NEW ENGLAND SETTLE-MENT-RARE OPPORTUNITY—TO ALL WANTING FARMS, in a healthy place, twenty-five miles from Philadelphia, on the Camden and Alhanite rallroad,—five fall, was desired, and the first division f 10,000 acres divided up into farms of twenty acres and upwards. The soil is of the lest quality for the production of fruits, grains, &c. The price is \$16 to \$20 per acre, payable in easy quarter yearly instrument, within a term of four years, with interest. The terms are made easy, in order to insure the rapid improvement of the land, by enabling every industrious munto biny a farm. It is now being extensively improved by good roads, and some of the best citizens from Mew Eugland and the Middle States are creeting large improvements. It is a seene of the greatest improvement out of Philadelphia. Seventy-five houses have been built in four months. Tractical farmers and business-men from the length and breadth of the Union are setting there. It is an important business place, on account of its being in the midst of a great market. Every article raised upon this land finds an immediate sale. The water is excellent, and no such thing as fever is known.

The soil is a sandy or clay loan, with a clay bottom and reto after of manures. It is free of stones and easily worked. It abounds largely in the phosy ares, and such is its fertility that from the cerops produced both upon this land and the large area adjoining under cultivation, it will be found not to be excelled anywhere in the production of creps most adapted to its market.

The reader may be well ware that the carliest and the best fruits and vegetables come from New Jersey, which are annually exported to the amount of millions of dol lars. The land, besides being accessible in every way for fertilizers, has an abundant supply of the best quality of muck manure.

fertilizers, has an abundant supply of the best quality of mack manure.

Lumber and building materials can be had on the spot at a cheap price, from the mills. Other mills are now being opened, and brickyards being started on the gr und. A person can put up a frame tenement for present convenience for one hundred dollars. On account of the extensive emigration, this is the best course to pursue in order to get a place to live in a first. Carpenters and builders are on hand to put up houses on the best terms in settling here the emigrant has many advantages.—

It is within a few hours' ride of the great cities in the Middle States & New England: he is near his old triends and associations; he is in a settled country, where every improvementand confort of civilization is at hand; he is in a healthy place, and is not subject to the certainty of in a healthy place, and is not subject to the certainty of losing the greater part of his family and his own health by these malignant fevers which make the graces of so

many millions of the young and hardy in far off regions away from home and friends. Besides, he has a mild climate and an open winter.

There are three trains daily to Philadelphia, and to all those who improve, the railroad company gives a free ticket.

The reader will at once be struck with the advantages here presented, and ask himself why the property has not been taken up before. The reason is, it was never thrown in the market; and unless these statements were correct, no one would be invited to examine the land before purchasing. This all are expected to lo. They will see the land under cultivation; they will unitness the improvements, and can judge of the character of the population. Persons should come prepared to purchase, as many are locating, and locations are not held on refusal.

I drew my bed against the door, and secured it otherwise, as best I could. I placed my arms in a conveniant position, of which I had a good supply-three revolvers and a large knife. I then took a sent upon the bed and patiently awaited the result of my preparations.

'I will spare your life, the my rules; I have and will the motto,—
'Dead men tell no tales.' My candle had burnt out, and I, despite all my exertions to the contrary, had become sleepy and soveral times caught myself nodding. A rustling in the corner warned me that my

'Keep quiet,' said I, 'or this knife will find the way to your heart.' In about half an hour after. I heard a gentle

'Tip, Tip, is it done?' 'Yes,' I whispered back,

'Let me in, will you!' Not yet., Well, hurry.'

'Directly.' During this time I was rapidly considering what course to take, and how to manage the affair. Should I admit this man, how could I secure him? Ah! the bed cord, why not think of that before? I instantly threw the clothes off the bed-stend and loosened the cord, and then pulled the remainder off the bed away from the

'Come in,' said I, as I opened the door. The man stepped confidently in, and as he did so, I placed the muzzle of a pistol in his face and warned him not to utter a syllable or he was a dead man. Holding the pistol in one hand, I wound the rope around his hands, until they were fast, then laying the pistol down, I securely tied his hands and feet and set him down.

In a little while I saw a light ascending and approaching the door. The same signal was given as before, when I opened the door, the landlord entered with a light. His consternation was the most ridiculous, as he beheld me with a pistol at his breast, bidding him be silent. I then tied his hands and feet, and with an admonition to keep silence, sot him on the floor.

