THE WAY THE HOLLAND. ERS USE LOOKING-GLASSES.

A redriespondent of the St. Louis Democrat, writing from Holland, thus describes a use of looking-glasses very prevalent there, which very fastidious people might think it worth while to adopt in this country. We have seen some notice of this queer custom before, but never so minute an account of it:

I had not gone far in my rambles about the city before I was brought to a stand by a discovery. On both sides of the street, projecting from the centre of almost every window of the dwellinghouses, each at an angle of 45 deg. with the window, were placed two mirrors of about a foot square, each in a vertical position, one facing up street and the other down. I immediately set my Yankee ingenuity to work to "guess" their object, and was not long in discovering in these mirror's plain indication that here, in this great swamp of Europe, woman's curiosity is the same as among wordant hills and more genial climes. The mistress of the house senting herself in her parlor in a particular spot before a window with ook, needle or knitting work in hand, has but to lift her eyes into the twin looking-glasses outside ther window in order to catch at a glance the whole panorama of the streets in both directions. There was also another queer looking-glass arrangement which, for a long time, puzzled me .-The puzzle grew out of the peculiar positions and various angles at which these mirrors were placed. I was about giving it up, when, observing that their inclination was always decidedly toward the front door. I saw the whole secret as clear as light. The good lady of the house hearing the door bell ring, darts a look into this curious mirror, and thereby knows in a moment who stands at the door. Of course, when the door servant comes in, her ladyship can at once say whether she is at home or not. In all the cities of Holland nearly every dwelling house has projecting from its windows from one to ten of these ugly-looking mirrors.

#### VALUE of READING IN "OLD-EN TIMES."

In the days of Jack Cade few could read, ex cept those who were actually in orders, or educated for that purpose; so that if a person was amaigned before a temporal judge for any crime (the punishment whereof was death) he might pray his clergy; that was, to have a Latin Bible, in a black Gothic character, delivered to him and if he could read a passage where the judge appointed, which was generally in the Psalms the ordinary, or his deputy, who stood near said, ligit ut clericus, that is, he could read like a clerk or a scholar, and the criminal was acquitted as being a man of learning, who might therefore be useful to the public: if, however, he could not zead, he suffered death. This priviledge was granted in all offences, except high treason and sacrilege, until after the year 1530; and it was carried to such an extent, that if a criminal was raprieved to the subsequent assize, he might again claim this benefit, either at that time, or even under the gallows tree, and if he could then read. the was pardoned, of which there was an instance in the reign of Queen Elizabeth. Shakspear Lawyer.

Something New .- Our young men will please bear in mind that when they desire a young lady to take a walk with them that it is impolite to say "Miss, will you take a promenade this evening?" You must address her thus: "My sweet adorable, I would be exceedingly happy to have the exquisite pleasure of accompanying you on a balloon excursion this evening. 'Pon hono' I would."-To which the following answer will undoubtedly be returned: "Sir, I feel honored-your request is granted. Please meet me at the garden bars! to assist me in making an ascension over the fence -we don't use the gate any mo'-its length, balloonwise, is not of sufficient capacity to admit the crinoline without damage-'Pon hono' it is not."

SENSE .- A rough common sense pervades the following, in which there is certainly more truth than\_poetry:

"Great men never swell. It is only three cent individuals, who are salaried at the rate of two hundred dollars a year, and dine on potatoes and dried herring, who puts on airs and flashy waistcoats, swell, puff, blow, and endeavor to give them selves a consequential appearance. No discrim inating person can ever mistake the spurious for the genuine article. The difference between the two is as great as that between a bottle of vinegar and a bottle of the pure juice of the grape."

An Ohio editor recently attempted to de scribe the powerful effects of warm weather and here is one justance!

"A small negro boy injudiciously leaned up of gainst the sunny side of the house, yesterday, and fell asleep. In a few minutes he began to soften, and in three quarters of an hour he run all over the yard. His mother dipped him up in a wash

RIBDLE.-It was done when it begun, it was done when it was half done, and yet wasn't done when it was finished. Now what, was it? Of course, you can't guess. Will this do? Timothy Johnson courted Susannah Dunn. It was done whan it was begun, and it was done when it was half done, and yet it wasn't Dunn when it was finished—for it was Johnson:

OUR FRIENDS IN HEAVEN .- They are divided from us only as the root is divided from the blos som. We are yet in the ground, but they have gained the upper air, and opened into the glori ous beauty of immortal flowers.

