

Agricultural.

Operations for September.

The early harvest over, and late crops not yet matured, the interest should be put in getting in the winter grain, securing a large quantity of manure or other fertilizing materials, and some permanent improvements upon the farm.

Bees.—Continue to "scrap" or "ship," lean out hedge rows and fill the soil now some than wasted.

Wheat.—Cut as soon as it will ripen, or, left too long, much grain will be lost in harvesting. Chafe and bind, rather than row it and thresh it, is better, in saving the straw for bedding.

Butter and cheese making are supposed to be going on briskly. In September and October are the best months for saving down butter for winter use.

Cellars should be thoroughly cleaned, ventilated and whitewashed before receiving the winter fruits and vegetables.

PROTECTION FROM DISEASE.—If our correspondent, "A subscriber," will secure a thin, broad piece of paper, large enough to cover the nose and mouth, which can be procured of most of the druggists for a trifle, by slipping from a large piece, and fasten this on over the mouth, and nose, having first moistened the same with water, which imparts a very soothing influence to the nostrils, and at the same time collects all the small particles of dust that would otherwise settle on the lungs by inhaling the dusty atmosphere. When this becomes filled with dirt and dust, all you have to do is just wash it out in water, and apply it to the face as before.

Another correspondent says: My practice is to tie a piece of slightly moistened sponge of good quality over mouth and nostrils. This does not at all interfere with breathing, and but slightly with conversation, and is a most perfect respirator. The sponge should have no large holes, and need not be thick.

SCRATCHES IN HORSES.—Many remedies have been proposed for this disease, and mild cases generally yield to a simple washing with soap-suds, and greasing with lard or vasoline. But harsher medicines are sometimes required. A friend's horse had the scratches so bad that nothing seemed to do any good, until he applied a solution of copperas and vinegar, with excellent effect. It will kill the disease, when lard should be applied to heal the sore.

TO KILL FERNS AND BEETLES.—Most varieties can be subdued by mowing them in June and in September regularly for two or three years. Let no one be disappointed, because they do not succumb at once. Every year mowing will weaken them, and they will give up the unequal contest at last. The sort called bog bracks must have its crown hacked off with a scythe. Rake off the tops, and burn, or compost.

HISTORY OF THE ISABELLA GRAPE.—(Ed. J. G. Swift) of Geneva, in a letter to the National Intelligencer, expressing an article previously published in that paper, gives the following history of the Isabella grape:—As to the Isabella, it originated at Goose Creek, near Charleston, South Carolina, and is a hybrid of the native Fox and the Burgundy of Huguenots. Fox, B. Smith, of North Carolina, brought the grape vine to Smithville in 1809, and Mrs. Gibbs took a cutting from Gov. Smith's garden to Brooklyn Heights, in 1818. In 1819, I purchased the Gibbs place on Brooklyn Heights, of George Gibbs, Esq., who came from Bladen county, North Carolina; Colonel George Gibbs was from Newport, Rhode Island. In 1829, from the first well-grown vine in my garden, I gave cuttings to Wm. Price, of Flushing, who in compliment to Mrs. Smith proposed to name the grape, "Louisa." Mrs. Smith objected, saying Mrs. Gibbs, "Isabella," was more entitled to the name; and thus the name. As to the hybrid character of the plant, the two faces of the leaves show the upper to be Burgundy and the lower Fox. In 1821 I gave Mr. Skinner, of the Baltimore Farmer a history of the Isabella, which he published in that paper.

A PROBLEM.—Whoever originated the following deserves to have his name handed down to posterity:—"If a dispatch from England to America gain on the sun so as to reach here 41 hours by the clock before it left England; at what time would it arrive at the point of departure, were the cable carried around the world? Would it not arrive the day before it left less only the time exhausted in making the circuit? If so, then, with a continuous telegraph line around the world why not send a dispatch around and around until it reached back to Adam, and let him know what his children are about in these latter days?"

DEB. Many years ago when the bill for the relief of an aged officer was under consideration in the Senate, a member who wished it set aside suggested that it could be well postponed—"Congress sits every year," Mr. Fremontin, a Frenchman, a Senator from Louisiana, who advocated the bill, pointed energetically to the venerable petitioner, conspicuous in the lobby, and exclaimed—"Yes, Mr. Speaker, Congress sits every year, but DEATH STRIKES EVERY DAY.—LOOK!"

