or the week!

We respectfully call the attention of persons about to build, to our invaluable method of roofing, now much used throughout the principal cities of the United States and their vicinities. This mode of roofing having all the combined requisites of cheapness, Durability, and Security against Fire and Water, and dispensing with high gable walls; the roofs require an inclination of not more than three-quarters (‡) of an inch to the foot, and in many cases saving the entire cost of rafters—the coiling joist being used.

The gutters are made of the control of th

three-quarters (2) of an inch to the foot, and in many cases saving the entire cost of rafters—the coiling joist being used.

The gutters are made of the same material, without any extra charges; consequently, our roofs are put up at almost half the cost of either Tin, Slate, or Shingles. The material being of an imperishable nature, it surpasses all others in Durability;—besides, in case of any casualty, it is the most easily repaired of any other roof now in use. Yet, the best proof we can offer as to its being both fire and water proof, are our many references, to any one of whom we are at liberty to refer.

N. B.—But let it be distinctly understood (since we manufacture our own composition, and do the work in person,) that we warrant all our work proof against both Fire and Water; if they prove contrary, we will most willingly abide the

The materials being mostly non-conductors of heat, no roof is so cool in summer, or so warm in winter. Those wishing to use our roof should give the rafters a pitch of about one inch to the foot. [mvy 27, 1854.—4m.

TWENTY-TWO YEARS?

Experience has rendered Dr. K. a most successful practitioner in the cure of all diseases of a private nature; manhood's debility, as an impediment to marriage; nervous and sexual infirmities, diseases of the skin, and those arising from abuse of mercury.

TAKE PARTICULAR NOTICE.

There is an evil habit sometimes indulged in by boys, in solitude, often growing up with them to manhood; and which, if not reformed in due time, not only begets serious obstacles to matrimonial happiness, but gives rise to a series of protracted, insidious, and devastating affections.

ries to a series of protracted, insidious, and devastating affections.

Fow of those who give way to this pernicious practice are aware of the consequences, until they find the nervous system shattered, feel strange and unaccountable sensations, and vague fears in the mind. [See pages, 27, 28, 29, of Dr. K.'s book on "Self-Preservation."]

The unfortunate thus affected becomes feeble, is unnble to labor with accustomed vigor, or to apply his mind to study; his step is tardy and weak; he is dull, irresolute, and engages even in his sports with less energy than usual.

If he emancipate himself before the practice has done its worst, and enter matrimony, his marriage is unfruitful, and his sense tells him that this is caused by his early follies. These are considerations which should awaken the attention of all who are similarly situated.

Important Discovery. CONSUMPTION Diseases of the Lungs and Throat ARE POSITIVELY CURABLE BY INHALATION!!!

CURABLE BY INHALATION!!!

which conveys the

Remedies to the cavities in the lungs through the al.
passages, and coming in direct contact with the disease,
neutralizes the tubercular matter, allays the cough,
causes a free and easy expectoration, heals the lungs,
purifies the blood, imparts renewed vitality to the nervous system, giving that tone and energy so indispensable for the restoration of health. To be able to state
confidently that Constunction is curable by inhalation,
is to me a source of unalloyed pleasure. It is as much
interest to control of medical treatment as any other
formidable disease; ninety out of every hundred cases
can be cured in the first stages, and fifty percent in the
second; but in the third stage it is impossible to save
more than fire per cent, for the lungs are so cat up by
the disease as to defy medical skill. Even, however, in
the last stages, inhalation affords extraordinary relief to
the suffering attending this fearful scourge, which annually destroys ninety-five thousand persons in the United States alone; and a correct calculation shows that
of the present population of the earth, eighty millions
are destined to fill the Consumptive's grave.

Truly, the quiver of death has no arrow so fatal as
Consumption. In all ages it has been the great enemy
of life, for it spares neither age nor sex, but sweeps off
alike the brave, the beautiful, the graceful, and the gifted. By the help of that Supreme Being, from whom
cometh every good and perfect gift, I am enabled to offer
to the affilicted a permanent and speedy cure in Consumption. The first cause of tubercles is from Impure
Blood, and the immediate effect, produced by their deposition in the lungs, is to provent the free admission of
air into the air cells, which causes a weakened vitality
through the entire system. Then, surely, it is more rational to expect greater good from medicines entering
the cavities of the lungs, than from those administered
to the afflicted a permanent and speedy cure in Consition i

tem, so that a limb may be amputated without the slightest pain; inhaling the ordinary burning gas will destroy life in a few hours.

The inhalation of ammonia will rouse the system when fabiling or apparently dead. The odor of many of the medicines is perceptible in the skin, a few moments after being inhaled, and may be immediately detected in the blood. A convincing proof of the constitutional effects of inhalation, is the fact that sickness is always produced by breathing foul air. Is not this positive evidence that proper remedies, carefully prepared and judiciously administered through the lungs, should produce the most happy results? During eighteen years' practice, many thousands, suffering from diseases of the lungs and throat, have been under my care, and I have effected many remarkable cures, even after the sufferers had been pronounced in the last stages, which fully satisfies me that Consumption is original, and founded on long experience and a thorough investigation. By perfect acquaintance with the nature of tubercles, &c., enables me to distinguish, readily, the various forms of disease that simulate consumption, and apply the proper remedies, rarely being mistaten even in a single case.—This familiarity, in connection with certain pathological and microscopic discoveries, enables me to relieve the lungs from the effects of contracted chests; to enlarge the chest, purify the blood, impart to it renewed vitality, giving energy and tone to the entire system.

Medicines, with full directions, sent to any part of the United States and Canadas, by patients communicating their symptoms by letter. But the cure would be unreceivain if the patient should pay me a visit, which would give me an opportunity to examine the lungs and enable me to prescribe with much greater certainty—and then the cure could be effected without my seeing the patient sgain.
