IMPORTANT TO FEMALES.—Dr. Cheeseman's PILLS—The combinations of ingredients in these Pills, is the result of a long and extensive practice; they are mild in their operation, and certain of restoring mature to its proper channel. In every instance have the Pills proved successful. They are certain to epen those obstructions to which females are liable, and bring nature into its proper channel, whereby health is restored, and the pale and deathly countenance changed to a healthy one. No female can enjoy good health unless she is regular; and whenever an obstruction takes place, whether from exposure, cold, or any ether cause, the general health immediately begins to decline, and the want of such a remedy has heen the cause of so many consumptions among young females. Headache, pain in the side, palpitation of the heart, loathing of food, and disturbed sizen, do next always arise from the interruption of nature; and whenever that is the case, the Pills will invariably remedy all these evils. In all cases of nervous and spinal affections in the back and limbs, lowness, of spirits, hysteries, de. Nor are they less efficacions in the cure of Lencorrhoes, commonly called the "Whites." These Pills should never be taken during prégnacy, as they would be sure to cause a miscarriage, Warranted purely Vegetable, and free from anything injurious to life or health. No single establishment in the world can truthfully claim to have manufactured and sold anything like so large a number of Icaping and Moving Machines during the same time, while my experience dates back to the origin of my Machine, in 1834—having been actually and exclusively engaged in their manufacture for the last fifteen years. I am now more largely engaged in the manufacture of these Machines than ever before, and with my improvements for 1859, do not hesitafe to warrant my Machine as a Reaper, Mower, and Reaper and Mover, superjor to any other for simplicity, durability, and perfect working; and further to say, that Farme, s, who may desire it, are at liberty to work my Machine through the harvest with any other, and keep and pay for the one preferred. The josition of the Raker in my Machine (as patented) upon the majn frame, where there is great strength, and where the weight adds to the power of the Machine, is the culy right one. Other makers have to have it have that thrown in his eyes by the operation of the reel, and tein; folted over the clods by the little platform, wheel over which he rides—necessarily racking their machine to ploces. This accounts, in part, for the great durability of my Machines as compared, with others.
