Witman sold house and lot in East Leba-'non, on the turnpike, to Jacob Gable, for \$2,100. A house and lot of John A. Borguer, on Hill wirest, Lebanon, was sold at Assigned's sale, to Goo. Borguer, for \$500.

Solomon Speck, a gentleman Laffing originally from Lebanon county, appeared in the Dauphin county court on Tuesday last, and was sontoneed to 9 months' separate confinement, at labor, in the Dauphin prison, for adultory. Solomon ! Solomon ! what a shame for an old codger like you. You disgrace the time-honored pape of Speck.

North Lebanon tp. is assessed at \$500,860. The money at interest is \$65,400, and the number of taxable acres of land 11,300.

A Rarity.—Our town was somewhat enlivened on Friday evening last by martial music in our streets. The cause thereof, we understand, was the passage by railroad of one or more Fire companies returning from the Reading Firemens' Parade.

The two tunnels between Reading and Philadelphia on the railroad are now being widened. As soon as the work is completed we learn that wide cars will be placed on the Lobanon Valley and Reading roads. This will be a comfortable improvement for the drowsy travel-

next best investments.

On Wednesday last Mr. John Stains assumed the duties of the office of Prothonotary of this county, as successor of Mr. Ebor. Mr. S. retains Mr. E. as his Deputy. Mr. Ebur has now been many years in the office, and has become so familiarized with the duties thereof, and is, withal, so obliging that to lose him ples, but its pages are by no means confined to would be a public loss.

We learn that an exchange of one half the Railroad stock, held by Lebanon in advance of the Edinburg, and its views come Borough in the Lebanon Valley Railroad, has nearest to the American standard. It devotes itbeen effected for Lebanon Borough Bonds. The solf particularly to the topics most interesting amount of Bonds now remaining outstanding is to the people, and denounces boldly and fearlessreduced to \$30,000, against which the Borough ly exclusive privileges, hereditary rights, kingly holds five hundred shares of I hiladelphia and prerogatives, and all the abuses of feudalism. Reading Rail-rood stock.

Our streets were in a horribly muddy condition last week. The consolation is that the streets of many other places, as we learn from our exchanges, were in a similar condition.

We are pleased to learn that our friends Messrs. Bubb & Umterger are still busily engaged in putting up heaters and furnaces .-The work is done by Mr. Henry Bubb, a gentleman noted for his skill in this business. The practice of some of our citizens in sending to Philadelphia for heaters and employing city mechanica to put them up, is one that cannot be too strongly condemned, especially when we have mechanics in our midst who can do the work much better, as it has been demonstrated that Mr. Bubb can do. In this, and other respects, the true policy is to encourage home industry and sustain homo mochanics.

The Reading Railroad .-- We took a trip over the Lebanon Valley and Reading Rail roads last week, (paying our fair, which proves the independence of this article,) and doing so in a quiet but observent manner noticed some matters which we commit to paper. There is evidently a wide laid scheme to oust Mr. Cullen from the Presidency of the road. Politics is one of, if not the prompting motive. To effect which we notice that anonymous articles appeared in the opposition papers last week, the figwres of which are merely placed in them for the sake of statistical appearance, but the subject matter of which is the grosest and most wicked abuse of Mr. Cullen. From one end of the road to the other we could tell a man's politics by his remarks relative to the management of the road, and the illiberality of said remarks surprised us until we tasted the "milk in the cor oa nut." The charges are, first, the decrease in the coal ton. nage; second, not permitting every body to ride free; third, the discharge of useless employees; fourth, the regulations of the road; fifth, Mr. C. being an Englishman; &c., &c. All these charges are twisted and turned and harped upon so that it was astonishing to us that men could so well make the "right appear the wrong." The decrease in the coal tonnage beyond that of 1856 should be known by every one to be owing to the decrease of business in the country since the panie of 1857. Coal operations are not such goese as "to ship coal when the market is over-stocked, o carry coal for the fun of it and merely to in-

crease their tonnage. If the "free pass" busi- | awarded to Wm. A. Batchelor stuce 1839, and over 80, | for superfine, \$5 50 @ 5 75 for extra, and \$6@ ness is reduced to the smallest possible compass, the Company is certainly the gainer thereby, and instead of censuring the President will no doubt render justice to him for his efforts in its behalf. Discharging useless employees is also for the benefit of the stockholders, and if reports are true it was high time for applying the pruning knife in this particular. From our observations, the regulations of the road which are complained of, are all just and proper; and, fifthly, that Mr. C. is an Englishman was the fault, if such it be, of his parents, for which they are no more to blame than are the parents of Allibone, the Presito him in America. On the whole we think the assaults upon the President of the Reading-road are for sinister and political purposes; are unfounded, unjust and illiberal; and that the stockholders should not only sustain him at the proper time, but should take some early action to encour The reports of Female, committees appointed to | age him to persevere in his efforts to further their interests.

