LOCAL EDITOR:—Last week (Court week) I was in Coudersport from Monday till Saturday morning, and was in your office enough that I ought to have said up my talking for at least one week, but I propose now to talk on with you and ink in regard to my trip home, which, by the way, was a little checkered, as are our lives from first to last.

Friend G. W. Colvin and myself stepped into the Wellsville stage via Ellishburg—Colvin to leave the stage at Coudersport and I to ride as far as Squire Judd's and then to travel on foot over hills and through dales, through fields and forests, as straight a line as the formation of the country would permit.

Let me say here that I noticed the meadows all the way from Coudersport came to the conclusion that with rain and warm growing weather the hay crop would be light, and without many meadows would be almost an entire failure. I saw clover beginning to blossom not more than four or five inches high and so thin the ground beneath almost bare. I find the grass much better in Oswayo valley than any I have seen elsewhere.

On the way I called at the house of R. H. Smith for rest and refreshments. Rob. is a sociable fellow and lives at home, and after enjoying the good things of the house and a view of his fountains of cold spring-water filled with hundreds of speckled trout, and his milk-room where is a nice arrangement for churning by water-power, built with his own hands, I started on my journey resolved to cross the mountain, through the woods, which ranges high between Smith's and the valley where I live.

No one cares how many steps it took to gain one in climbing this mountain, so I will tell you what was being done on the other side while I was ascending this. My object in crossing the mountain was to see if deer had found salt on its summit which was left there by my son and myself not long since, where we hoped to kill one some time after the first of September, and now my son is slowly winding his way up the side of the mountain, and on his shoulder is a rifle which carries a pretty heavy ball and has a set-lock that needs but a slight touch to send its deadly missiles wherever its holder wishes, for he has the reputation of being an excellent marksman. He travelled on until he came to the lick, but hark! a deer is coming now! game laws are forgotten; some large trees and thick brush hide him from view, but so soon as the deer steps in sight he must fall. The hammer is raised, the gun drawn to his face, fine sight is taken and he waits for the deer to darken the sights of the gun.

But I am walking past large trees and thick brush near the lick and what do I hear? A nervous voice, which, trembling, says, "Pa, do you know that that stovepipe hat has saved your life?"—and the boy still declares that he is sure if I had been dressed as I sometimes dress at home or if the bushes had thinned out gradually, so that he would have had but a partial view of me, he would surely have shot me. As it was, the hat came in full view at one step and your obedient servant at the next.

And my advice now is that all young men be sure and remember the game laws and see what they are shooting before pulling the trigger, and that all old and middle-aged men be full six feet high and wear a stovepipe hat.

L. D. ESTES.

Change in Day of Publication.—The present arrangement of the mails that run through the eastern part of the County compel the changing of our day of publication, so that on and after Wednesday, July 9, the paper will be printed on the afternoon of that day and leave in the Thursday morning mails.

LOCAL EDITOR: I noticed in your paper some time ago the amount of lumber cut in one day in a circular sawmill.

Last Wednesday (June 11) Mr. Lyon's mill, in Wildcat, (formerly known as Hamontown,) sawed twenty-five thousand, two hundred and thirty-seven (25,237) feet of pine lumber in nine hours and twenty minutes. I challenge any water-mill in Potter county to beat it. We use a four-and-a-half feet saw and the slowest sets now used—quarter-inch wheel. We have twenty-six feet head and twenty-two inch Lefel wheel.

LUCIEN N. WHITING.

Sudden Death.—Miss Annie Grisel, a daughter of Ignatz Grisel, of Eulalia township, has, for some time past, been working in the family of Hon. J. S. Mann, of this place. Last Saturday evening she went to bed soon after nine o'clock apparently in her usual health. About eleven o'clock M. S. Thompson was aroused by a scream or prolonged "oh!" proceeding from her room. He called Mrs. Mann, who had not yet retired, and she hastened to the girl's room, where she arrived just in time to see her expire. The only movement she made after Mrs. Mann reached her was to gasp twice for breath.

Dr. Ellison was immediately sent for and arrived in a short time, but he could discover no pulsation. He pronounced it a case of apoplexy.

The remains were buried Tuesday. The funeral was largely attended, and although the day was very warm, over one hundred and fifty persons followed the body to the grave.

Cheese Factory.—For many years past the region north and east of us has been growing rich in the manufacture of cheese in factories. This County is equally well adapted to the same business, and there are at least a dozen localities where factories can be successfully operated.

Two or three years ago an effort was made at Lewisville to establish one, but through the incompetency of the person having it in charge it proved a failure; since which time the opinion has seemed to prevail that cheese factories were humpbugs, the experience of the great dairy region north of us to the contrary notwithstanding. But at last we have in this County a cheese factory that is a success.

Two and a half miles north of Bingham Centre, in the township of Bingham, is located the factory of Mr. Hale Young, which commenced making cheese on the twelfth of May last and is at present using the milk of from 300 to 350 cows and making from 11 to 12 cheeses weighing 60 to 68 lbs each. Mr. Young came from Alfred, Allegany Co., N. Y., and understands the business.

Everything is furnished by the factory, except milk, and the cheese marketed for two cents a pound.

The capital required to put in operation was about \$1400, and it takes two persons to do the work.

We just have two other facts to mention, viz: butter sells now for 20 cents per pound and factory cheese sells at from 14¢ to 16¢ cents per pound.

THE "National Line of Steamships" has been wonderfully improved in the last two years, by the building of FIVE NEW STEAMERS, several of which have made some of the fastest runs on record.

The Line between New York, Queenstown and Liverpool is composed of the most celebrated steamers in the world and their average time is not far from about nine days. The accommodation for steerage passengers is of the best character, comprising many comforts and conveniences not to be found on other ships.

Passengers to and from Bristol, Cardiff, Glasgow and Londonderry sail by this Line. The London Line is composed of the older vessels and offers very good accommodation to and from the south of England, Marseilles and Continent of Europe, but the steamers are not so fast as the Queenstown & Liverpool Line. This Company has always been in favor of cheap passages and still guarantees to sell tickets at lower rates than any other Line crossing the Atlantic, a fact that should be remembered by those visiting the Old Country or sending for their friends.
