BEAL'S LATE POWELL'S EMBROCATION. For all diseases incident to Horses, Cattle, and Human Flesh, requiring the use of an external application. THIS new Composition, prepared by a practical Chemist, having all the medicinal virtues of each ingredient that enter into its composition, is warranted to exceed any thing of the kind ever yet offered to the Public as an external application, and is the only one which it will work its own road into the circulation of all who use it, and those who try it will find their health without fail, and therefore it is pronounced by Parry, and all who have tried it, to be the best application ever used. This Embrocation has been put up for over eight years, and it is only through the increasing demand and urgent request of my friends and the Public that I send it forth as the grand remedial agent for the various diseases to which that noble and useful animal, the horse, is subject.
