THE COST OF LIVING. We have received a number of communications touching our last month's article on the above subject, but as the paper papers have, of late, published various individual and family experiences, the topic has somewhat lost its freshness. The resultant of the varied reports, however, establishes the assertion we then made, that the cost of living depends much on prudence and skillful management. It is by saving, as much as by making, that we grow rich. It takes five times the wit to keep that it does to make money. Take care of the pennies and the pounds will take care of themselves. These frugal maxims are, in these days of show and extravagance, very difficult to observe. They smack too much of the "Poor Richard's Almanack" and real life has become so fashionable in certain quarters to make sport of old Ben Franklin as a saving, cynical and parsimonious old Buzz Box, so his frugal, and economical life philosophy has also been brought into contempt. But there are certain, inexorable rules of amassing, which cannot be counter-acted, and those who would become wealthy, must first learn to control their desires, and say a sturdy no to the thousand temptations which beset them. If many of our young men who are so constantly bowing their heads in the dust, and boasting their want of capital, and saying they would do as they please, if only they had so-and-so's money, and opportunities, would only pay heed to these maxims, and act upon them, they would find a fine, and a fashionable, and a profitable way to the top of the mountain. It requires much resolution to withstand the multifarious temptations to spend money nowadays, but we never knew any—except envious, and discontented whiners—who were any the worse for a timely prudence and frugality. There is nothing degrading, or ungracious in economy. It is much more becoming to be able to pay than to avoid debts. Let no young man, then, be ashamed to save, as well as to work, for it is by this road come content, independence and peace of mind. Saving is a good, though it may be a difficult, habit to form, and money, and better enjoyments are indeed limited—account they are appreciated when they are hard-earned and honestly worked for, and steadily preserved through many temptations, and self-denials. Why is it you find two clerks, or mechanics, earning a thousand a year, the one independent, careless, throwing a dime here and a quarter there, and gradually harassed with small and large debts, which lead him to neglect his duties, and other careful, frugal, and abstemious, and yet cheerful and happy? In course of time you will invariably observe the latter making headway in life. He is "getting on" all say. He soon finds himself a partner, if a clerk, or a superintendent or manager, if a mechanic, or workman, then a capitalist, and finally a thrifty and successful manufacturer on his own account. Indeed, Pittsburg's self-made men made up of just such material? Pittsburg's business growth is peculiar. It is a growth within itself. We find few capitalists coming here from other cities, but still our city and her manufactures constantly grow and grow. Her business and manufacturing circles are made up of careful, saving, industrious, and prudent men, who have learned to deny their passions and pleasures; to make themselves masters of their own lives of business, and who laboriously yet steadily rise from one round to another until they stand at the very top of the ladder. If honest, plodding labor is not honored here, where should it be? If there is any other royal road to wealth, beware of it, and the destruction of morality.—Peoples Pittsburgh Monthly.

Vanality and Corruption. The New York Tribune thinks it has found a cure for vanality and corruption among the Legislators of Pennsylvania. It is to be put among the amendments to the Constitution soon to be made by our Convention.

The Weight of the Debt which the Nation Ows. We take the following interesting article from B. K. Jamison & Co's Financial Record for 1871, bankers, Philadelphia: It is a well known fact, in political as well as personal economy, that debt weighs upon whomsoever is the debtor, whether it is an individual, a city, a State or a nation, and the incubus of the weight depends upon the amount of the debt as compared with the means of the debtor.

How Washwomen turn an Honest Penny. The Washington Patriot furnishes its readers with the following pleasant bit of news: A good many of the negro washwomen of Washington "up to snuff," what ever that may mean. They have a way of making double profit of their customers. In the first place, they charge "famine prices" for washing, and if their customers do not like the charge, the independent female darkeys immediately propose to take the garments for their fee. This is one profit. After it is of a satisfactory character. If possible, those washwomen will persuade you into from six to ten day's time in which to wash and iron your clothes. The job is generally done the first day, and then the negro washwoman hires out to other darkeys such garments as they may select for a day or night's wearing. This system of hiring extends to all portions of the wardrobe of both sexes, and is carried on very extensively. A right shrewd darkey often makes in this way four or five dollars out of her washing, besides the price she receives from the party for whom it was done.
