. I soon felt it, Sutton's wealth and extrav-	the shutters, when I distinctly perceived the pungent odor of chloroform. Now if I had been in the body of the house, I should have decided that some unfortunate person among its inmates had experienced a midnight at- tack of toothache, but there were no chambers in the south wing but Alice Lee's and mine. Every pearly tooth in her rosy mouth was perfectly sound, I knew—so I was puzzled. The next reve- lation was the propinquity of a horse's neigh. The horses belonging to the house were or ought to have been at a distance from the house in a well-locked stable. This horse—nay, two of them, and an elegant phaeton, I could see at the front gate. At first I di not recognize the equipage. But I was impressed to believe there was some- thing wrong. A lark of Sutton's set, I described it to be, when I at length recog- nized the carriage. I dressed and set down at the window, watching the horses tossing their heads under the larches, their silver trapings glittering in the moon- light. Suddenly Sutton went walking rapidly down the walk bearing something in his arms, wrapped in a cloak. It might have been the figure of a corpse for any life or motion it appeared to have. He sprung into the carriage, placed himself so as to sapport his burden, gathered up the reins and whirled rapidly away. The instant he was gone, a horrible sus- picion broke over me. I spang up and rushed down stairs. The chamber in	these points gives rise to various disor- ders of the system, especially colds, coughs and the like. The fluid which is sweated out of the body comes from the blood-vessels in the deeper part of the skin. A word more about the work of the little fatty glands, and this subject may be left- These little structures give exit to fatty matter, that by inducing a slightly greasy state of skin, prevents too great evapora- tion; it acts as a protection to the skin against irritants and it also carries off certain fatty acids from the body. In an irritative skin these glands get choked up by the retained fatty matter, and we then have pimples, as about the face.— <i>Cassell's Household Guide</i> , A CORRESPONDENT of the Cologne <i>Ga- zetta</i> describes how the soldiers have rc- venged themselves on the French peas- ants for certain alleged acts of cruelty performed by the latter on the German wounded : "An old woman," he says, "picked out the eyes of a wounded Ger- man captain while he was still alive.— Some Prussian huzzars entered the house immediately after seeing what had hap- pened, dragged the old woman, who was quite seventy years old, into the garden and there literally tramped her to death with their boots and spurs, after which they buried her then and there. I went to the spot myself, and heard the story confirmed by an official of the post office, who had refused to believe it, but found it was true on digging up the mutilated corpse. Another woman, who was caught cutting off a dying man's finger in order to take his ring, was tied to a cart and	sister, to provide for and to superintend the education of the rest.
