THE FARMER.

To Thaw Frozen Plants.—To preserve vegetable life, after having been frozen the same precaution is necessary as in the case of animals. Sudden elevation of temperature, by application of heat, proves fatal in both cases. When the noses of French soldiers became frozen and lost all feeling in their retreat from Moscow, they were preserved by rubbing them with *snow*. The restoration of vegetables frozen while alive is to be accomplished by the application of cold water, but not when the sun is shining on them. For reasons that are here made obvious, early Yorks and other things should be planted on the north side of ridges.

That portion of trees standing on the north side of a wall and rising above it, so as to be exposed in early spring to the action of the sun, has been known to be killed, while the residue, shaded by the wall, and therefore acted upon by the more gradual elevation of veneral temperature, has escaped uninjured; on the principle that is known, that, if a man's feet are frozen, he will loose them if plunged into hot water.—*Verb. sap. sat.*

Profits of an Acre of Carrots.

Francis Dodge, Esq., of Essex county, Mass., raised 34½ tons of carrots on an *acre*, which at 50 lbs to the bushel, make 1380 bushels. The rows were 22 inches apart. One pound of orange carrot seed was sown by a machine. The carrots were hoed three times and weeded twice; the last hoeing just before the tops covered the ground. They were dug with a spade; the tops carefully saved and fed to the cows, the tops being at the time knee high. We abstract the above, and give the following statement of the expenses of culture, and net profit, from the *Transactions of the Essex County Agricultural Society.*

The expense of cultivation was as follows:

Interest on land at 6 per cent.,	$7	20
Ten cords of manure, $6 per cord,*	60	00
Spreading the same,	3	00
Plowing,	2	50
Harrowing,	2	00
Plowing and raking,	4	00
Seed,	1	00
Sowing $1, hoeing and weeding,	15, 16	00
Digging	21	00
Total expense,	116	70
Value of crop, 34½ tons at		
$7 per ton	$241	50
Value of tops,	7	00
One half manure to land,	30	00
	278	50
Deduct expenses	116	70
Net profit	161	80

*A cord of manure contains 103 bushels.

Remedy for Scarlet Fever.—The following cure for this malignant disease is given in the Delaware Republican, by a physician:

"*Messrs Editors:*—You will confera favor on some of your readers, at least, by publishing this receipt for Scarlet Fever in all its stages, and which will cure nineteen cases out of twenty, if strictly attended to; this treatment, although apparently simple, you will find a sovereign remedy, and will save many of your little ones from a premature grave, which is almost sure to follow the use of calomel, which universally tends to increase the disease instead of curing it. Treatment as follows:—Give a mild cathartic, such as castor-oil or some gentle pills, every two or three days, and when there is fever present, spoge the body with weak ley, and give some simple tea to promote a perspiration, such as catnip, sage, balm, &c.; and for the putrid symptoms give good brewer's yeast, mixed with cold water; one tablespoonfull of the former to two tablespoonfull of the latter, for children ten or twelve years old, and younger ones according to age; to be repeated from three to five times a day; and use as a gargle yeast and cream or milk, equal parts, sweetened with honey, and gargle the thoat and mouth frequently with it; and if the throat is much swollen, poultice with yeast and pulverized slippery lm; continue the above treatment until well. I know, by many years' experience, that this is the best and most effectual way to cure the scarlet fever.

Dr. Wm. Fields.

Wilmington, Del, Dec. 12, 1851.

"Scarlet Fever."—During this winter, many of our families have lost their children by this terrible disease. Some one child, and others four in the same family. Now, it is natural that they should desire to know a *preventative*—which is to be found in the use of *Belladona.*—Dose—a child 4 years old, 3 drops at 10 A. M., and 3 drops at 4 P. M. A child 2 years old, 2 drops at 10 A. A., and 2 drops at 4 P. M. This remedy has for some years proved a *safeguard* in the family of the writer, who has also the guarantee of one of our oldest and most experienced physicians, that he has never found it to fail to keep off this fatal malady to children.—*Humanity.*

Good Wheat.—The Germantown Telegraph says that at the Harrisburg Fair there was a sample bushel of wheat exhibited by Mr. Richard Pim, of chester co., which was, perhaps, the finest grain we ever saw. It was white, plump and larger but what is equally impotant, he raised *forty eight* bushels to the acre, and a freind of his, as he informed us, raised fifty. It is called Australian Wheat, though very similar to the Etrurian, introduced into the United States by Com. Stewart, but it does not deteriorate by successive sowing like the most of the importations of this grain.

What is a Bloomer? One who *pants* for notoriety.

MEDICAL HOUSE,

ESTABLISHED FIFTEEN YEARS AGO, BY

DR. KINKELIN,

North-West corner of Third and Union streets, between Spruce and Pine.

PAILADELPHIA.

FIFTEEN YEARS of experience and uninterrupted practice spent in this city have rendered DR. K. the most experienced practicioner for and near, in the treatment of all diseases of a private nature. Persons afflicted with ulcerations on the body, throat or face, pains in the head or bones, mercurial rheumatism, strictures, gravel, disease arising from youthful excesses or impurities of the blood, whereby the constitution has become enfeebled, are all treated with success.

He who places himself under the care of DR. K., may religinously confide in his honor as a gentleman, and confidently rely upon his skill as a physician.

Take Particular Notice.

YOUNG MEN who have injured themselves by a certain practice indulged in—a habit frequently learned from evil companions at school—the effects of which are nightly felt, even when asleep, and destroy both mind and body, should apply immediately. Weakness and constitutional debility, loss of manly energy, physical lassitude and general prostration, irritability and all nervous affections, indigestion, sluggishness of the liver and every disease in any way connected with the disorder of the procreative functions cured and full vigor restored.

