A HINT TO THE FARMER.

We may send to England for Durham cows; and to Spain or Saxony for the indicates sheep; we may search the world was for cattle that please the eye, but unless they receive the best care and liberal intended they will most assuredly deteriorate and eventually become as worthless and unworthy of propagation as any of the skeleton breeds that now haunt our rich skeleton breeds that now haunt our rich but neglected pasture-lands. We remember an anecdote in point, and will relate which way of allustration. A farmer having opurchased a cow from a county abound ting in the richest pasturage, upon takit her to his own inferior pastures founding she fell short of the yield which was she fell short of the yield which to give.

informed she had been accustom of whom

He complained to the gentler of whom

He complained to the gentler of was not he had purchased, that the ow was not in other words the one he bargained for. in other words she was not what she seller, "I sold you be." Why," said! sell you my pasture my cow, but did "sell you my pasture

The aboveds us of the reply which a change, Marmer, whom we knew many shrewdo, made to one of his neighbor. yearAtter had obtained some pigs of a g residing some miles off, and who, be-

Auseintelligent, was always very successful in his farming operations, particularly surpassing his neighbors, in raising pork. Shortly after, meeting the old gentleman referred to, he says, "Well, Mr. Sweetser. I'm going to beat you raising hogs this breed." "Aa ah," drawled out the old man, "you'd better get the breed of his ho-og trough!"-Maine Farmer.

WHEN TO USE LINE AND PLASTER.

Land doctoring like all other doctoring, should be performed with an intelligent reference to the nature of the disease, and the adaptation of the remedy. General BIERCE, of Akron, is a careful observer of natural phenomena, and withal a successful cultivator. He has recently contributed the following valuable suggestions to the Summit Beacon:

The value of Lime and Plaster, as a manure, depends upon the component parts of the soil to which it is applied.—
All land has more or less sulphuric acid in it, caused by the decomposition of iron pyrites. The presence of this acid may generally be known by the appearance of the soil, and particularly of the stone. If there is any iron rust, or oxide of iron, in the soil, or in the stone; or on the top of the water that filtrates through the soil; or if the water is hard, it indicates the presence of the water is hard, it indicates the presence of the water is hard, it indicates the presence of the water is hard, it indicates the presence of the soil, or in the stone; or on the top of the water is hard, it indicates the presence of the water is hard, it indicates the presence of the component of the water is hard, it indicates the presence of the soil of the water is hard, it indicates the presence of the component of the soil of the water is hard, it indicates the presence of the component in the soil of the water is hard, it indicates the presence of the component in the soil of the water is hard, it indicates the presence of the component in the soil of the water is hard, it indicates the presence of the component in the soil of the water is hard, it indicates the presence of the soil of the water is hard, it indicates the presence of the soil of the water is hard, it indicates the presence of the soil of the water is hard, it indicates the presence of the soil of the water is hard, it indicates the presence of the soil of the water is hard.

MILESBURG, Pa.,

Respect TFULLY annoance to the Mercharts, and other of claration of the Mercharts, and other hard is added to the Mercharts, and other hard is added to the Mercharts, and other hard is or if the water is hard, it indicates the presence of sulphuric acid.

If the land on which grass seed is sown, is "slow to catch," or sod over; or catched in patches, it indicates the presence of sulphuric acid.

If the roots of clover, and herds-grass in the spring, stand two or three inches out of the ground, and in detached parcels, with bare ground between-it is the work of sulphuric acid. On such land plaster is a positive injury.

If clover and tame grasses die out, and are succeeded by wire grass, sorrel or sour dock it is caused by sulphuric acid. Put on lime and keep off plaster.

The reason why plaster should not be used on land charged with sulphuric acid. is that plaster is composed of lime and sulphur, and applying that is adding more of that with which the land is already overcharged. On such land apply lime, which unites with the sulphuric acid, and forms plaster. The lime thus neutralises the acid; and the acid thus neutralises the lime, and forms a compound nutriment for Carmensvile, Feb. 21. 18 3 plaster. The lime thus neutralises the lime, and forms a compound nutriment for vegetation.

The reason why the ground appears so hard, where the earth is charged with sulphuric acid, is that the old stubble has Jacob Runk

been eaten up by the acid.

