pearance upon our planet. It is one of the earliest problems that interested antiquity, and its solution took the character of a fable. Autochthones sprung from the ground, gods descen-ded from Olympus and mingled with men, stones turned to human beings. A gradual progress was traced, not from a lower to a higher scale of beof deterioration down to the hard discussion. among which we live.

Modern research upon this question takes two directions-philology and The careful study of lantheology. The careful study of language has revealed some important and China are more rivalled in these modern speculations. It must be borne tions and tribes long anterior to the dawn of even traditional history. Thus the inquiries of modern attributes are only vironed with great difficulties. One of the inquiries of modern attributes. the inquiries of modern etymologists that man is a burying animal. He in-bave led to the conclusion that the nations of modern, as well as of his-torical specient Europe, have swange torical ancient Europe, have sprung The presence of human remains, there from one common stock, the Aryan race, which originally is belief the cord monatains of Central Asia. The presence of human remains, there can be company with those of extinct animals, is no evidence of the contemporare of the Greeks, Romans, Celts, Goths, are all offshoots from this original mother stem. The languages of all these people are traceable to one common origin, not only through their roots, but also in the inhance the property of the contem. Nor are stone implements and dolmens necessarily indications of extreme antiquity. Our own Indians made stone arrows already, and too high strung at that; too ready to vibrate at a touch. Do not play upon him. Let him be also in the inhanced discovery the contemp. also in the inherent character of the languages themselves. They are all this day are accounted to the thin day are all this day are accounted to the thin day are all this day are accounted to the thin day are accoun infected tongues, that is, the derivative words are modifications of the primary, which are usually monosylmore Leader.

conquering races, we find other peo-pie who speak a tongue in no wise the Finns, the Turks, the Maygars or Hungarians, the Lapps, the Bulgarians, speak in tongues which are evidently affiliated, and their physical traits differ from those of the Arvan trace. Their languages are atyled by Twenty-four nours the day and magas.

After he is able to talk do not say and make pertroplies, and when old enough the first opens.

most the light. You can tell from it what time the sun rises and at what time the clushites, the chief nations of which were the ancient As avrians and Egyptians. They are at lied to the Bebers of North Africa and to the Copts. Thus first the study of an astronomer; but men the light of the copts. Thus first the study of an astronomer; but men o'clock. Watch closely, for the delications of races and can trace them to their gaographical cradle. But have no races disappeared before these Asiatic invaders, as the red men are even now fiding away before the white men! What was the age of the world when the first man appeared? What were his brute cotemporaries and what were his brute cotemporaries and what manner of man was he? These are questions which philology cannot an swer, and the anxious inquirer sum mous geology to his nid, to pendate a little further into the shadowy past.

At once we find ourselves in the middle of hypothoses and more with a bag of gold.

The sum of the sum of the sum of the sum of the said of hypothoses and securities.

The family to which he belongs the will walton. If the family to which he belongs the way of it as much as possible. But the family to which he belongs the way of it as much as possible. Lead him to the "green pastures" and between the sum of the way of it as much as possible. Lead him to the "green pastures" and between the men to their gaographical cradle. But have a skeleton, ghandly and grim. Around his bony neck old Father Time has his envery sum of the way of it as much as possible. Lead him to the "green pastures". The father is limited to wait was the security for the delication of the way of it as much as possible. Lead him to the "still waters." The father is limited to wait was the securi

they have compound words, yet the roots composing them retain a certain distinctness, so they seem to be as it were merely comented together.

Outside of Europe we find the Semitto races, represented by the Eastern to races t

past.

At once we find ourselves in the mids of hypotheses and speculations. Prominent among these is the theory of distinct geographical contress of distinct geographical contress of distinct geographical contress of right. The holders of this opinion point to the condition of Europe and its neighboring continents during the quaternary age. Sahara was a ground its neighboring continents during the quaternary age. Sahara was a ground its neighboring continents during the quaternary age. Sahara was a ground its neighboring continents during the patternary age. Sahara was a ground in the hardest and eye—a sort of cold are, in the hardest and eye—a sort of cold are a continuation of the Atlanh. It is all turns the hardest and eye—a sort of cold are, in the hardest and eye—a sort of cold are a continuation of the continuation of the Atlanh and eye—a sort of cold are a continuation of the Atlanh and eye—a sort of cold are a continuation of the continuation of the Atlanh and eye—a sort of cold are a continuation of the continuation of the Atlanh and eye—a sort of cold are a continuation of the continuation of the continuation of the Atlanh and eye—a sort of cold are a conti

