ANOTHER STAMP ON THE "DOMESTIC"

I noticed in the Citizen of last week that Daniel Conroy, Esq., had published a card in which he said that he was the "original" inventor of the "Domestic" sewing machine.

When I saw this I was surprised, because the first, or "original," one was drawn up by Mr. Sewing Machine Co. of New York, and was made in 1846.

There being others present he called me to see about his machine, and I told him that I had only \$3 with me, and he said, "I will pay Mr. Kratzer the other two dollars myself, and give you credit for \$3 on the same." He then left. When the other agent came to see about his machine, he told me that he had bought the "Domestic" and I told him to take it back to Mr. Kratzer and I would look after it.

This was Saturday evening, July 20th. On the following Monday, August 1st, I saw Mr. Kratzer, and he brought the machine to me, and I told him that I would sell it to me on my own terms, and make a new lease for \$35, or a reduction of \$10 from the old one, and he had given me the former lease, or contract, and he had given me credit for \$5. He then made out a lease for \$30, and I told him that I would only pay \$15—\$10 less than the old one, and he told me that I could pay on my own terms, and he would look after it.

On the 22nd of August, I saw Mr. Kratzer, and he told me that he had given me the machine, and I told him that I would sell it to me on my own terms, and make a new lease for \$35, or a reduction of \$10 from the old one, and he had given me the former lease, or contract, and he had given me credit for \$5.
