ADVERTISING SUPPLEMENT.

DR. HARDMAN treats Consumption, Bronchitis, Asthma, Laryngitis, and all diseases of the Throat and Lungs by MEDICATED INHALATION, lately used in the Brompton Hospital, London. The great point in treating all human maladies is to get at the disease in a direct manner. All medicines are estimated by their action upon the organ requiring relief.—This is the important fact upon which INHALATION is based. If the Stomach is diseased, we take medicine directly into the stomach. If the Lungs are diseased, breathe or inhale medicated vapors directly into the lungs. Medicines are the antidotes to disease, and should be applied to the very seat of disease. INHALATION is the application of this principle in the treatment of diseases of the lungs, for it gives us directly access to those intricate air cells and tubes which lie out of reach of every other means of administering medicines.

In the treatment of diseases, I reject the use of all poisonous drugs and minerals. Instead of enfeebling the system, and endeavoring to reduce it so low that the disease cannot reach it, I invigorate the system and enable it to expel the disease; even the most delicate constitution, although afflicted with the most inveterate disease, will not be impaired by my treatment. Nature in her boundless bounty has provided a safe remedy for every disease to which the system is subject; and each remedy may be found in that region to which the disease is peculiar. It is to the knowledge of this fact, added to a thorough knowledge of the properties of those various remedies, that I owe my success in medicine. Thousands are annually sent to premature graves, not for the want of remedies, but for the want of proper remedies.

DR. HARDMAN has been consulted the past year by over 7000 invalids, many of whom after being given over by all other physicians are now enjoying good health. He has traveled over four years in the United States, and has doctored more than 15,000 patients, the names of the greater part being registered in books, and full notes of their cases recorded.

Among the diseases to which I have particularly devoted my attention, I

may enumerate Dropsy, Fever, Sores, Cancer, Abscesses, Scrofula, White Swellings, Diseases of the Lungs, Liver, Kidneys, or Stomach, Rheumatism, Neuralgia, Asthma, Nervous Debility, Fever and Ague, Inflammation of the Peritoneum, Inflammation of the Kidneys, Inflammation of the Womb, Inflammation of the Bladder, Inflammatory Rheumatism, Chronic Rheumatism, Mercurial Rheumatism, Gout, Eruptive Diseases, Dropsical Diseases, Dropsy of the Head or Brain, Dropsy of the Abdomen or Belly, Dropsy of the Chest, Dropsy of the Ovaria, Dropsy of the Womb, Cellular Dropsy, Dropsy of the Scrotum, Insanity or Mental Derangement, Melancholy, Epilepsy or Falling Sickness, Catelepsy, Lethargy, Fainting or Swooning, Giddiness, Delirium Tremens, Nervous Diseases, Hysterics, Hypochondria, Palsy, Vitus Dance, Cholera Morbus, Cholera of Infants, Summer Bowel Complaints, Water Brash, Convulsions or Fits, Cramp in the Stomach, Heartburn, Chronic Dysentery, Chronic Diarrhoea, Costiveness, Painter's Cholic, Spitting of Blood, Involuntary Discharges of Urine, Whites or Fluor Albus, Immoderate Flow of the Menses, Onanism, Painful and Imperfect Menstruation, Enlargement or Palpitation of the Heart, Jaundice, Heat of Urine, Headache, Worms, Gravel, Salt Rheum, Deafness, Rickets, Ring Worms, Itch, Disease of the Spine, Wakefulness, White Swellings, Rupture, Intermittent and all other forms of Fever, Inflammation of the Ear, Mumps, Quinsy or Inflammatory Sore Throat, Putrid Sore Throat, Croup, Inflammation of the Bronchia, Whooping Cough, Catarrh or Influenza, Coughs and Colds, Inflammation of the Lungs, Pneumonia, Consumption, Pleurisy, Inflammation of the Heart, Enlargement and Chronic Inflammation of the Heart, Inflammation of the Diaphragm, Inflammation of the Stomach, Inflammation of the Liver, Chronic Inflammation of the Liver, Inflammation of the Spleen, Chronic Inflammation of the Spleen, Inflammation of the Intestines or Bowels

Persons wishing to consult me in regard to the nature of these Diseases may accept the assurance that they will receive no charge for ADVICE. I

shall at all times be happy to administer relief to the afflicted, for I feel that this is my mission. I shall not imitate others by publishing forged certificates. Though I have scores of good ones in my possession, I am willing to rest my reputation on the opinion of hundreds of living witnesses.

NO CHARGE FOR CONSULTATION.

S. D. HARDMAN, M. D.

HOW TO TELL A PERSON'S AGE.

The following table will do it. Just hand the table to a lady and ask her in how many and which columns her age may be found. Then take the number at the top of the column designated, and by adding the several numbers you will discover the important secret. Thus, suppose the age to be nineteen. The lady points at the first, second, and fifth columns, at the top of which you find 1, 2, and 16; add these and you have her age, nineteen. Here is the magic table:

1st.	2d.	3d.	4th.	5th.	6th.
1	2	4	8	16	32
3	3	5	9	17	33
5	6	6	10	18	34
7	7	7	11	19	35
9	10	12	12	20	36
11	11	13	13	21	37
13	14	14	14	22	38
15	15	15	15	23	39
17	18	20	24	24	40
19	19	21	25	25	41
21	22	22	26	26	42
23	23	23	27	27	43
25	26	28	28	28	44
27	27	29	29	29	45
29	30	30	30	30	46
31	31	31	31	31	47
33	34	36	40	48	48
35	35	37	41	49	49
37	38	38	42	50	50
39	39	39	43	51	51
41	42	44	44	52	52
43	43	45	45	53	53
45	46	46	46	54	54
47	47	47	47	55	55
49	50	52	56	56	56
51	51	53	57	57	57
53	54	54	58	58	58
55	55	55	59	59	59
57	58	60	60	60	60
59	59	61	61	61	61
61	62	62	62	62	62
63	63	63	63	63	63

DR. HARDMAN was formerly Physician to Cincinnati Marine Hospital and Invalids' Retreat—Member of the London Medical Society of Observation—Author of Letters to Invalids—Editor of the "Medical Stethoscope," &c.
