Friends, reflect that my charges for the intertion of artificial and the saving of the natural
teeth are now the most reasonable in Pennsylvania.
Preserve your teeth and you preserve your health.
Putting of the natural teeth in a healthy, preservative and useful condition is made a specialty.
Discases and maiformations common to the mouth,
jaw and associate parts, are treated and sorrected
with fair success. Examinations and commisstions rate.

It would be well for patients from a distance to
lot me know by mail a few days before coming
to the office.

It is very important that children between the
ages of six and twelve years should have their
teeth examined.

Ancesthetion are administered and Teeth removed without pain.

Dispositions and character are judged by all
the world by the expressions of the face, hence
how very disastrous may it therefore be for purtons to indulge an expression of distorted features,
even apart from a hygienic view. Now, to colory
natural (not arrificial) comforts and pleasures,
respect and obey natural simplicities and instinct.

GREAT EXCITEMENT

The bloody contest between Prance and Prursia is at an end for the present, so far as the slaugh-tering of men and the destruction of property is concerned. The Boyal Jugglers no doubt pride themselves and rejoice over the result, but how issignificant is their work when compared with the humans and christian efforts of

who has undertaken to supply all the citizens in the lower end of the county with field and raiment at exceeding low rates from his mammoth store in MULSONBURG, where he can always be found ready to wait upon callers and supply them with Dry Goods of all Kinds.
