In addition to this, the commanding termination of a matter so fraught with benefits or injuries to the permanency of our well beloved Constitution & Union.
The bill of the Committee of Conference admits

Kansas as a State with the Lecompton Constitution, and submits what is called the Lecompton Ordinance to the people. If the people accept that Ordinance, it gives to the state two sections of land in each township for school purposes, seventy-two sections for an university, ten sections for public buildings, twelve salt springs in the state, with six sections of land adjoining each and five per centum on the amount of sales of public lands in the State. The lands thus offered are said to be 3,000,000 of acres, and their value is stated at about \$3,000,000r If the people reject the ordinance, they must then wait until they have a population equal to the ratio of rephich now entitles each Congressional District to a representative in Congress, which the organization of an Agricultural Society. is now about 96,000, before they can come into Let all interested attend.

It does not require bribery to induce Democrats to sustain the policy of their party, but the probabilities are much stronger that bribery swayed those recreant democrats who betrayed their colors. We should like to know if their constituents elected them to Congress to vote with the Republicans? and, if they had told them before their election that they intended to do so, if they would have been elected? They could not be seen on account of the heavy clouds which preceeded the thunder storm, but their cries, resembling certain notes of the Scotch bag pipes, were heard in every direction. They are birds of passage, very swift upon their wings, and to pursue them gave origin to the expression "wild goose chase," something very unlikely to be caught. In older and superstitious times, the passage of wild geese, over a settlement was attributed to the hunt of an imaginary person in the air, styled the "everlasting hunter." Said FANS have been awarded PREMIUMS at every Agricultural Fair that they have ever been exhibited, in competition with other Mills. 8500 REWARD will be given to any person or persons who will prove to my satisfaction that what I say about my Mill is not true. FARMERS consulting their interest, will find it to their advantage to call and examine for themselves before purchasing elsewhere, as these Mills possess all the desired superior qualities, so much appreciated by Farmred superior qualities, so much appre ers: these Mills are constructed to use two Screens at on-time, which will remove all the Cheat and Cockle, one o time, which will remove all the Cheat and Cockle, one of which Screens may be removed at pleasure, if required, to suit the convenience of the persons using said Mills. All FANS manufactured and sold by me are warranted to be of good material, and all defects or imperfection in any Mill or Fan disposed of, shall be fully and effectually, repaired without extra charge. The undersigned has sold more MILLS than any other one man now living, and flatters himself on account of his long experience in the business, that his Mills are superior to any, and the easiest turning Mill now manufactured, which fact can be substantiated by many of the best Farmers in this State and elsewhere, wherever they have been tested.

JUNE APPOINTMENT! TO INVALIDS. DR. HARDMAN, Analytical Physician, and Physician

for Discases of the Lungs, formerly Physician to the Cindinnati Marine Hospital, and Invalid's Retreat, Cor-responding Member of the London Medical Society of bservation. Author of Letters to Invalids, and Editor of he "Medical Stathoscope;" may be consulted at LEBANON, PA, EAGUE HOTEL, AFTERNOON of MONDAY, JUNE 7th, and TUESDAY 8th, until noon. DR. HARDMAN TREATS CONSUMPTION, BRONDHITTS, Laryngilis, Asthma, and all Diseases of the Throat and Langes, by MEDICATED INHALATION.

The great point in the treatment of all human mallies is to get at the disease in a direct manner. All me dies is to get at the disease in a direct manner. All medicines are estimated by their action upon the organ requiring relief. This is the important fact upon which inhalation is based. If the Stomach is diseased, we take medicine directly into the Stomach. If the Lungs are diseased, breathe or inhals medicated rapors directly into them. The reason why Consumption and Diseases of the Lungs have heretofore resisted all treatment has been because they were not approached in a direct manner by medicines. They were intended to be local, and yet they were so administered that they could not act constitutionally, expending their lammediate action upon the Stomach. whilst the foul ulcers within the Lungs were unmodested. INHALATION. brings the medicine into direct contact with the disease, without the disadvantages of violent action. It application is so simple that it may be employed by the youngest infant or feeblest invalid. It does not derange the Stomach, or intenses of the
