CLEARFIELD, PA.

Putting of the natural teeth in a healthy, preservative and useful condition is made a specialty.

Discusses and malformatics common to the mouth, jaw and associate parts, are treated and corrected with fair success. Examinations and consultations race. Prices for partial and full sets of teeth much lower than in 1870. It would be well for patients from a distance to let us know by mall a few days before coming to the office. It is very important that children between the ages of aix and twelve years should have their teeth examined. By Amerilierix Teeth are removed without pain.
