BY S. PORTER SHAW, D. D. S.

IMPORTANT TRUTHS

It is very important that children between the ages of six and twelve years should have their teeth examined.

Annesthetics are administered and Teeth removed without pain.

Dispositions and character are judged by all the world by the appreciations of the face, hence how very disastrous may it therefore be for persons to indulge an expression of distorted features, aven apart from a hygienic view. Now, to enjoy natural (not artificial) comforts and pleasures, respect and obey natural simplicities and instinct.
