### The Corner. COUNTERFEIT COIN.

The whole construits flooded with counterfeits of gold and silver coin, and unless something is to arrest the growing evil, the rogues will soon have it all their own way. Formerly a pair scales and a battle of nitric a parr scales and a child of indice acid were all that was necessary to enable any receiver of money to de-tect the bogus coin, while an expert would separate the genuine from the counterfeit by the very touch and ring of the piece. Science and skill have changed all that; and now the experts are themselves at fault, while the common people are altogether at the mercy of the manufacturers of bo-guscoin. Up to a recent period the most dangerous fraud in circulation was acid were all that was necessary to dangerous fraud in circulation was made from a genuine die, fitted to pattern or order. dangerous fraud in circulation was strike quarter eagles, which was stol-en from the mint at New Orleans.-It bore the date of 1854, if we remember rightly; and the pieces were made of composition metal handsome-In a like of composition model in this stolen die. That was followed by the practile. That was followed by the practile of splitting the gold dollar, taking out about sixty cents of its value, and solidering the shell together again.—
Then came the sawing into the edge of a piece, generally a half or quarter additional ter eagle, cutting two-thirds of the of the way through, and afterward filling np the coin, re milling and gilding tha edge. The latest and most skilful of these frands is.perpetrated, safar as detected, chiefly with the eagle. The piece is split into three parts, or at least the two outside shells containing the impression are separated from the centre. The latter is forfeited to the operator, and

This is so well done that very few experts, outside of the two accomplished testers of coin on ployed at the office of the Assistant Treasurer, can detoct she cheat. The ten dollar piece under this management loses about \$5 50 of its gold and remains equally good for general circulation. The fact that this is done at all, and the operation continued, is proof that it is carried on upon a large scale; for the exquisitely fine machinery, and the skill and science neccessary to success, could not be profitably employed except in the conduct of an extensive business. In cases of GENERAL DEBILITY, whether the result of acute disease or **d** the continued diminution of ner-vous and muscular energy from chronic complaints, one itial of this restorative has proved successful to an ex-tent which no description nor written attestation would render credible. Invalids so long bedridden as to have become forgotten in their own neighborhood, have suc-dedly re-appeared in the busy world as if just returned from protracted travel in a distant hand. Some very signal instances of this kind are attested of female Suf-ferers, emcisted visitins of apporent marasmus, san-guineous exhaustion, critical changes, and that compli-cation of nerrous and dyspeptic aversion to air and ex-orcise for which the physicida has no name. In NERYOUS AFFECTIONS of alk inds, and for rea-sons familiar to medical men, the operation of tills prep-paration of iron must necessarily be salutary, for un-like the old oxides, it is vigorously tonic, without being exciting and over-heating; and gently: regularly aperi-ent, even in the most obstinate cases of costiveness, without ever being a gastric purgative, or inflicting a disagreeable sensation. It is this lattor property, among others, which makes it so remarkably effectual and permanent a remedy for Price, upon which it also appears to cart a distinct and specific action, by dispersing the local tondency which forms them. In unchecked DIARRHICA, even when advanced to DYSENTERY, confirmed, emaciating, and apparently malignant, the effects have been equally decisive and astolahing. In the local pains, loss of fiesh and strength, debilita-ting cough, and remittent heetic, which generally indi-cate INGIPIENT CONSUMPTION, this remedy has al-layed the alarm of friends and physicians, in several very gratifying and interesting instances. In SCIOVULOUS TUBERCULOSIS, this modicated iron has had far more than the good effect of the most cantionaly balanced preparations of iodine, without any of their well known liabilities.