tion, having received the appointment of Coun-

ty Superintendent, the following preamble and esolutions were unanimously adopted. Whereas, F. Phillips, Esq., one of our most faithful teachers and members, has been commissioned for the office of Superintendent and is

about to leave our Association as a regular member, therefore, Resolved, 1. Mr. Phillips has nobly done his part in organizing, sustaining and availing the Cornwall

Teachers' Association; 2. We regret his loss as a regular member of

our Association ; 3. What we consider loss to the District, is gain to the county; 4. We will support him to the best of our

knowledge and ability; 5. We will spare no pains in keeping up our Association, preserving union, baving attractive meetings, improving the art of teaching, and moving the ball of science in the right direction. On motion it was agreed to attend the District-Association on the 11th, after which adjourned to most at School-house No. 6, on Saturday, Dec, 18. JOHN W. HARBESON, Secretary.

The British Periodicals. L. Scott, & Co., of New York, continue to epublish the leading British Quarterlies and Blackwood's Magazine. By this arrangement the American public is enabled to obtain them for \$10, while the English people are obliged to pay \$31. It is scarcely necessary to speak of these periodicals. They contain the richest fruits of the scholarship, wit, and genius of the literary men of Great Britain, and are alike of or the intelligent reader. Their pages abound with elaborate criticisms; brilliant essays, profound speculations, and with whatever of interest may be found in science, literature, morality. and religion. While they are the acknowledged representatives of bertain principles in politics.

THE EDINBURG REVIEW, in point of age at least, is first on the list. It was established for the purpose of combating the ruling Tory power, which was carrying everything before it with a high hand. It is still conducted with much vigor and ability.

THE LONDON QUARTERLY Was established to meet this bold and daring champion on its own ground. It still represents conservative princitheir advocacy.

THE WESTMINSTER REVIEW belongs to a more liberal school of politics. Its position is a step As a literary and progressive periodical it now stands unequaled.

THE NORTH BRITISH REVIEW made its appear ance as a special advocate of evangelical religion. It was founded by Dr. Chalmers, and since his death has been under the editorial charge of Dr. Hanna, and more recently of Prof. Fra-

BLACKWOOD'S MAGAZINE every body knows to be the embodied genius of Toryism, yet its witching rhetoric, profound disquisitions, slashing yet brilliant criticisms, poetry, biography, historical and fictitious narratives, render it the most readable monthly in the world.

The American publishers of these periodicals are in the receipt of advance sheets from the British publishers, which gives additional value to these reprints, inasmuch as they can now be placed in the hands of subscribers about as soon

IMPORTANT TO FEMALES -- Dr. Cheeseman' PILLS.—The combinations of ingredients in thes Pills, is the result of a long and extensive practice; they re mild in their operation, and certain of restoring na ture to its proper channel. In every instance have the Pills proved successful. They are certain to open those obstructions to which females are liable, and bring naure into its proper channel, whereby health is restored, and the pale and deathly countenance changed to a healthy one. No female can enjoy good health unless the is regular; and whenever an obstruction takes place, whether from exposure, cold, or any other cause, the general health immediately begins to decline, and the want of such a remody has been the cause of so many consumptions among young females. Headache, pain in the side, palpitation of the heart, loathing of food, and disturbed sleep, do most always arise from the interrup tion of nature; and whenever that is the case, the Pills will invariably remedy all these evils. In all cases of nervous and spinal affections in the back and limbs, lowness of spirits, hysteries, &c. Nor are they less efficacious in the cure of Leucorrhees, commonly called the "Whites." These Pills should never be taken during pregnacy, as they would be sure to cause a miscarriage. Warranted purely Vegetable, and free from anything in jurious to life or health. The cases in which it has been successfully applied in this country alone amount to hundreds of thousands. Can any one name an instance in which it has failed? No such failure has ever been reported.
