How PRIZE-FIGHTERS ARE TRAINED. -The course of training to which the 'buffer' is subject is pretty much the regular routine. He rises at six o'clock regular routine. He rises at six 0 cloud in the morning, and, after swallowing a mixture of wine and raw eggs, he starts off for a seven mile walk with his train-ers. On his return he is carefully 1 ub-bed down, and puts on dry clothes,— At eight o'clock he takes his breakfast, consisting of a porterbouse steak, within the morning, and, after swallowing a consisting of a porterhouse steak, with out fat. He takes neither tea nor cof. fee, and he accompanies, his steak with bread. After breakfast he reads the news for half au hour or so, after which he starts off on another seven miles' walk. On his return he is again rub-+ bed down, and changes his clothes ; after which he exercises henself with the dumb-bells, and balls and pulleys, and punches a sand bag, which is placed in a hanging position. He sits down to dinner between twelve and one o'clock, when he again regales himself with a substantial beef steak and bread, varied occasionally with a broiled chicken, which he washes down with a solitary glass of sherry.

After dinner he starts on a third walk of about eight miles, after which he has a set-to with the glows with his trainer, and with such of hist friends as may wish to take a turn with him. At 7 o'clock 'he takes his supper, "which consists of precisely the same materials as his breakfast, eschewing tea and coffee as before. Between 8 and 9 o'clock he 'rettres 'to bed. This course of treatment tends to de-veloped and harden the muscles while it diminishes the fat, which is thereby converted into muscle. To this end, the 'baffer' is forbidden to eat anything of a greasy or sloony nature. None of of about eight miles, after which he has

DE MOTT S CHALYBEATE RATIVE RESTORATIVE SCROFULA, OR KING'S EV L, SCROFULA, OR KING'S EV L, Is a constitutional disease, a corruption of the blood hy which this fluid becomes vitlated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No or gan is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercurial disease, low living. disordered or unhealthy food, impure air, flit and flithy habits, the depressing vices, and above all, by the veneral infec-tion. Whatever be its origin, it is herefultary in the constitution, decending "from parents to children unto the third and fourth generation;" indeed, it scenes to be the rod of Him who says, "T will visit the iniquities of the fathers upon their children." The effects connicence by disposition from the blood of randinternal organs is termed tabercles; in the glands swellings, and on the surface, eruptions or sores.— This foul corruption, which genders in the blood, de-presses the enorgies of life, so that scrofulous constitu-tions not only suffer from scrofulous in their na-ture, are still rendered faul by this taint in the system. Not of the consumption which destarts the numerations finally has its origin directly in this scrofulous contan-ination; and many destructive discusses of the liver, kidneys, hrain, and, indeed, of all the organa, arise from or are aggravated by the same cause. One quarker of all our people, are scrofulous their herith is undermined by it. To cleans it from the system we must renovato the blood by an alterative medicine, and invigorate it by healthy food and exer-rise. Such a medium very in <u>AYER'S</u> Com pound Extract of SurSupa-PILLS & IRON.

both in Furope and the United States, and prescribes i their practice. The experience of thousands delly proves that no pre-aration of Iron i an be compared with it. Impurities of the blood, depression of vital energy, pale and otherwise sickly complex o is indicate its necessity in almost ev-ery conceitvable case. Innoxious in all maladies in which it has been tried, it has proved absolutely cura-tive in each of the following courfaints, ris: In Debility, Nervous Affections, Eunsciation, Dyslepsia, Constipation, Diarthea, Dysentery, Incipient Consumption, Scrofalous, Tuberenlosis, Salt Rheaum, Mismonstrantion, Whites, Chlorosis, Liver Complaints, Chronic Headaches, Rheauna tism, Intermittent Fevers, Pinples on the Face, &c. &c.

tism, Intermittent Fevers, Pimples on the Face, &c., &c. In cases of GENERAL DEB, LITY, whether the result of scale disease or of the continued diminution of ner-vous and muscular energy from chronic complaints, one trial of this restorative has proved successful to an ex-tent which no description nor written attestation would render credible. Invalids so long bed-fidden as to have become forgotten in their own neighborhood, have sud dedly renopered in the busy world as it just returned from protraefed travel in i distant land. Some very signal instances of this kind are attested of female Suf-ferers, omacinted victims of apparent marasmus, san-guincous eximustion, critical changes, and that compli-cation of nervous and dyspoptic aversion to air and ex-ercise for which the physician has no name. In NEVOUS AFPECTIONS of all kinds, and for rea-sons familiar to medical men, the operation of this prop-paration of iton must necessarily be faultary, for un-like the old exides, it is vigorously tonic, without being axciting and orer-healing; and genity, regularly aperi-ent, even in the most obstitute cises of costiveness, without ever being a gastric purgative; or judicting a disagregula scapation. It is this hatter property, among öthetfs; which makes it so remarkably effectual and permanent a remedy for *Phice*, upon which it also appears to forer a distinct day specific action, by dispessing the local tondendy which forms tipem.