The sulphuric acid in plaster, applied to land not overcharged with that substance, decomposes vegetation, and fits it for nourishing the living plants. Where there is an excess of the acid it eats up the vegetation, both dead and living. This is the reason why soils overcharged with the acid are always deficient in vegetable matter. And soil free from it, have an excess of vegetable matter in a decomposed state.

The presence of this acid is the cause The presence of this acid is the cause James Netton James Perguion of sorrel and sour dock, and sour grass. David Goss The land is literally sour, and Nature is Ba uel Michael trying to throw it from her stomach, Abraham Goss R. W. Scott trying her her between the model trying her bet through these excrescences.

The rule then, is, if your land has too much sulphuric acid or is sour, give it a good coat of lime; if destitute of acid, apply plaster.

Another Scientific Wonder! GREAT OURE FOR DYSPEPSIA Dr. J. S. HOUCHTON'S

Enternd according to Act of Congress, in the year 1861, by J. S. HOUGHTON, M. D., in the clerk's Office of the District Court for the Fastern District of Renneylanding

THE TRUE DIGESTIVE FLUID, OR, CASTRIC JUICE.

reported from RENNET, or the fourth Stomach The great Physiological Chemist, by J. S. Houon, Ton, M. D., No. 11. North Eighth Street, Fhile desphia, Pa.

This is a truly wonderful remedy for Indigestion,
Dyspersia, Jaundick, Liver Cosiplaint, Cosstipation, and Destity, Curing after Nature's
own method, by Nature's own agent, the Gastic

Half a teaspoonful of this Fluid, infused in water, will digest or dissolve, Five Pounds or ROAST BEEF IN ABOUT TWO HOURS, OUT of the

DIGESTION. DIGESTION.

DIGESTION is chiefly performed in the stomach by the dia of a fluid, which freely resulted from the langer coated, that organ, when in a state of health, called the Gastrig Juice This Fluid is the Grant Solvent of the Cood, the Park, fring, Preserving, and stimulating Agent of the grounch and intestines. Without it there will be no digestron,—seconversion of Food into Blood and nonatrition of the body but in there a foul topid, passight, and destructive conditioned the whole digestive apparatus. A weak, half sead, or injurged stomach produces to ground Gastria Juice, and house the disease, distress and debility which enace.

PEPSIN AND RENNET.

PEPSIN is the other olement, or Groat Digesting Principle.

PEPSIN AND RENNET.

PEPSIN is the chief element, or Great Digesting Principle
of the Gastrio June. It is found in great abundance in the
solid parts of the human stomagh after death, and sometimes,
enteres the stomach to digest itself, or entitled in a literal of the solid parts of the solid parts

Discussed stomachs produce for good Gastrio suice, ternact, or Pepsia. To show that this want may be perfectly supplied, we quote the ollowing

SCIENTIFIC, EVIDENCE.

BARON LIEBIG, in his celebrated work on Atimal Chemistry, sand: "An Artificial Directive Fluid may be treadily obtained from the muonus membrane of the stomach of a Cail, in which various artisles of food, as meat and eggt, will have sold entered from the muonus membrane of the stomach of a Cail, in which various artisles of food, as meat and eggt, will have sold entered from the muonus membrane of the stomach of a Cail, in which various artisles of tood, as meat and eggt, will have sold entered to the product of the published by Wilson 2. Co., New York, case 33, states the same wreat fact, and describes the method of preparation.—

There are few higher authorities than Dr. Perei as meating and describes the method of preparation.—

There are few higher authorities than Dr. Perei as most food of Chemistry. "Date 355, says. "It has been a question whether artificial direction could be performed—but it is now universally infimited that it may be "Professor DivinGalle On of Philadolubia, in his great work on Human Physiology, devotes more tuan fifty pages to an examination of this subject. His exportments with fir. Beammont, on the Gastric Juce, obtained from the living human town in a firm animals are well known. "In all cates," hesays "digestion occurred as pesfectly in the Artificial as in the Natura directions."

AS A DYSPLPSIA CURER.

DR, HOUGHTON 's preparation of PEPSIN has produced the must marvellous effects, caring cases of Doblity, Emadation. Notwons Decline, and Uyspeptic Consumition supposed to be on the very verge of the grave. It is immusible to give the details of cares in the limits of this advertisement—but asthenticated certificates have been recovered of murchan.
