Keep up the Excitement!

DEMOVALS always cause excitement ; and It since the great excitement about the remnity generally have become somewhat excited upon hearing that C. D. Watson has deter-to pull up stakes and remove to Virginia. the latest cause for excitement is the fact the JOHN GULICH, of the borough of Clearfield, stand opposite the Court House to my new site Pa., will be prepared at all times to attend to any business in the above line on short all who may favor me with a call can be suppli-

bud in June, instead of having to cut a branch in December, Indeed the amputating of large branches is altogether abviated, and the nutriment which would have been appropriated by such, is absorbed by the branches retained.

and generally acted upon.

Trees vary so much in their habits of growth and are so susceptible to the influences of soil and climate, that no definite practical rales can be given even by the most expert, that would form a safe guide to the novice in tree culture. It is a matter of individual experience and observation ; no amount of explanatory information will convey more than the necessity for the recognition of the general principle, and that once firmly established in the mind, and the theory thorough ly understood, the cultivator will readily acquire the discriminating know ledge which alway follows practical experience and close observation.

One of the most common errors in summer pruning, and one that is also extremely injurious, is that of delaying the operation until growth has made considerable emission of shoots at certain points a se- entire traveling community. vere diminution of active foliage is the consequence. We have seen grape-vines thus treated, fallowed to proceed unchecked until the middle of July, and then a foot or more taken from the end of each shoot,] that were completely paralyzed will be supplied with the choicest wines and liand the crop a total failure, the berries quors. remaining green until overtaken by frost. It is such occurrences as the above that give rise to the many apparently conflicting statements that abound in our horti- short cultural and agricultural literature, A course of practice is undertaken without be supplied with all the comforts and convenien- Medicines and Surgical instruments, at the most a proper knowledge of the system or the cies the weary traveller could desire. when failures occur, they are seldom attributed to their proper source.

The perfection of summer pruning then, consists in checking the growth of partic- up for ular shoots without dimmishing the foliage; when the extreme point of a branch is bruised, growth will be checked without certain than this, that the welfare of the crop depends upon a full growth of heal-thy tolinge .- Farmer and Gardener,
