

TRUE POETRY

A paper containing the following lines, with marks and annotations, the work of a true poet, and a true poet's heart, and who evidently thought they were specially adapted to the occasion, was sent us some time since. We have hitherto neglected to show our appreciation of the sympathy of our unknown friend, by giving them a place in our columns, but as an act of tardy justice we now lay before our readers, with the assurance that it contains truth as well as pathos.

The Printer's Consolation.

Tell me, ye winged winds,
That round my pathway play,
Is there no place on earth
Where printers get their pay?
The whispering breeze went by—
With accents filled with woe,
A voice borne on the sorrowing air,
In sadness answered "No!"

Tell me, ye flowing streams,
That smoothly glide along,
Is there no cherished place
Where printers meet no wrong?
The gentle brook replied,
In murmurs soft and low,
And winding on its verdant way,
It meekly answered "No!"

Tell me, ye murky clouds,
Now rising in the west,
Is there no spot on globe
Where printers find their rest?
The flashing clouds outspoke
With an indignant growl,
A voice that filled the Earth with awe,
In thunder answered "No!"

Tell me, hard-hearted man,
Withholding day by day,
Is there no honor in thy breast,
The printer's bill to pay?
Unanswering turns he round—
How plain his actions show—
An uttered, oath-capt sound is heard,
His actions answer, "No!"

Tell me, ye gentle nymphae,
Who bless life's hour though,
Is there no sacred shrine
Where printers get their due?
The mantling blush her cheeks suffused,
Did tenfold grace impart—
A soft responsive sigh replied,
"Tis found in woman's heart."

Tell me, angelic hosts,
Ye messengers of love,
Shall suffering printers here below
Have no redress above?
The angel band replied,
"To us is knowledge given—
Delinquents on the printer's books
Can never enter Heaven!"

Agricultural

Productive Farms.

[From the Maine Farmer.]

To a person not familiar with the statistics of English husbandry, the surprising productiveness of the lands of that country will appear incredible. Nearly nine tenths of the cultivated lands in England and Ireland are rented to tenants who pay about from four to five pounds sterling, about twenty five dollars per acre annual rent.

Where is the farmer in this country who could "live under such burdens?"

Here a farm containing from eighty to a hundred acres, is often rented for one hundred and fifty dollars, and sometimes less, and even at this rate the tenants have a hard task! The cultivation even where there is a large number of acres in grass, will little more than pay the rent and taxes. But in England the result is widely different. The tenant who there pays five pounds sterling per acre, annual rent, and finds all appliances, obtains not only means of a comfortable subsistence, but wealth, from the prosecution of a calling which here would doom him to want and destitution, and ultimately starvation, unless assisted by the town.

In 1811, Mirwin estimated the produce of one English farm of 890 acres at £2878, or \$33,000! The quantity of manure applied was 13,740 one horse cart loads in one year; and 10,250 the next!

Now admitting the rent of this farm to be \$12 per acre, and the cost of the manure and its application \$12 more, and if to those sums we add, for interest or expenses, taxes, and various contingent expenses of cultivation, &c. \$12 more, we shall find, upon striking the balance, that there will remain a profit of \$10 per acre; amounting in the gross aggregate to the sum of \$10,000 clear gain to the occupant in a single year!

In the vicinity of London a hay farm, comprising 100 acres, was rented, the rental, in this instance, was \$12 per acre; amounting in all to \$1,200 per year. A heavy expenditure was required for manure; probably as much as an American farmer would have been willing to give for the fee simple of the land, and yet the tenant succeeded, and has since become wealthy, and with no other income than the produce derived from this one farm.

In Ireland, a poor tenant had one acre of land, erected a cottage, purchased manure and farming tools, and the first year cleared all expenses and had a balance of forty dollars left. And yet that Irish peasant, in addition to the expenses and outlay above enumerated, had a church tax to pay, and be at the expense of purchasing his own seed, and maintaining a family of four besides himself and wife!

In this country we cultivate too much land. Were we to concentrate our energies upon one quarter of the soil we should derive greater profit from our labor, and instead of exhausting our farms should keep them in a condition of constant improvement. Look where we may, we find that the independent farmers—the "good livers" of the country, are, in nine cases in ten, the occupants of small farms.
