very best in the market. Nearly every annly in town uses it, and there still is NEW STATION .- The Pennsylvania railond is building a new station in Wrightsville. It will be one story high, and built of brick, and suitably and conveniently ar-

ranged. The style of architecture is same as the Watt's Station at Marietta. BARN BURNED .- The barn belonging to the York County Poor House was destroyed by fire Monday morning about four o'clock. We learn that the contents, inclu ing the live stock, were also burned. We have not heard the particulars. The light of the fire was distinctly seen at Co

TEA DIRECT FROM CHINA .- On Saturday afternoon, a train of nineteen cars freighted with tea, passed through this place for the east over the Pennsylvania Central. The tea was imported direct from China, brought to San Francisco by the Pacific ocean steamers, and from thence transported by rail. This was the first load that has

LEFT SUDDENLY. - Brother Hoffer of the Mount Joy Herald, has been away on a our for the past few weeks. His last letter o hia paper is written from his sanctum a ome, in which he says:

"We left Omaha rather abruptly without even seeing our triend Mr. Jacob H. Gisn." Our Jabe, in reading this, wants to know it Gish is nt the landlord o an Omaha hotel and if leaving abruptly is not quite natural or eduois!

IMPROVEMENT .- We observe John B. Bachman has erected a very complete building two stories high and nearly one aundred feet long on his wharf, for the storage of seasoned lumber. Each story will contain about one handred thousand teet. The first story will be occupied for the storage of box lumber and the manuacture of tobacco boxes. The second story, which communicates with the second tory of his mill, will be used for the stor age of planks for the sash and door manubetory of Bachman & DeHuff. The in ereasing patronage of his planing mill demanded and required the extension. It is a great addition to his large manufacturing

The printed addresses which appear upon he margin of every issue of our paper, afford a good opportunity to delinquents to scertain how their subscription account stands with the office. For instance, if the address reads: "Join Jones, Hnov68," it means that the said John Jones owes on his paper for two years, up to November 11,1870 We hope, therefore, that these gentle marginal reminders will serve to secure the pay ment of blackstanding sub-criptions, and furthermore, that the remittances will be-

promptly made. We will receive \$2 per annum on all back subscriptions that may be paid between this date and the 1st of January, 1871. Phose who desire to save 50 cents a year, will find it to their own interest promptly to avail themselves of this offer.

HISTORICAL--Litiz us seen bg a correscondent.-The correspondent of the Harris burg State Journal gives the following ineresting history of Litiz: Litiz is situated in Warwick townshipettled, as the name implies, by the Eng-

Zinzindorf preached here about 1745, and converted a few Mennonites to the Moravian auth. Emigration of Moravians from Germany rapidly swelled these numbers, until n 1856 the entire community had become Moravian. Following the plan adopted at Bethlehem and Nazareth, the people were organized into a separate and exclusive manualty, entirely under the governmen of the church. The property, comprising 500 acres, and including Luiz springs, be onged to the church, and was leased on round rent. It after buildings had been rected, a member behaved so as to be excelled from the church, the moneyed instiution of the church, called in German Donmen, and presided over by a warden, appoints one appraiser, the party expelled a econd, and these a third, whose award was inal, and at which the Deaonen took it, and the previous owner was compelled to leave he community. Thus unworthy charac ers were kept out of the community for

icarly 100 years. This arrangement has had to yield to the pirit of the times, however, and the lease ystem was finally abandoned in 1854, anhe property thrown into the market. Though there is no other church yet in lown, there are many citizens of other religious persuasions now incorporated into the community. The Reading and Colum bia rankroad, completed in 1864, attracted attention to this town, and caused a large

growth. Many of the new-comers, how ever, attracted by the honest simplicity of hese good people, joined the Moravian durch, so that it retains its present supremacy. The present School Board, for intance, are all Moravians, though elected without preconcerted arrangement or design.

