Clearfield, Pa., Oct. 24, 1860.

## RUSSELL'S IMPROVED

### FLEXIBLE HARROW,

Patented Jan. 17, '60.

"We need not improvement in Harrow," is a remark not unfrequently heard among farmers. Among the few improvements which have hitherto been made in this important and useful, we might say indispensable implement of husbandry, it would seem that none of them has fully met the wants of the Agriculturist. Some are too heavy, some too complicated and costly, and all liable to the objection that they are not well suited to certain kinds of ground, for while it is easy to get up a harrow that will work well on smooth, clear and level ground, it is not so easy to find one that will answer a good purpose in new ground, among stumps or on a hilly and undulating surface, but when you get one of the latter class, you may rest assured that it will also give satisfaction on a smooth surface.

The undersigned confidently believe that this object is fully attained in this improvement, and would call the attention of Practical and Scientific agriculturists to the following important features which characterize it. First, its simplicity; secondly, its strength and durability, and lastly its adaptation to any and all kinds of surface. The following named practical Farmers, of Clearfield County, who have used it this season, attest to it.

We the undersigned Farmers of Penn tps., Clearfield co., and State of Pennsylvania, having used Russell's Improved Flexible Harrow, have no hesitation in saying that it has given entire satisfaction and that from its simplicity and cheapness it should speedily come into general use.

GEORGE FULLERTON, E. W. BROOKS, S. DERRICK, B. WRIGGLESWORTH, T. DOUGHERTY, JOHN W. DERRICK, JOHN A. MURPHY, WM. A. MOORE, JOS. G. RUSSELL.

The "Scientific American," a paper which the scientific world is well acquainted speaks thus in reference to it, "The harrow is one of the most important agricultural implements, as much depends upon the top pulverizing or dressing of the soil, both before and after the seed is sown, for the success of the future crop." After describing it, it continues: "This combination harrow is so simple, that it is superfluous to extend for Harrowing either well cleared or rough ground."

The undersigned, have purchased the right to make, sell, use, and transfer their right to do the same, within the county of Clearfield, and are now prepared to furnish the article to all who wish to purchase, on reasonable terms. They will also sell individual rights to make and use the same. MERRILL & BIGLER.

Clearfield, Oct. 24, 1860.
