Lynching Extraordinary .- The Mil. waukie Sentinel gives an interesting lynching case which occurred recently at Geneva, in that State. Several young ladies have been in the habit of bathing in a beautiful cove formed by Geneva Lake, and nearly concealed by dense sbrubbery. Ike S----, a booby of 22, who lives with farmer G. in the capacity of 'help,' informed some of his mates that curiosities may be seen there, cheaper and better than at the circus,' and for his part, he 'would go to the and for his part, he 'would go to the data all purchasers satisfactorily, and would there-show ! This being reported to some of fore invite all who want anything in his line, to the fair ones, they resolved to give him a lesson. While some of the more juvenile members of the group made apparent preparations for the bath, a committee of full-grown feminines searched the thicket, and found Ike, placed very conveniently for peeping. To-seize and strip him was the work of a few moments, and the hazel brushes which had formed his hiding place, became rods of justice in the hands of his captors. 'Served him right.'

MANUFACTURER OF Improved Fire and Water Pro

COMPOSITION ROOFING, HARRISBURG, PA., RESPECTFULLY inform the citizens of Har-risburg, Reading, Lancaster, Lebanon, and

their vicinities, that we are prepared to put on roofs on most liberal terms, and at the shortest

notice. We respectfully call the attention of persons a-bout to build, to our invaluable method of roofing,

ow much used throughout the principal cities of the United States and their vicinitics. This mode of roofing having all the combined requisites of cheapness, Durability, and Scentry against Fire and Water, and dispensing with high gable walls; the roofs require an inclination of not more than three states and inclination of a the fact of the

three-quarters (3) of an inch to the foot, and in many cases saving the entire cost of rafters—the cciling joist being used. The gutters are mude of the same material,

without any extra charges ; consequently, our roofs are put up at almost half the cost of either Tin, Slate, or Shingles. The material being of an imperishable nature, it surpasses all others in Durability ;-besidos, in case of any casualty, it is the most easily repaired of any other roof now in use. Yet, the best proof we can offer as to its being both fire and water proof, are our many re-ferences, to any one of whom we are at liberty

to refer. N. B.—But let it be distinctly understood, (since we manufacture our own composition, and do the work in person,) that we warrant all our work proof against both Fire and Water : if they prove contrary, we will most willingly abide the

coults. The materials being mostly non-conductors of Theat, no root is so cool in summer, or so warm in winter. Those wishing to use our roof should give the rafters a pitch of about one inch to the foot.

ARE POSITIVELY CURABLE BY INHALATION 111 which conveys the neutralizes the the langs through the al. passages, and coming in direct contact with the disease, neutralizes the tubergular matter, allays the cough, causes a free and easy expectoration, heads the lungs, purifies the blood, imparts renewed vitality to the ner-vous system, giving that tone and energy so indispensa-ble for the restoration of health. To be able to state confidently that Consumption is curable by Inhalation, is to me a source of unalloyed pleasure. It is as much formidable disease : ninety out of every hundred cases second : but in the third stage it is impossible to save more than five per cent, for the lungs are so cut up by the disease as to defy medical skill. Even, however, in the last stages, inhalation affords extraordinary relief to the suffering attending this fearful scourge, which an-nually destroys ninety-five thousand persons in the U-nited States alone i and a correct calculation shows that of the present population of the earth, eighly millions are destined to fill the Consumptive's grave. Truly, the quiver of death has no arrow so fatal as Consumption. In all ages it has been the great energy of life, for it sparse neither ago nor sex, but sweeps off alike the barave, the beautiful, the graceful, and the gift-d. By the help of that Supreme Being, from whom cometh every good and perfect gift, Tam canabled to offer sumption. The first cause of tubercles is from limp ure Blood, and the immediate effect, produced by their depo-sition in the lungs, is to prevent, the free admission of air into the air cells, which causes a weakened vitality through the entire system. The inhalation of ammonin will rouse the system when fainting or apparently dead. The odor of many of the medicines is perceptible in the skin, a faw moments af-ter being inhaled, and may be immediately detected in the blood. A couvincing proof of the constitutional ef-fects of inhalation, is the fact that sickness is always pro-duced by breathing foul air. Is not this positive evi-dence that proper remedies, carefully prepared and judi-ciously administered through the lungs, should produes the most happy results I During teighteen years' prac-tice, many thousands, suffering from diseases of the lungs und throat, have been under my care, and I have effected many remarkable cures, even after the sufferes had been pronounced in the last stages, which fully sat-ifies me that Consumption is original, and founded on long experience and a thorough investigation. My perfect acquaintance with the nature of tubercles, kc, enables me to distinguish, readily, the various forms of disease that simulate consumption, and apply the proper remedies, rarely being mistaken even in a single case.— Ind microscopie discoveries, enables ine to its prover that ing from the effects of contracted chests ; to en-large the chest, purify the blood, impart to its renewed vi-tality, giving energy and tone to the entire system.
