JUST THE MAN. -The following in relation to the Presidency of the Reading Railroad is from the Borks and Schuylkill Jour-

"Since the announcement of the contemplated resignation of Mr. Cullen, from the Presidency of the Reading Railroad, a number of gentlemen have been suggested for the post. Among others we see the name of G. A. Nicolls, Esq., the able and energetic Superintendent of the Road, brought forward in this connection. Should a change be contemplated, of which we have our doubts, there is no person better qualified to succeed Mr. Cullen that Mr. Nicolls. Thoroughly conversant with the operations of the Road, and the measures necessary to insure its success, his

effective measures are taken to put a stop to them, the better. No kind of property is safe. Fruit, corn in the field or housed, chickens, provisions, wood, coal, fence rails, everything that in years past was safe in doors and out of doors, are now the spoils of a set of thieves, who thus eke out an existence. Too lazy to work, and finding that such depredations pay better than honest labor, they make it a business and have become experts therein. Hence the necessity of a counter movement to put a stop to them.

Trimming Grape Vines.—During April we had a great many letters asking "Is it too late now to trim grape vines?" We have written frequently on this subject, and really fear tiring the patience of our readers by repetition, and shall answer the question briefly. Grape vines should never be trimmed in the spring ; November is the best time. At that date they will not bleed, and by freeing the vines from its useless pertions you prevent the exhaustation of the roots by constant evaporation from the branches and consequent ascent by capilary attraction ; the wind blowing among the branches also assist this action. Compare a vine trimmed November 25th, with one alongside of it trimmed in the spring, of equal size, and invariably the November trimming will give the best results .- Mapes' Working Farmer.

> For the Advertiser. Mr. BRESLIN :- In taking a walk into the counry a few days since, I noticed particularly the ences of many outlots that from some pannels one, in others two or three, and in not a few, all the rails have been taken, and nothing left but the posts to indicate the offence committed. This is not only a loss to the owners, but it certainly does no credit to Lebanon, as it plainly shows that among its population there are some who are too lazy to work and make an honest livelihood but prefer resorting to the commission of larceny.

The taking of rails in this manner from the fences has very properly a few years ago been made by the Legislature a misdemennor, and the penalty is a severe one. After noticing during my walk the number of rails thus taken from the fences, I felt some surprise that the owners of outlots do not adopt some plan by which the offenders will be detected and brought to condign punishment. Methinks that if the owners would form themselves into an association similar to those for the detection of horse thieves the perpetrators of stealing rails from fences, and the other depredations which are said to be quite common, such as the taking of potatoes out of the ground, and Indian corn from outlots without the knowledge and consent of the owners, would not be practised to the extent as has been the case and efficient measures be speedily adopted.

MR. BEECHER ON NEWSPAPERS.—Rev. Henry Ward Beccher eays of the "item column" in the news papers, that it "is worth more than all the small fry of correspondents, with an editor elfrown into boot! Like a caravan, it stretches along its column, with packages and parcels, spicescifid gains; bits of fragrance or cunningly wrought metals, gathered from the whole world besides." This is especially true where the column contains frequent references to the garments made at the Brown Stone Clothine Hall of Rockhill & Wilson, Nos. 603 and 605 Chestnut street, above 6th, Philadelphia.

IMPORTANT TO FEMALES.—Dr. Cheeseman's PILLS.—The combinations of ingredients in these Pills, is the result of a long and extensive piacitics; they are mild in their operation, and certain of restoring nature to its proper channel. In every instance have the Pills proved successful. They are certain to open those obstructions to which females are liable, and bring nature into its proper channel, whereby health is restored, and the pale and deathly countenance changed to a healthy one. No female can enjoy good health unless sile is regular; and whenever an obstruction takes place, whether from exposure, cold, or any other cause, the general health immediately begins to decline, and the want of such a remedy has been the cause of so many consumptions among young females. Headache, pain in the side, palpitation of the heart, loathing of food, and disturbed sleep, do most always arise from the interruption of nature; and whenever that is the case, the Pills will invariably remedy all these evile: In all cases of nervous and spinal affections in the back and limbs, lowness of spirits, hysteries, &c. Nor are they less efficacious in the care of Lencorrhæs, commonly called the "Whites." These Pills should never be taken during pregnacy, as they would be sure to cause a miscarriage. Warranted parely Vegetable, and free from anything injurious to life or leath. Full and explicit directions which should be resaduaccompany each box.

Those Pills are put up in square fait boxes. Persons residing where there are no agency established, by enclosing One Dollar in a letter; prepaid, to any authorised agent can have them sent to their respective addresses by return of mail.