The New York Festival. (Special description by a Visitor.) New York, Sept. 1.—Arrived this morning—city swarming—hotels filled—floors covered—not a cot to be had—flags streaming, even from church steeples—military assembling—business suspended—ceremonies commenced—Broadway thronged. P. S.—Taken lodgings in the Telegraph office.

THE EDITOR'S DREAM. "I had a dream the other night, When all around was still; I dreamt I saw a man come up And pay his printer's bill! Which being such an unusual occurrence, caused me to awake, and I could not go to sleep again until I'd gone and made my will."

A POEM.—On Sunday a lady called to her little boy, who was tossing marbles on the sidewalk, to come into the house. "Don't you know you should not be out there my son? Go into the back yard if you want to play marbles. It is Sunday." "Well, yes, but ain't it Sunday in the back-yard, mother?"

GREAT DISCOVERY OF THE AGE, IMPORTANT TO TOBACCO CHEWERS.

DR. GUSTAV LINNARD'S TASTE RESTORATIVE TROCHES.

The Great substitute for Tobacco.

It is a well known and incontrovertible fact that the use of Tobacco is the principal cause of many of the most severe MENTAL AND PHYSICAL DISORDERS to which the race of man is subject, as our 25 analysis and long and painful experience have clearly proven that it contains certain narcotic and poisonous properties most dangerous in their effect, which by entering into the blood deranges the functions and operations of the system, causing many to suppose that organ to be seriously diseased.

TOBACCO affects also the entire nervous system, manifesting itself—as all who have used the nervous weed will bear testimony—in Lassitude, Nervous Irritability, Water Brash, Dyspepsia, and many other disorders of a similar character.

THE TASTE RESTORATIVE TROCHES are designed to counteract these baneful influences, and have proved completely successful in a multitude of cases, and wherever used, being harmless in themselves they exert a beneficial effect upon the entire system, restoring the Taste which has become vitiated or destroyed by great indulgence, completely removing the irritation and accompanying tickling sensation of the Throat which are always consequent upon the abstaining from the use of Tobacco, and by giving a healthful tone to the stomach invigorate the whole system.

Persons who are irrefragably undervaluing their constitutions and shortening their lives, should use these Troches immediately, and throw off the injurious and unpleasant habit of Tobacco chewing.

These Troches or Lozenges are put up in a convenient and portable form at the low price of 5 cents per box. A liberal discount to the trade. Prepared solely by the undersigned to whom all orders should be addressed.

A CARD

From Dr. James M. Jarrett, of THE NEW YORK LUNG INFIRMARY.

My connection for the past eight years with the above Institution, as Chief Physician, and a twelve year's course of steady devotion to the CURE OF

Pulmonary Consumption, and its kindred diseases, together with my unrivalled opportunities and advantages of pathological research—added not a little by a perfect system of

MEDICAL INHALATION, has enabled me to arrive at a decisive, direct and successful course of treatment for the positive, and radical cure of all diseases of the

THROAT, LUNGS AND AIR-PASSAGES.

By Inhalation the curative properties of medicines are directly addressed to the diseased organ and the Integument, I do not advise the use of Medical Inhalation of any kind, to the exclusion of GENERAL TREATMENT; and although I consider it a useful adjunct in the proper management of these fearful and often fatal diseases, yet I deem it very necessary that each patient should have the benefit of both general and local treatment. The success of my treatment in the above diseases, and the high character of the Institution over which I have so long had the honor to preside, are too well known to need any eulogy or eulogium from me. At the solicitation of many private and professional friends, through whose philanthropic aid the above charity has been long and liberally supported, and after due consideration, I have concluded to make such arrangements as will bring the benefits of my experience and treatment within the reach of all, and not confine myself as heretofore, to those only who entered the Infirmary, or who were able to visit me at my office. Hoping, therefore, that the arrangement will give entire satisfaction, both to my professional brethren and the public, I would respectfully announce in conclusion, that I can now be consulted personally or by letter, on all diseases of the throat and the lungs, the same as used in the Institution, are prepared to suit each individual case.

Inhaling Vapors, Medical INHALERS,

&c. &c., will be forwarded by express in any part of the United States or the Canada.

