There is a general movement all over the country to abandon the old parties and form a party of Freedom to overthrow the Slave Power.

It is well known that he has always acted with the Democratic party in this county, having for several years published a Democratic paper, and ever since labored with zeal and honesty of purpose for the advancement of those principles which he believed to be the best for the country.

The first child born in the city of Lawrence, Kansas, has been called Lawrence, and a public meeting has voted him a good town lot.

Recently in Louisville, Ky., a pair of elks were driven through the streets, harnessed to a buggy.

According to the Boston Traveler, 310,000 copies of Uncle Tom's Cabin have been sold in this country, and 90,000 copies of the Key to it.

A pork packing house in the City gives public notice that free tickets will be furnished by them which shall entitle the bearer to receive "one Hog's Harslet."

The Cleveland Herald lately published this notice:—If James Johnson will call at this office, he will hear of something to his advantage.

HYGEANA.

Brought Home to the Door of the Million. A Wonderful Discovery has recently been made by Dr. Curtis, of this city, in the treatment of Consumption, Asthma, and all diseases of the Lung. We refer to "Dr. Curtis' Hygeana, or Inhaling Hygean Vapor and Cherry Syrup." With this new method Dr. C. has restored many afflicted ones to perfect health, as an evidence of which he has innumerable certificates. Speaking of the treatment a physician says: "It is evident that inhaling—constantly breathing an agreeable, healing vapor, the medicinal properties must come in direct contact with the whole of the arial cavity of the lungs, and thus escape the many and varied changes produced upon them when introduced into the stomach, and subjected to the process of digestion. The Hygeana is for sale at the druggists' through out the country."

N. Y. Dutchman, Jan. 14. The Inhaler is worn on the breast under the linen without the least inconvenience—the heat of the body being sufficient to evaporate the fluid.