LITTELL'S LIVING AGE.

Extracts of Letters from Judge Story, Chancello Kent and John Quincy Adams.

I HAVE read the prospectus with considerable care, and entirely approve the plan. If it can only obtain the public patronage long enough, and large enough, and extensively enough to attain its true ends, it will contribute in an eminent degree to give a healthy tone, not only to our literature, but to public opinion. It will enable us to possess, in a moderate compass, a select library of the best productions of the age. It will do more: It will redeem our periodical literature from the reproach of being devoted to light and superficial reading, to transitory speculations, to sickly and ephemeral sentimentalities, and to so and extravagant sketches of life and characters, and fix so and extravagant sketches of life and characters.

JOSEPH STORY.

New York, 7th May, 1844

I approve very much of the plan of the "Living Age," and if it be conducted with the intelligence, spirit and taste that the prospectus indicates, (of which I have no reason to doubt,) it will become of the most instructive and popular periodicals of the day.

JAMES KENT.

Washington, 27 Dec., 1845.

Of all the Periodical journals devoted to literature and science which abound in Europe and in this country, this has appeared to me the most useful. It contains indeed the essence of the current literature of the English language, in addition only of the current literature and conversation, includes but this, by its immense extent and comprehension, includes a portraiture of the human mind in the utmost expansion of the present age.

J. Q. ADAMS.

TERMS.—The Living Age is published every Saturday, by E. LITTELL & CO. corner of Tremont and Bromfield streets, Boston; Price 12½ a number, or SIX DOLLARS a year in advance. Remittances for any period will be thankfully received and promptly attended to.

POSTAGE FREE.

To subscribers within 1600 miles, who remit in advance—directly to the office of publication at Boston—the sum of SIX DOLLARS, we will continue the work here and the year, as long as shall be an equivalent to the cost of postage—thereby virtually carrying out the plan of sending every man a copy to his own Postage Free; placing our distant subscribers on the same footing as those nearer to us; and making the whole country our neighborhood.

HOVER'S INK MANUFACTORY,

REMOVED TO

NO. 144 RACE STREET,

(Between Fourth and Fifth, opposite Crown St.)

PHILADELPHIA.

WHERE the Proprietor is prepared, by increased facilities to supply the growing demand for HOVER'S INK, which its widespread reputation has created.

This Ink is now so well established in the good opinion and confidence of the American Public that it is scarcely necessary for any thing in its favor, and the manufacturer takes this opportunity to say that the confidence thus secured shall not be abused.

In addition to the various kinds of Writing Ink, he also manufactures ADAMANTINE CEMENT for mending Glass and China, as well as a superior HAIR DYE; a trial of which is earnestly solicited, as he intends to merit a continuance of the favor he now receives.

The Ink is well adapted for Druggists and Bottlers at a very low price, in large or small quantities.

Orders addressed to JOSEPH E. HOVER, Manufacturer, No 144 Race Street, Between Fourth and Fifth, opposite Crown, PHILADELPHIA.

GODEY'S LADY'S BOOK FOR 1852.

Increase of Reading Matter!!!

THE LADY'S BOOK for the ensuing year, will present many novel features suited to the advancing demands of the public taste. It has ever been the object of the publisher

TO TAKE THE LEAD

Among the popular Magazines of this country: and the host of imitators, who have been constantly following—"toiling after him in vain"—are sufficient to attest his brilliant success. The promptness with which every new idea that he suggests is adopted by others is a sufficient omen for his not being very exalted, and even in his promises of what is yet to come. He does not wish to lay out plans for others to follow. It is sufficient, however, to say that all the existing popular features of the Lady's Book will be retained, and many new ones, particularly attractive in a Lady's Book and Family Magazine, will be introduced. The useful and the elegant will always be kept in view.

To the Magazines alone we must look for the effusions of the monthly muse of Literature. It is useless to publish a list of names—suffice it to say, that we have published articles, and have others to publish, from

All the best American Authors—Male and Female!

GODEY'S LADY'S BOOK for January, 1852, will contain in addition to the most beautiful and numerous Engravings—from Paris, our colored—an additional quantity of reading matter, by American authors. There is no question about the fact, and the tens of thousands of notices that we have from the contemporary press will establish it, that it is

THE MOST MAGNIFICENT PERIODICAL IN OUT WORLD.

The publisher will give 13 Nos. for 1852, that the London Art Union would be proud of, and their price is TEN DOLLARS a year.

It must be acknowledged that the Lady's Book caters to the taste of the American Ladies. It furnishes them with every thing that can interest a Lady—and among others is the following—

American Repertory of Inventions.

To Mechanics, Inventors and Manufacturers.

VIIth Vol. of the Scientific American.

MESSRS. MUNN & CO.,

American and Foreign Patent Agents, and Publishers of the Scientific American,

RESPECTFULLY announce to the public that the first number of Volume VII of this widely circulated and valuable journal will issue on the 20th of September. The new volume will commence with new type, printed upon paper of a heavier texture than that used in the preceding volumes. It is the intention of the publishers to illustrate more fully, by introducing representations of prominent events connected with the advancement of science; besides furnishing the usual amount of engravings of new inventions. It is their design to make the Scientific American, as now published weekly in form for binding, and affords at the end of the year a splendid volume of over four hundred pages, with a copious index, and from five to six hundred engravings, together with a vast amount of practical information and useful knowledge, derived from the most authentic sources concerning the progress of invention and discovery through out the world. There is no subject of importance to the mechanic inventor, manufacturer and general reader which is not treated in the most public manner—the editor, contributions and correspondents being men of the highest attainments. It is in fact the leading scient
