HOW TO SUBDUE A VICIOUS HORSE

On looking over some old papers the other day we came across the following which if true, is worth knowing. It scome that A fruitless effort was being made in a blacksmith shop to shoe a vicious horse, which resisted all efforts, kicked aside everything but an anyil, and came near killing himself against that, when, by more accident, an officer returned from Mexico was pasing, and being made acquainted with the difficulty, applied a complete remedy by the following simple process;

He took a cord about the size of a common bedcord, put it in the mouth of the horse like a bit, and tied it tightly on the top of the animal's head, passing his left ear under the string, not painfully tight, but tight enough to keep the ear down and the cord in its place. This done, he patted the horse gently on the side of the head, and commanded him to follow, and instantly the horse obeyed, perfectly subdued, and as gentle and obedient as a well trained dog; suffering his feet to be lifted with entire impunity, and acting in all respects like an old stager. This simple string thus tied, had made him at once as docile and obedient as any one could desire. The

gentleman who thus furnished this exceedingly simple means of subduing a very dangerous propensity, intimated that it is practised in Mexico and South America in diff the management of wild horses. Be this **as it may**, he deserves the thanks of all owners of such horses, and especially the

to shoe or groom the animals. PRESERVATION OF EGGS FOR WINTER USE. This is best done by lime-water, in which a little common salt is infused. This constitutes a fluid perfectly indestructible by pir, and one that is so allied to the nature No. 294, Broadway, N. Y Sout. 15, 1952.-tm of the shell as not to be absorbed by it, or through it into the interior of the egg. On the other hand, salt or lime, in a dry state AT PRIVATE SALE will act in the moisture of the egg, as will strong ashes. This plan, also, will save more eggs in a given space than any other. It will also admit of keeping them in cellers ever so damp, and, I had almost said, ever so foul, since nothing will be sata, ever so foul, since nothing will be Siteste in Pite township. Clearfield county, on the main fikely to act on the lime-water. As eggs Carwensville, and known as the are very nearly of the specific gravity of water, and so near with it, I have little doubt that eggs barrelled up tightly, in lime water, could be transported as safely as pork,

doubtedly hurt eggs. Having made your lime-water, in bar-

rels if you are a merchant, and in small stone pots if you are a small householder, Brop your eggs on the top of the water, when they will settle down safely.

room in which two ladies and a child were sleeping in one bed. After collectng what valuables he could find, consisting principally of their watches and jewsiry, he got ready to leave, but before doing so, leaned over and imprinted a warm **Fin on** the lady sleeping at the back of the bed. This roused the lady and resuljed in the capture of the thief. He was confined in the jail of Dixon, until one

hight last week, when he crept through the stove nipe hole leading from his cell to an upper room, made a leap of some twenty feet and "vamosed the ranch."

OTIf a young woman wishes to have herself published as "fascinating, beauti-ful and accomplished," let her pack up her best clothes in a dirty towel, crawl out of the back upstairs window some dark rainy night, and elope with the man that feeds and curries her father's horses. It's a big price to pay for compliments, but it will bring them just as certain as a dirty rianbarrel will beget mosquitos. In fact, we never knew a woman to make a very decided fool of herself, in any way, without enhancing her charms two or three hundred per cent, by the time her case got in the papers.

05 The Hot springs, in Virginia, are exceedingly warm, and in the water of the principal bath its very difficult to hold

A good story is told of an old Dutchman who came to that part of Virginia some years ago to locate-but on going to this spring and finding the water hot and "pparrently in the very act of boiling, mrdered his son to harness the horse and drive away, as the place could not be more than one mile from hell !
