TO CLEAN CHRAT OUT OF SEED WHRAT. We commend the following to every wheat grower who believes that wheat will turn to cheat. The simple fact that the writer (and many others who have done the same thing) has eradicated chess from his farm, is sufficient to show the fallacy of the popular belief that "cheat is only degenerated wheat." We have given great attention to this matter for more than twenby years, and we have never been able to find an instance of the conversion of wheat to cheat; and the result of these investigations has convinced us that no such instance of transmutation ever did occur.-We have often alluded to it, because we believe the point one of great practicle importance; for so long as a man believes in the doctrine of transmutation, he will not

from his grounds. MESSES. EDITORS:-I have thought of sending you something like the following for the last twenty years and over, but always put it off. To clean all the chess out take the riddles out of the fanning mill, seaving the screen in-take off the rod that shakes the riddles and screen: pour the wheat slowly into the hopper with a basket ora half-bushel; turn the mill a little quicker than for ordinary cleaning, and every grain of choss will be blown out, unless where chess seeds stick together, which is sometimes the case with the top seeds.

take the pains necessary to extirpate cheat

Hevery farmer will clean his seed wheat in this way, I will warrent that wheat will never turn to chess after the land is once clear of it; but the difficulty will be to get the farmer to try it. It is too simple to be believed. I have seen some men who stand high as agriculturalists, whom I could New Washington, Aug. 4, '53.

THE FLY IN WHEAT—A PREVENTATIVE.

A diversity of opinion seems to prevail among farmers, as to the source whence comes the fly upon the growing wheat.

The true wheat is light, say weighing from 50 to 55.

Some say the fly egg is deposited upon the firm and the selform of the stalk, in the full; others that it is deposited primate. be given and not blow away the wheat .- the seed.

panality, is considered by many to be the radicle cause of their becoming watery and unfit for food. Any one, however, who will take the trouble of experimenting, may easily satisfy himself that such is not the case, and that potatoes which have been thoroughly cleansed by washing or larged by any process which effectually tids them of soils, will exibit say mptons of decay, and becomes unfit for libe, or for culinary purposes, much soon it many sections it is a common practice with farmers to select a portion of their best and most perfectly matured and developed tubors, and packing them caround their best and most perfectly matured and developed tubors, and packing them caround their best and compactly in barrels, filling the spaces between the roots, with soil, cool and moist. The barrels thus filled, are placed in some dark corner of the cellar, where they remain undisturbed till the contents are demanded for the market late in the season, or for domestic use.
