MANUFACTURER OF Improved Fire and Water Proof COMPOSITION ROOFING.

HARRISBURG, PA.,

RESPECTFULLY inform the citizens of Harrisburg, Reading, Lancaster, Lebanon, and their vicinities, that we are prepared to put on roofs on most liberal terms, and at the shortest notice.

We respectfully call the attention of persons a bout to build, to our invaluable method of roofing now much used throughout the principal cities of the United States and their vicinities. This mod of roofing having all the combined requisites of chennuess, Durability, and Security against Fire and Water, and dispensing with high gable walls; the roofs require an inclination of not more than three-quarters (4) of an inch to the foot, and in many cases saving the entire cost of rafters—the

ceiling joist being used.

The gutters are made of the same material, without any extra charges; consequently, our roofs are put up at almost half the cost of either Tin, Slate, or Shingles. The material being of an imperishable nature, it surpasses all others in Durability;—besides, in case of any casualty, it is the most easily repaired of any other roof now in use. Yet, the best proof we can offer as to its being both fire and water proof, are our many re-ferences, to any one of whom we are at liberty

N. B .- But let it be distinctly understood, (since we manufacture our own composition, and do the work in person,) that we warrant all our work proof against both Fire and Water; if they prove contrary, we will most willingly abide the results. The materials being mostly non-conductors of

heat, no roof is so cool in summer, or so warm in winter. Those wishing to use our roof should give the rafters a pitch of about one inch to the foot.

affections.

Few of those who give way to this pernicious practice are, aware of the consequences, until they find the nervous system shattered, feel strange and unaccountable sensations, and vague fears in the mind. [See pages, 27, 28, 29, of Dr. K.'s book on "Self-Preservation."]

The unfortunate thus affected becomes feeble, is unable, to labor with "accustomed vigor, or to apply his mind to study; his step is tardy and weak; he is dull, irresolute, and engages even in his sports with less energy than usual.

irresolute, and engages even in his sports with less energy than usual.

If he emancipate himself before the practice has done its worst, and enter matrimony, his marriage is unfruitful, and his sense tells him that this is caused by his early follies. These are considerations which should awaken the attention of all who are similarly situated.

He who places himself under Dr. KINKELIN'S treatment, may religiously confide in his honor as a gentle man, and rely upon the assurance, that the screets of Dr. K.'s patients will never be disclosed.
