The stron of Konseron's Magazine and Potnam's Marthly has given to the consultated work a eleculation second to but one similar publicati ti the country, and has recoved for it a combi nation of literary and artistic talent probably untivaled by any other Magazine in the world. During the first month, the sale in the trade and demand from sub-cribers exceeded 0.0,000 ceptes and the numbers already brand of the consolida ted work are universally conceded to have sor-passed, in the richness of their literary contents, and the beauty and profuseness of their pictorial illustrations, any magazine ever before issued from the American press. Encouraged by these eritences of favor, the publishers have 'etermined to commence the new volume in January with additional attractions, and to offer such inducements to subscriber as eannot fail to place it, in circulation, at the head of American Maga-tines. With this view they now announce the following splendid programme. They have purchased that superb and coatly steel-plate Edgra-

#### "THE LAST SUPPER."

and will present a copy of it to every three dol-lar subscriber for the year 1858. It was sugmved at a cost of over \$6,000, by the late celebra tes A. L. Dick, from the original of Raphael Morghen, after Leonardi Da Vinci, and is the largest steel-plate engraving ever executed in this country, being three times the size of the ordinary three-dollar engravings.

The first impressions of this engraving are held at \$10, and it was the intention of the artist that none of the Engravings should ever be offered for a less sum than \$5, being rightly worth that amount. Thus every three dollar substriber will receive the Magazine one year-cheap at \$3 a d this splendid engraving, richly worth b; thus getting for \$3 the value of \$8.

We shall commence striking off the cogravings immediately, yet if can hardly be expected that impressions of so large a plate can be taken as with a good situation if application be made soon.

GEO. W. ORR. We shall therefore, furnish them in the order in which subscriptions are received. Those who desire to obtain their engravings early, and from the first impressions, should send in their sub-scriptions without delay. The engravings can be sent on rollers, by mail, or in other manner, as sunscribers shall order.

\$20,000 IN WORKS OF ART.

lishers have completed arrangements for the distribution, on the 25th of December, 1858, of a series of splendid works of art, consisting of one series of spiconial works of art, consisting of ene hundred rich and rare old paintings, valued at from \$100 to \$100 cach. Also, 2,000 magnificant Steel-Plate Eugravings, worth from \$3 to \$5 each, and 1,000 choice Hollday books, worth from \$1 to \$5 each, making in all, over THREE THOUSAND BOILTARS, worth TWENTY THOUSAND BOILTARS. SAND DOLLARS.

Inclose \$3 to the publishers and you will commence receiving the Magazine by return mail .-You will also receive with the first copy a numbered subscription receipt, entitling you to the Engraving of "THE LAST SUPPER," and a grinding all kinds of grain into fine or coarse chauce to draw one of these "THREE THOUS-AND PRIZES."

#### Reasons why you should authoribe

EMERSON'S MAGAZINE for 1858. First: Because its literary contents will, du-

ring the year, embrace constributious from over one hundred different writers and thinkers, numbering among them the most distinguished of American authors. Second : Because its editorial departments

"Our Studio," "Our Window," and "our Olie," will each be conducted by an ably editor-and will surpass, in the variety and richness of its editorial contents, any other magnaine.
Third: Because it will cours is, during the

year, nearly six hundred original pictorial trations, from designs by the first American ar-Fourth: Because for the sum of \$3 you will

receive this spleudid monthly, more richly that sum than any other magazine, and the su perb Engraving of "The Last Supper," Fifth: Because you will very likely draw one

of the three thousand prizes to be distributed on the 25th day of Occember, 1858-perhaps one that is worth \$1,000. Notwithstanding that these extraordinary in-

ducements can hardly fail to accomplish the objects of the publishers without further eforts. they have determined to continue thro' the year

# THE GREAT LIBRARY OFFER.

To any person who will get up a club of twenty-four subscribers, either at one or more post offices, we will present a splendid library, consixing of over Forty Large Bound Volumes em-bracing the most popular works in the market. The club may be formed at the club price, \$2 a year, without the engraving, or at the full price, \$3 a year, with the engraving of the last Supper to each subscriber. List and description of the Library, and specimen copy of the Magazine will be forwarded en receipt of 25 cents. Over 200 Libraries, or 8,000 volumes, have already been distributed in accordance with this offer, and we should be glad to furnish a library to every clergyman, to every school master, or to some one at every post office in the country.

INHALATION IN CONSUMPTION BRONCHITIS, LARYNGINTIS, and other Discarce of the Chest and Throat, successfully treated by the Inhalation of Medicated Vapors and powders, by absorbition and constitujunal treatment, as practiced at the Singresian Medical Institute, New York sity.

The Unencenteren Success which bas attended this method of creating diseases of the Lungs and Threat has induced us to depart from our usual course, and avail ourselves of the columns of the press, in order to bring it to the knowledge of such as may be inboring under, er predisposed to such affections. The dawn of a brighter day has at length arrived for the Consumptive; the doctrines of the incurability of onsumption having at length passed away. have indubitable proofs in our profession ruar CONSUMPTION IN ALL ITS STAGES CAN BE CURED, In the first by two exculer absorbtion; in the second by the transformations of the tubercule into that ky and calcareour concretions; in the third, by eiestrices or scarp. These wedded to the opinions of the past may assert, that even now con-sumption is incurable; such are behind the age. To all this great truth must be apparent, viz :that the medicines inhaled in the form or Vapor or powder directly into the lunge, must be much more effective than that taken into the Stomach where the disease does does not exist. ont that, under the blessing of God, I owe the Invaluable Improved Blood Searcher, elieve it not only to be a sure remedy for ague is applied directly to the lungs, where the disease is applied directly to the lungs, where the disease exists; the stomach is thus left free to aid in re-storing her lih, by administering to it healthy and idences, expose them to this dreadful pest of life-giving food. There is no case so hopeless that mannity. Dyspepsia cannot stay where the Imbrought within the reach of all, the manner of administering the vapors being so simple that the invalid is never required to leave home, where the hand of affection tends so much to aid the

physician's efforts The Inhalation, method is soothing, safe and ready, and consists in the administration of medity of Communication.

I extrestly appeal to the common sense of all afficted with long diseases, to embrace at once the advantage of Inhalation, and no longer apply for Inhalation a place among the priceless after ips. He will always be found at the residence that ature and art hath given us, that "our day Thos. Kyler, when not professionally engaged, may be long in the land," and as the only ark of safely for the Consumptice; a method not only rational, but simple and efficueious. Such of the profession that have adopted Inha

lation have found it effleaciour in the highest de-

gree, arresting the progress of the disease and wor-king wonders in many desperate cases, in verity, a signal triumph of our art over this fell destroyer of our species.
