It transcends in its marvelous character all the feats of mesmerism and spirit-rapping. The persons who practice those occult arts confine themselves to telling you how many blades you have in your knife, how many keys on your bunch, and how much money in your breechespocket. They penetrate no deeper than your clothing and solve only the problems which lie buried in its recesses. But Mr. Bacon, and hundreds of emisaries of his kind who are wandering over the South collecting data with which Messrs. Sumner and Stevens may garnish their speeches, and the Tribune enliven its columns, scorn such vulgar mechanical tricks as these. They pass absolute judgment on the loyalty of a whole State from the testimony of the first communicative freedman or mendacious vagabond they meet within its borders.