During an examination, a medical stu dent being asked the question-"when does mor tification ensue?" answered-"When you pop the question and are answered 'No."

JOHN PETER MOYER would respectfully inform the public that he continues the business of LIMESTONE SAWING AND DRESSING by horse power, in Chestaut Street, East Lebanon: He finishes the following articles out of the best and soundest limestone that can be procured in this neighborhood, viz—Doon Sills and Plattonms, Steps, Window Sills and Heads, Chille and Door Cheeks, Cornestones, Shoe Scraper blocks, as well as any other article that can be manufactured of limestone. His Curb-stones are from four to five inches thick; and his prices in accordance with the quality.

He was the first person that introduced the lime-stone into this place, and is how propared to finish off limestone so as to give it an appearance very little inferior, to that of the handsomest Marble, in proof of which assertion he directs the public to the finished work at his establishment. He respectfully invites all those who intend erecting new buildings, to call at his satablishment and convince themselves of the excellent, finish, of his work as also of the cheapness of his prices.

# AFFLICTED READ!!!

DIHLADELPHIA MEDICAL HOUSE.—Established twenty two years ago by Dr. KINKELIN, corner of Third and Union streets. Philadelphia, Pa.

TWENTY-TWO YEARS'

Experience has rendered Dr. K. a most successful practitioner in the cure of all diseases of a private nature, manbood's debility, as an impediment to marringe; nor vous and sexual infirmities, diseases of the skin, and those arising from abuse of mercury.

TAKE PAINTICULAR NOTICE.

There is an evil labit sometimes indulged in by boys, in solitude, often growing up with them to manhood; and which, if not reformed in due time, not only begets serious obstacles to matrimonial happiness, but gives rise to a series of protracted, insidious, and devastating affections.

Faw of those who give way to this pernicious practicate aware of the consequences, until they find the nervous system shattered, feel strange and unaccountable sensations, and vague fears in the mind. [See pages, 27, 28, 20, of Dr. K.'s book on "Self-Preservation."]

The unfortunate thus affected becomes feeble, is unable to labor with accustomed vigor, or to apply his mind to study: his step is tardy and wank; he is dull, irresolute, and ongages even in his sports with less energy than usual.

If he emancipate himself before the practice has done its worst, and enter matrimony, his marriage is unfruitful and his sense tells him that this is caused by his

gy than usual.

If he emancipate himself before the practice has done its worst, and enter matrimony, his marriage is unfruitful, and his sense tells him that this is caused by his early follice. These are considerations which should awaken the attention of all who are similarly situated.

REMEMBER,

He who places himself under Dr. KINKELIN'S treatment, may religiously confide in his honor as a gentle man, and rely upon the assurance, that the secrets of Dr. K.'s patients will never he advantage of the transmander of the secrets of Dr. K.'s patients will never he advantage.

Young man—let no false modosty deter you from making your case known to one, who, from education and respectability, can certainly befriend you.

ASD Dr. KINKELIN'S residence has been for the last twenty years at the N. W. Corner of THIRD AND UNION streets, Philadelphia, Pa.

A RESISTLESS REMEDY HOLLOWAY'S OINTMENT.

HOLLOWA'S OINTMENT.

URCULAR TO THE SICK.—The first hospital surgeons and medicinal publicists of Europe admit the unparalleled anti-inflammatory and healing properties of this Gintment; governments sanction its use in their naval and military services; and the masses in this country and throughout the world repose the utmost confidence in its curative properties. It penetrates the scorress of inflammation and corruption which underlie the external evidences of disease, and neutralize the fiery elements which feed and exasperate the malady.

Rheumatism, Scrofula, Erystipelas.

These are among the most torrible and agonizing discases of the muscles, the fleshy fibro and the skin; yet in their worst forms and when seemingly incurable, they invariably disappear under a persevering application of this soothing, healing autidote to pain and inflammation.

Salt Rheum, Fever Sores, Stiff Joints.

In all cases of Sit Rheum, where medical waters, lottons, and every rejue of the pharmacopea have proved useless, the Gintment will accomplish a thorough cure. Fever Sores heal fuckly under its influence, and its relaxing effect uper contracted sinews is truly wonderful.

Discharging Ulcers.

A most Inmakable and happy change is produced in the appearance of malignant ulcers after a few applications of this dimment. The surrounding reduces vanishes, and granules of healthy flesh begin to take the place of the discharged matter. This process goes on more or less applied until the orifice is filled up with sound material, and the secr radically cured.