The present beautiful church was built thour 1756, and remodeled in 1857, 101 yearfrom its foundation. It does credit to the ongregation that now worship in it. Its sacred walls have re-echoed the elopience of Ceisberger, Bishop-Hale, Bishop senade, Walte, Swemitz, and Kinge, all listinguished men in the church, as suc

essive generations sprung up, grew old, and passed away. One might linger long in it, and the adjoining buildings and grounds w to interest and profit. EDUCATIONAL INSTITUTIONS

One of the avowed objects in establishing hese exclusive religious communities was e provide first-class schools, in quiet placs, under religious influences. Hence, one of the first steps taken was the commence-ment of academies and seminaries. The present church seminary was established in 1794, and is still floorishing. Rev. E. A. Fruenuff is the principal. The elder Beck established an academy, and, though nearly 80 years old, and a teacher 50 years, still ssists his son, Abraham Beck, with his seect boys' scatemy. The Sunnyside col ege, a temale institution, flourishes under Rev. J. T. Beckler. Rickert and Hepp have charge of Beck's original academy. Litiz has been noted for the excellence of ner institutions of 1 arning for more than half a century, and bids fair to retain her pre emmence in this particular. Among the patrons of these institutions are many well-known citizens of other states. We have only space to attude to J. E. Sutter, of Calnornia, who has three grand children

here, and spends part of the summer here Gen. Sut'er, a foreigner by birth, was a resident of California when it came into possession of the United States. He is said o be the man who first discovered gold in .848, while digging a millrace. He tried to seep it concealed until his mill race was completed, but it was impossible, and his hands abandoned it for the more promising

search for gold. The general was the owner of large tracts of land, on which thousands of cattle were perded. When the influx of miners over turned existing institutions, and instituted period of lawlessness, men became wealthy at butchering the general's cattle without paying or even asking for them. The general commanded in California curies the war.

in New York are moving in the matter of increased salaries for school teachers. This is right. Our teachers are not half paid, when we consider the years of preparation required. Teachers' institutes in some secons of the state are growing into disfavor, because not properly managed. They can certainly be made a most influential agent for educating our teachers, and generally are.-Our schools are in prosperous co. dition, and maintain a high relative standard among the schools of the county. A Success.-The Sur day School exhibi ion which was held on Tuesday evening last at the German Lutheran Church, on Walnut street, proved a decided success.-The lecture room was crowed to its atmos apacity, even the aisles were occupied with spectators. The performances by the cholus were very ratifying, and gave general satisfaction. The opening addresse, in English and German by Wisses Kate Baner, Mary Abendschein, Flora Herrman ind Master Charles Weimer were weil rengiven. "Aunt Jane," taken by Miss Lizzie Lebegern was a master piece; the "Philosophy of Smoking," by Miss Kate Kerner and Jacob Dutenhoffer elicited great praise, and the "Sailor Boy's Bible," by Henry Westerman had a good effect, The Angel scene by twelve small girls, all dressed in pure white, was grand beyond description; and the "Guard on the R ins," with Miss Bertha Rochow as Mother Germania, appearing to the guard, was strikingly beautiful and held the audience in a trance of delight. All who siw this grand tableau expressed the desire to see it again. The singing by the "Titonia Quintette," was very fine, and listened to with the greatest attention. By general request, this very popular exhibition will be repeated at the Odd Fellows' Hall, for the benefit of the School, on next Monday evening, December 19th. Luzerne county, give the details of the great Strike among the miners, and the consequent loss of h bor to upwards of 30,000 men. The cause of this suspension may be briefly stated thus : For a month past there has been a depressed and dull market for all varieties of coal in New York. the great depot for the Seranton region. caused in part by the mild weather and the consequent small use of fuel and by the over production. It is more profitable now for the great corporations of Luzerne sounts to allow their coal undisturbed in the mines than send it to markets. The production has largely exceeded the consumption, and in accordance with the natural laws of supply and demand there must be a fall in prices. This the mining companies of the Scrunton region refuse to submit to, and rather than sell at current