They kept coming, and I binding them over to keep the peace, until I had six in the room, and says he belongs to the Lord Jehovah; don't know by the dim glare of the candle they presented a ludierous appearance.

After a long time the seventh man came, and when I let himein, it was my companion who traveled with me on the prairie, and who tried to

'Ha!' he exclained, starting back confounded at what he saw, 'you once escaped, but not now!' 'Yes and now,' said I, pressing my pistol close to his face, 'be quiet, or your head will be blown to atoms in a twinkling.' I secured him without any further trouble and sented him among his companions.

At length day dawned, and when the light was perfect, I took my first prisoner from his suck and tied him hand and foot, and then left them cursing and swearing at each other's cowardice, I went on to the next town, from which officers were sent out, and the gang of robbers taken to prison. But this capture broke up that gang, and if they ever commenced operations again, it was in some other locality.

POLITE TO ALL PERSONS.

"You cannot judge of a man by the coat he wears." "Hallo, Limpy, the cars will start in a minut arry up, or we shall leave you behind."

The ears were waiting at a station of one o our Western railroads. The engine was puffing naggage and checks. The men were hurrying to trunks. Men, women, and children were rushing for the cars, and hastily securing their scats, while the locomotive snorted, and puffed, and blowed.

A man carelessly dressed was standing on the him, and seemingly paid little attention to what was passing. It was easy to see that he was lame. At a hasty glance one might easily have supposed that he was a man of neither wealth nor influence. The conductor of the train gave him a contemptuous look, and slapping him familiarly self-dofence is one of the first laws of nature, I | I askel to retire, when the landlord picked up | on the shoulder, be called out-"Hallo, Limpy; better get aboard, or the cars

"We'll see about that. I shall put you out at the next station?" and he seized the valise which was on the rack over the head of our friend. "Better not be so rough, young man," return-

The conductor released the carpet bag for a moment; and seeing he could do no more then, he days ago, a well-known citizen attempted to compassed on to collect the fare from other passengers. As he stopped at a sent a few paces off, a gontleman who had heard the conversation just mentioned, looked up at the conductor, and asked

"Do you know to whom you were speaking just now ?"

"No. sir." "That was Peter Warburton, the President of "Are you sure of that, sir?" replied the con-

ductor, trying to conceal his agitation. "I know him." The color rose a little to the young man's face, but with a strong effort he controlled himself, and

went on collecting his fare as usual. Meanwhile, Mr. Warburton sat quietly in his

seat-none of those who were near him could unravel the expression of his face, nor tell what would be the next movement in the scene. And he-of what thought he? Presently the conductor came back. With a steady onergy he walked up to Mr. Warburton's side. He took his books from his pocket, the bank bills, the tickets which he had collected, and laid them in Mr. Warburton's hand. "I resign my place, sir," he said.

The President looked over the account for bis side, said-"Sit down, sir, I would like to talk with yon,"

He swallowed about two ounces and a half. As soon as the fact became known, medical aid was called in, the stomach pump, and other appliances made, but seemingly all in vain. All hope of averting death was at last given up by those in attendance. Some several hours after the occurrence, the physician of the family arrived, but too late, as was supposed, to do any good. The thought struck him, however, of testing the efficiency of artificial respiration, so successfully used of late, in cases of strangulation by water. He proceeded. immediately to work, and soon began to perceive symptoms of improvement. Encouraged, he labored on, assisted by medical gentlemen, and in the course of nine hours succeeded in restoring the unfortunate man. The intended suicide is now well. The entire success of the experiment

Who The Deuce was it?-Brown tells us of a Vermont story which, he says, is as authentic as the best of the Post anecdotes, and, certainly nothing more can be required. A respectable gentleman in Windsor county, many years ago, had the ambition to represent his town in the Legislature. Though a man of good character, and every way able enough for the office he sought he had happened as Aunt Peggy used to sav. to have "a great many winning ways to make folks hate him", and was in fact the most unpopular man in town. Going to Squire X., an influential man, who happened to be friendly to him, he laid his case before him, and asked his influence; saying that he didn't expect help without paying for it, and declared that if he could get X.'s. conductor appeared at the door of the car where influence he was sure to be elected. The 'Squire "put in his best jumps," for his man; but when the ballot box was turned, another man was declared elected. The disappointed candidate called out to know how the votes stood, and learned that he had got just three votes! "But I don't understand it." said he turning to the Squire with a chop-fallen countenance. "Nor I, either," said the Squire, "I put in my rote; you put in anoth-
