CERTIFICATE.

We, the the underrigned having witnessed the trial of T. J. Booth's Improved Stomp Extractor on the farm of K. H. Moure, near Luthersburg, on Saturday and Monday, the Ith and 9th of November, take pleasure in saying to the public, that we believe it to be the beat machine new in use for extracting stumps. It is of simple construction, easily managed, not liable to get out of order, and very durable. Four men took the machine from the wagon, when entirely apart, put it together, and pulled a large plus sump in less than one bour. We saw two men pull a large stump with ease. They use a horse, but he does his work in taking out the largest stumps, without a hard pull. Mr. Baoth, the Patentee, fully underthands putting up and hadding the machine. We would advise those in want of stomp extractors to see this one teyted before purchasing alsowhers, which they can do free of charge by calling on the Proprietors.

Its Cause—Who is to Blume for all the go into any mine constructed after however, but in sufficient strength to the fashion of the one at Avondale.

Avondale is a sweet, suggestive certainty. In this terrible chamber to by the burning debris and ashes Highes, was the inside boss, whose remarkable attitude, sitting on a pile of coal, with his head resting on his hands, and quite dead, so cruck the first gang of explorers that descended the shaft.

Standing on the track of the Lackawanna and Bloomsburg Railroad to day at noon and looking up the steep hill side at the ruins of the once flourishing coal mine of Avondate—the shattered engine bouse built of stone, the torn, twisted and scattered much shaft of the torn, twisted and scattered much shaft of the torn, twisted and scattered much shaft of the charge of being held responsible firely embers filling the motionless air.

Constructing mines.

The intense interest full in the Avendale disaster will not be lessened

Avondale disaster will not be lessened by reading the reports of the evidence elicited before Coroner Wadham's jury at Plymouth, on Saturday. The theory of the fire, which has gradually been received, viz: that the work of the shaft was ignited by the heat of the ventilating furnace is scoated by every experienced miner who was examined. There was no difference of opinion on that point, while the working of a mine with but one opening and the building of the breaker over the mouth of the shaft wore generally condemned. All the witnesses whose opinions on the point were of any opinions on the point were of any THE REPUBLICAN.

time that this recklessness of life should cease! If the wretches sent to the State Legislature prefer using to the State Legislature prefer using blackmail to doing their honest duty, is that any reason why the companies should feel themselves at liberty to disregard every means of providing against such calamities as this at Avondale. The most sensible advice that could be given the miners in the many palied their shirts off and the formace entirely safe. The opinion that the fire was not caused by the furnace in the mine is supported, not only by the experience and judgment of experts, but by positive evidence of a well-nigh conclusive character. This is found in the present the man palied their shirts off and anon some crevices being discovered the man parallel of the brettice or wooden a hoistingway, and an airway ran matter is to reject all solicitation to the cause—Who is to Blame for all the go into any mine constructed after lowever, but in sufficient strength to barricade themselves in between a space extending in a between a space extending in a the furnace entirely safe. The opin that the fire was not caused by the furnace in the fire was not caused by the furnace in the fire was not only by the experience and judgment of experts, but by positive evidence of a well-nigh conclusive character. This is found in the present the fire and anon some crevices being discovered at the fire furnace entirely safe. The opin that the fire same not only by the experience and judgment of experts, but by positive evidence of a well-nigh conclusive character. This is found in the present the fire furnace entirely safe. opward for 130 feet could have renained unburned as it now remains What could have extinguished the flames twenty feet from the bottom

the tunnel or a little below it. The tunnel referred to affords the best possible cover for incendiary opera-tions. Beginning under the lower side of the breaker it ran under that by the carriage, frequently with men aboard, and in which any applicans color of his thoughts when told that fearlif arise the meanage of the main some awenty to the surface, as strong as stone and cement, bodies of 200 human beings, a low old make it. The engine house and through which the bodies of 200 human beings, a low old make it. The engine house and through which the bodies of 200 human beings, a low life, were being brought out, one by one, black and bloody corpose out to the collective through the perfect strongly with the down and bearing many marks of a brief but of the bodies of 200 human beings as the broader. The transfer of the surface, as though the case of the surface, as though the case of the surface, as though the case of the surface, as though the surface, as though the case of the surface, as though the case of the surface, as though the case of the surface, as though the surface, as though the case of the surface, as the surface, as the surface, as though the case of the surface, as the surface, as though the case of the surface, as the surface of the surface of the surface