We earnestly recommend this entertain

rates they have precipitated the suspenonn. In regard to this strike, the Harrisburg State Journal says: " The motive for the reduction of wages is said to be found in the fact, that the yards of the company were well stocked, and that they designed to produce a strike so as to advance the price of coal. This was a conspiracy against the public as well as against their own work men, and, if true, is as ruscally and cruel, an stempt to speculate upon human necessities and sufferings, as we have ever heard of. S rikes are about the worst remedies for the numerous hardships to which work ingmen are eften brought, and are rarely, if ever, justifiable. In this case the provocation was great, and the men, doubtless, saw no other solution of the difficulty."

CENSUS OF COLUMBIA. —In 1850, the Census was taken by William Huppey, Assistant Marshal, from which we take the following extract;

Whole number of Males
Whole number of Fernales
Whole number of Colored
Whole number of persons over 20,
who can neither read nor write
Whole number of houses
Whole number of families
Whole number of deaths in one year
Whole number of scholars in school

In 1860, the Census was taken by Samuel E. Maxton, Assistant Marshal, as follows: Whole number of Males Whole number of Colored 662

Whole number of Pentales 2555
Whole number of Colored 612
Whole number of Colored 612
Whole number of persons over 20,
who can neither read nor write 110
Whole number of houses 90
Whole number of families 90
Whole number of deaths it one year 30
Whole number of scholars in school 630
In the official statement of the population of Lancaster county given below, it will be seen that Columbia has an aggregate of 6,461 souls. The assistant Marshals claral that the statement is incorrect, and that it is too low by about 200. At any rate we have gained 850 in the ten years, which a correct enumeration of our population now would doubtless swell to 1,000 or one fifth of the entire gain in the county. It speaks well for Columbia, as compaced with neither boring towns. How soon shall we have a city charter?

MESARS. EDITORS :- The recent improvenont which was made in Gossler Green—a new pavement on Manor street from Fior ence to Fourth street-gives great satisfaction to the residents of our part of the town But why was the pavement not extended from Mauor on Fourth to Mill street? In our petition this extension was asked for and granted by the council. What occa sions the tardiness on their part in not having completed what was so well begun Your correspondent hopes it will be un necessary to again refer to the matter, I u that council will order the pavement or

Gossler Green.

For the Spy Night after night our town is disturbed by young boys prowling about, swearing, smoking, chewing tobacco, spitting or stoops, opening gates, ir sulting ladies, &c We think if our Borough officers would appoint some one a special police for one month, these young scamps who are on the way for the penitentiary, could be cooped and learned how to behave themselves. Why does not our constable arrest the tramps who travel from house to house begging and stealing. It appears to me, the law authorizes constables o arrest all such persons, but we but seldom hear of him fulfilling his office.

Editor Spy: -Being a reader of the Daily Evening Express for many years, apart from its recent free trade nonscuse, I have regarded it as an interesting journal, both for local and other news. I have alwaysregarded that paper, which contains the largest amount of local news, as having the greatest interest for its readers. But since the project of the introduction of the Geyelin wheel at the city water works some twelve months are, the columns of the Daily Express have been becapied with matter so intensely local; indeed I might Geyelein wheel, that the daily readers of the many articles and columns of staff, in relation to the aforesaid wheel, are no doubt reminded of an old story of an old woman, who bought for her table and boarders no other meat than "liver." which she served every meal. One day her boarder, John, not eating his usual quantity of liver, gave the old woman some compunction in the matter, and she very mocently inquired of John, whether he liked liver? "Madam," John exclaimed, "I can go it sixty or seventy times, but I'll e blowed if I like it for all time."

