THE TOMATO AS FOOD .--- Dr. Bennett, a professor of some celebrity, considers the tomate an invaluable article of dist, and ascribes to it very important medical properties :

1st. That the tomato is one of the most powerful apprients of the liver and other organs ; where calomel is indicated, it is probably one of the most

early spring, these being eaten with vinegar : hence also the taste of something sour. for lemonades, on an attack of fever. But this boing the case, is easy to see, that we nullify the good effect of fruits and berries in proportion as we cat them with sugar, or even sweet milk, or cream. If we eat them in their natural state, fresh, ripe, perfect, it is almost impossible to eut too many, to eat enough to hurt us, especially if we cat them alone, not taking any liquid with them whatever. Hence also is buttermilk or even common sour milk promotive of health in summer time. Sweet milk tends to billiousness in sedentary people, sour milk is antagonistic. The Greeks and Turks are passionately fond of sour milk. The shepherds use rennet, and the milkdealers alum to make it sour the sooner. Buttermilk acts like watermelons on the system.

We respectfully invite the attention of the public, to Dr. Ross' pure fountain Soda Water, prepared in iron fountains lined with porcelain, from the best materials, and flaworod with the choicest fruit syrups. All who desire a delicious, healthy and ice-cold beverage should call at Dr. Ross' Drug Store, opposite the Court House.

Several of the Schaefferstown Sabbath Schools, intend holding harvest home celebrations, on Saturday next. The Perseverance Sax Horn Brass Band, is expected to be on band. Wm. M. Derr, Esq., will deliver an address. The citizens of Schaefferstown, Lebanon, \$c., are respectfully invited to attend.

of recreation, we spent, last week, a day in the Coruwall Hills a Blackberrying. Accompanied by about twenty male and female friends-as pleasant a party as can be scared up between the Blue mountains and our old friend Koch-we started at break of day on our jaunt. Our vehicles were ancient, hence, respectable ones; our horses aged, hence, intelligent ; all of which were qualities of vast importance to timid and unassuming individuals, as some of the party were. The caravan, which strongly resembled a Dutch flittin, cleared the inhabited portions of the route before the good people residing along the same were through their night's sleep. The rising of the sun was a glorious sight, particularly so to those of the party unaccustomed to such scenes. The ascent to the hills was performed in a grand and somewhat boisterous manner. The atmosphere of the bright July morning was chilly in the extreme. About six o'clock we reached the top of the mountains, and shortly after the blackberrying ground. The horses were unhitched, tethered, and well supplied with onts and hay, after which we circulated ourselves in every direction, regardless of snakes, lions, tigers, and other wild animals of the forest. Being all active and daring, and berries plenty, we soon succeed, ed in filling our baskets and tiring our bodies, so that by ten o'clock we re-assembled at the camping ground. The women folks cooked the coffee, ad the cloth on the mossy hill side, and load ed it down with the best of eating that eraving stomach ever desired and received. With song and laughter, light hearts and merry faces, the provender was made to disappear alarmingly. An abundant supply, however, prevented the catastrophe of s deficiency. The patriarch of the party pre-sided with dignity over our deliberations and feasting; speeches were made, resolutions affered passed and rejected, which are of no consequence to the public; and hence, are omitted. Should public necessity at any fature period require their publication they shall be forthcoming. The may never save the Uniton, but they would create a smile. Fixings deered up, a second trip for ber-riss. In about and state fature are ? The of a deficiency. The patriarch of the party presmile. Fixings deered up, a second trip for ber-ries.