TERMS: My terms of treatment by letter are as follows: viz:—\$12 per month for each patient, which will include medicine sufficient for one month's use; also inhaling vapor, and an Inhaling Apparatus. Payment as follows: \$6 to be paid to Express Agent on the receipt of the box of Medicine, and the balance \$6 at the expiration of the month, if the patient be cured or is entirely satisfied with the treatment. Patients by giving a full history of their case, and their symptoms in full, can be treated as well by letter as by personal examination. Patients availing themselves of Dr. Jarrett's treatment may rely on immediate and permanent relief, as he seldom has to treat a case over thirty days. Letters for advice promptly answered. For further particulars address

JAMES M. JARRETT, M. D., No. 820 Broadway, cor. Twelfth St., N. Y. P. S.—Physicians and others visiting the city are respectfully invited to call at the Infirmary, where many interesting cases can be witnessed, and where our Improved Apparatus for the inhalation of medicated vapor can be seen and inspected.

Estate of Reed Alexander, dec'd.

Notice is hereby Given THAT Letters of Administration have been granted to the undersigned, on the Estate of Reed Alexander, deceased. All persons having business concerning the same, are hereby notified to come forward and settle immediately. WILLIAM B. ALEXANDER, and p' 1858.—6t.

Does Disease Originate in IMPURITY OF THE BLOOD.

THIS is a question of vital importance, and one which has never been satisfactorily disposed of by the professors who teach the healing art. Some maintain—and especially the old school Physicians—that life lives in the blood, and therefore all diseases originate in it;—but modern science avers that ailments have their origin in both the solids and fluids of the body. That and medical skill has clearly demonstrated that at least two thirds of the blood that human flesh is heir to, have their source in an

Impure state of the Blood!

As, for instance, in the long catalogue, such as Scrofula, Tetter, "Barber's Itch," Pimples, Blotches, Erysipelas, Ulcers, Salt-Rheum, Discharges from the Ear, Fever sores, or irruptive Diseases of any kind.

These are ascertained by well known medical laws to arise from bad blood—while the highest medical authorities declare that most fevers originate in the same manner, and more particularly Typhoid and Scarlet—the former being an internal, and the latter an external, irruptive disease; and in all persons attacked by these maladies the blood is found to be coagulated, or of a dark unhealthy color.

To ward off a large majority of diseases, as well as to cure a number which have already seized upon the system,

IT IS NECESSARY TO PURIFY THE BLOOD.

LANSDY'S IMPROVED BLOOD SEARCHER DOES NOT CLAIM TO BE A

Universal Panacea for every disease known, but the proprietors claim for it the power not only of Draining out All Impurities of the Blood,

but by the skillful combination of well known VEGETABLE REMEDIES

It will cure all diseases arising from a deranged state of the Liver—drive out Dropsy, and give renewed tone and vigor to the Stomach.

That the Blood Searcher is all that is claimed for it, the Proprietors can produce

THE PROOF:

It is only a few years since it was discovered, and yet it has grown into such a business that a large Laboratory has been built expressly for its manufacture—a large number of men employed in putting it up, and still

The Supply does not Equal the Demand!

We ask any candid man could this be so, if the Medicine did not possess ALL the virtues claimed for it?

The Proprietors have hundreds of certificates from men of probity and standing in the community, showing what the medicine is doing daily for the suffering.

ASK ANY PERSON Who has ever used the Blood Searcher

Whether Relief was Experienced. Let the afflicted give it a trial—a single bottle will convince the most skeptical of its efficacy.

Dr. J. M. Lansdy, Dear Sir—I take pleasure in acknowledging the great benefit your Improved Blood Searcher has been to my son. He has been afflicted with what physicians called a scrofulous disease of the absorbing glands of the stomach. He has been afflicted with this disease from infancy. He is now fifteen years of age; during all this time he has had several severe attacks, and all the food taken into the stomach imparted little strength to the system. I had several eminent physicians attending him, but I found very little advantage, as the disease still returned with all its usual consequences.

In April 1857, he had a violent attack, so much so, that all who saw him supposed he was in the last stage of Consumption. I was advised to try your Blood Searcher; I accordingly procured one bottle of it, and by the time he had used it he appeared restored to perfect health.

It is now one year since he used your invaluable Blood Searcher, and I am perfectly satisfied it has saved him from an untimely grave. I now unhesitatingly recommend it to all who may be similarly afflicted, and deem it no more than justice to bear this public testimony to its virtues.

Respectfully yours, &c. JAMES E. DEVLIN, Pomroy Station, A. P. R. Road. Mr. Devlin is well known to the citizens of Indiana and Westmoreland counties. July 6, 1858.