So with the readers of the Express, we have been "going" this Geyelin wheel four imes seventy times; and must we endure

it to all eternity? We don't care whether the pump is a good or a bud one, whether there was or was not a wedge in the valve, waether the entor of the Express is more entitled to personal veracity than the editor of the Intelligencer, for here is a query; or whether Goyelin or Noah made the wheel, but it would seem that these literary gentleman had an affection of the mind, and that hydropathy had been recommended as an antidote. Let us have peace.

LANCASTER, Dec. 7th, 1870. Editor Spy:-December made her ap carance last week, clal in a beautiful white mantle, manufactured by that old magnificent artist, long known by the name of "Jack Frost," Soon, however, "Old Sol" showe i nis erest, above the eastern horizon, when the new morning gown fuled away. Business on our streets seems to be almost as active as it was in midsummer; and we can scarcely realize that we are on the eve of Christmas. Buildings are going up in all parts of the city, and from the new houses, which will be ready for occupancy by the first of April, we ought to expect a reduction in routs; at least "that is a consummation devoutly to be wished."

There is a prospect that the complaint of scarcity of water has open heard for the last time; as I understant train our thre Fathers, that the "Gogolia pump" has at last been started and is working charmingly-throwing up water at the rate of a million gallons every twenty-forc hours. to our citizens, generally, I have understood that it is gall and worm-wool to the smart men of the Intelligencer Office, who have all along been predicting that the new pump would be a failure. "Their wish" this case (I think) "is father to the thought." Isn't it strange how some people will persist in finding fault with everything planned or intempted, by personholding political views in o position to their own, even though they are fully aware of the fact that those plans are all right; so it has been with the luminaries who shine around the Intelligencer alice. I have very little doubt but what they fully believe, and have believed from the start, that the Geyelin wheel and pump would work well; but then if it dal, it would pre-ent an ugly contrast with the old works, and the "young and vigorous alministration" of Mayor Atles would be a total eclipse of the ten years of the administration of Mayor Sanderson's, which might be disastrous at the next city election. Inasmuch as the quiet thinking men, who are not governed by bar-room political brawlers, would be likely to sustain an administration which had given them full and constant supply of water; and, who had put the old worn-out works intogood condition at very much less expense then the erection of a cornish cugme-to say nothing of the immense annual cost of

running such an engine.

Our stricts are being pave I on the contrict system, thus saving largely to the tax payers, instead of rewarding partiz in 15af ers without regard to expense, as was the rale under the former administration. I propose, with your permission, to give you a line once in a while on passing events. But this is enough for one time, as short letters are generally more acceptable

to both editor and The lecture season has been inaugurated in this city under rather discouraging eirin this city under rather discouraging cir-numstances. A few nights since C. C. Bur-leigh lectured on an interesting subject, and in his usual doquent style to an an hence of about one-bourth filling Fution Hall, Listingar R. J. D. Cordova, E-q., (huge name) from New York, delivered a very humorous lecture in the same half on "Young America, on his summer vaca-tion." to an anderoce a triffe larger than ton." to an audience a trifle larger than Mr. Barleigh's, but still much less than it ought to have been. Why our people do no ationize first-class lectures, is very quenie. By the way I saw a little editorial in the By the way I saw a little editorial in the Intelligencer a few days since, stating that he do both of Berks county was only \$10,000.00. This should be regarded as good news for the Berkers, from the fact that on the 1st of December 1897, the dots of Loat good ood I they have reduced in three years to \$10,000,000, all I have to say is "Bully for Rocks."

The fact is that the Intelligencer wanted The fact is that the Intelligencer wanted to say something in favor of Democratic rovernment, and, not having any cruth on hand, as Toots would say, "its of the consequence," and so they hed a lattle.

Is it not singular what a difference there is between Democratic and Republican management? Look at the countres aljoining Lancaster, east and west. Borks county assessed property at the rate of 9 mills on the dollar, for county purposes, York county, requires 71 mills to the dollar, for the same purpose.

The Gas Company have made some improvements at their works.

Wall Fry has the cheapest cigars, as well as the timest flavored.