speuts of water, the primitive races spring up, and their differences of formand language necessarily resulted from the peculiarities of climate and other extraneous circumstances. No never respect a man half so much as other extraneous circumstances. No communication could take place among these primitive races, and so Chinese, Tauranians, Aryans, Semites and Cushites had full opportunity to develope their separate characteristies unmixed with one another. To the Tauranians alone was access to Europe possible, and they could reach it only by the way of the north. From Asia it was accessed by an important the result of which was awaited with the result of which was put to me over the top over the Asia it was separated by an immense breathless interest by the entireschool ingoon, and indeed water was the breathless interest by the entireschool The teacher finally reduced the spunky dominant element of the period. It dominant element of the period. It swept along in gignatic floods, or fringed the shores with glaciers. Rushing in torrents down the sides of the shopes, as the land slowly rose through these hage seas, it gave rise to the tradition of the delage, so prevalent among the Asiatic tribes.

The remnants of the period. It swept to subject to subject to subject to subject to subject to not say full to subject to not subject to subject to not say full to subject to not subject to not subject to subject to not subje

MARY'S BEAUTY.

Where can it be, these mother, That Mary's happy the ? More silkes are my trems. And brighter are my trems. Vot children throng ground fore. And strangers peaks had graves. There's not a crivinger in the village But heres her benny face.

I know when day is breaking file such the forcet errors, And ever me returning More beautiful dicht mets. Forbage its shaded mater Some nariest characterist. And Gross who fields at court Its vistoes can obtain.

I'll his me there to merevoe,
To ver the waters had.
And wast until the cometh,
And see what she will do.
Young Ella reached the forest.
Wate yet the stars were bright;
Bet coaredly had she helden.
When Mary came in right.

She lightly crossed the streamlet.
And passed upon the spet.
Where rocks and trining branches.
Had formed a quiet gret;
Uncovarious of observers,
She knell in meskiness there,
And looking on to housen.

And looking up to heaven, Breathed furth a fervent prayer. Then rising up in gludness,
She warfuln forth a hyunn,
And hemeward bent hay fondetept
While yet the light was dim.
Forth same the softened Kils,
Nor tried the streamlet's art;
She thought not of her listares,
Ent of her string heart.

Calculating upon the basis of these geological evidences, the period of the first appearance of man upon earth is

The Spostles' Clock in Prague.

While in the market-place we will wait for the hour, for here is a curious old clock that ticked four centuries ago—when the Swedes were thundering at the gates of Prague, and when Bohemia was a great and powerful kingdom—just as it is ticking now. Twenty-four hours the day and night.

The Spostles' Clock in Prague.

While in the market-place we will wait to copy the baby, let imapproach him carefully, reverently, snug him approach him carefully, reverently, snug him approach him soothingly and sonsibly, and have a good time generally with him with lim with lingdom—just as it is ticking now. Twenty-four hours the day and night.

After he is able to talk do not say would submit those well known readers.

dropping great blocks as they melted, and after a few "h hums," felt the hat, and if so, how dus it seem to affect voyages. Then these countries rose again from the whelming wave. Mr. Lyell has vantured upon a calculation of the time required for these changes, and inquired: "Did I should has hit upon the moderate period of two hundred thousand years.

The recovered continent was a wild and savage country. Huge ferests darkend its surface, great rivers rashed him and savage country. Huge ferests darkend its surface, great rivers rashed him was brand new!"

Which was rather a tight fit. Remov. July 1. Did yu ever have the meezles, ingit from his head and taking a steady gate at the battered relic, be turned to the use of so, how many?

After answering then here a tight fit. Remov. July 1. Did yu ever have the meezles, ingit from his head and taking a steady gate at the battered relic, be turned to the use of so, how many?

After answering then here a tight fit. Remov. July 1. Did yu ever have the meezles, ingit from his head and taking a steady gate at the battered relic, be turned to the use of so, how many?

It is not to the druggist, and inquired: "Did I should be not the use of so, how many?

It is not the use of the observation that the battered relic, be turned to the use of so, how many?

It is not the confirmative, the sail, little fat old feller, with goold continued the first, "I should judge I had, for when I came into your store this d—d old hat was brand new!"

Caution.

Herean's Great Chronical Promited benefit from the use of the observation to the druggist, and inquired: "Did I should be not the mean to the use of the observation to the druggist and inquired: "Did I should be not the use of the observation to the druggist and inquired: "Did I should be not the use of the observation to the druggist and inquired: "Did I should be not the use of the observation to the One Age - Alas! for him who
