AGRICULTURAL EXHIBITIONS. AGRICULTURAL EXHIBITIONS.

No other argument ought to be required by salv good business man to induce him to become all gradients. Many persons look only to the anginium offered, and if they find it not sufficient. If large to warrant an effort to win it, they at once determine to keep their goods at home, as though the only advantage to be gained by making a handsome display, was the winning of the premiture. Now this, to our mind, is all a mistake, and particularly so in the case of manufacturers and vanders. It may be said is desirable to carry away the highest prize, but is it not equally important to have your articles brought prominent if before tens of thousands of persons who, perhaps, would nover see them in your stores and hy before tens of thousands of persons of the haps, would nover see them in your stores and factories? Where can be found a better medium for the distribution of eards, circulars, &c.?—We know to a positive certainty, that some of the best business houses in- ours and adjoining cities, best business houses in ours and adjoining cities, have been built up by a liberal patronage of Agricultural Exhibitions. What has been done, may be done again. The same amount of care—with a very slight additional expense—which most of our dealers and manufacturers expend daily upon their show windows in arranging their goods for sale or to attract attention, would make a prominent and attractive display on an exhibition pround. There it would be a speciality, while at home it is an every day affair.

ome it is an every day affair.
But there are other and equally cogent reasons But there are other and equally cogent reasons in favor of these displays. We are bound to believe that every good citizen feels a deep interest in the prosperity of fur common country. We all know, too, how much of the success of large cities depends upon the ability and disposition of the farmer to purchase. Every movement, therefore, which is calculated to build up the agricultural interest, and induce the farmer to become more liberal in his expenditures, should the agricultural interest, and induce the farmer to become more liberal in his expenditures, should meet the hearty approval and support of merobants and mere particularly of manufacturers. Now we contend, that Agricultural Exhibitions thave done more to develop the farming resources of our country generally than any other single cause, the sgricultural press expected. Their work has been done silently, gradually, but steadily and certainly. They have been the great changels through which farmers have been made famillar with the new inventions of the day, the most approved seeds, the fluest fruits, the rarget familiar with the new inventions of the day, the most approved seeds, the finest fruits, the trarest flowers, the best kind of cattle, sheep and horses, and in fact with every thing calculated to promote the interests of their profession. They have opened a new era, and have brought millions of farmers and furmer's wives and daughters in direct emisset with many of the comforts and elegandes of Me, which perhaps, but for these fairs, would have remained a sealed book to them.—With the sight of them came the desire to possess. Labor-saying implements, superior seeds, With the sight of them came the desire to possoles. Labor-saving implements, superior seeds,
choice fruits, &c., and improved stock are purchased. As a consequence, labor and expense is
lessened, and profits naturally increased. A full
purso is apt to make a man liberal, and the result
of the whole matter is, that the wife and daughters are called in to share the general prospority,
Sowing machines, plance, handsome carpets, neat
chamber and parlor furniture, labor-saving washing machines, churns, &c., the daily papers, the
weeklies and monthlies, follows as a natural consequence, and the home of the farmer is made
more comfortable and elegant, while the pockets
of the exhibitors are made more plathoric. But
it is unnecessary to pursue this subject further,
we look forward to fine displays in every section
of the country. The arguments we have offered,
apply with equal force to every agricultural exhibition wherever held.—Farmer and Gardener.

stone, for all eurs have a morted dread of a thrown stone; but on the bogs of Ireland the dogs don't care a bit if the person they are barking at pretends to pick up a stone; they know, cunning brates, there are no stones in the bogs to be picked up and thrown at them, but they act very differently if there happens to be a heap of stones anywhere handy. It is an unpleasant situation to be attacked by a dog; if you are so circumstanced, never attempt to run; try throwing a stone at him; present your hat in your hand, and when het has selzed it, hit him with a stick across the nesser fore leg. nesse or fore leg.
Anese are the most vulnerable points in a dog; These are the most vulnerable points in a dog; a blow on any other part of the head but the nose want thurt him a bit. If a dog comes up to you and growls, and won't be friendly, don't withdraw from him; put on a bold face, and stretch your hand towards him keeping it quite still; (if you withdraw it after stretching it but, he will bite you;) the dog will come up and smell the hand, and, having once done this, will be your friend for life. A chimney-aweep once made a match to fight a bull dog single-handed, armed only with his brush. He entered the arona with only with his brush. He entered the arena with his brush in one hand and a foot of bramble bush sovered with thorns in the other. The dog sprung at him; he presented the bramble bush to the animal, who seized it in his mouth, and so got hooked by the thorns on it: the chimney-sweep belaof the brush; and won the match. We learn from this that if a man is attacked by a bull dog, he should hold a stick between his hand, and pre-

A rat catcher lately teld me that he had a monkey that would be "a manch for any dog in any pit." The monkey was given a short stout stick; he watched his expertualty, aprang on the dog's back, it was fulpossible for the dog to throw him, and the menkey beat him about the head at his will. ARTICLE VI. MISSION SCHOOLS OF PHILADELPHIA At Second and York Streets, another Mission School is in active operation and the gospel is proclaimed every Sabbath to the anxious letter ers. Mr. Martin inding no suitable building rented a stable without windows or floor 500 rented a stable without windows or floor for \$60 and in it gathered on the first Sabbath \$5 children. JUDSON'S Mountain Herb Pills.

Mountain Herb Pills.

A BOVE, we present you with a perfect likeness of A Tezuco, a chief of a tribe of the strange Astec Natin, that once ruled Mexico. You will find a full account of him and his people in our Pamphlets and Almanacs—to be had gratis, from the Agents for these Pills.

The inventor and manufacturer of "Intison's Mountain Herb Pills," has spont the greater part of his life in traveling, having visited hearly every country in the world. He spent over six years among the Indians of the Rocky Mountains and of Mexico, and it was thus that the "Mountain Hern Pills" were discovered. A very interesting account of his adventures there, you will find in our Almanac and Pamphlet.

It is an established fact, that all diseases, arise from TMPURE BLOOD!

The blood is the life! and when any foreign or un healthy matter gets mixed with it, it is all at once distributed to-every organ of the body. Every netwereels the poiscon, and all the vital organs quickly complain.—The stomach will not digest the food perfectly. The liver ceases to secrete a sufficiency of bile. The action of the heart is weakened, and so the circulation is feeble. The lungs become clogged with the poisonous matter; hence, a cough—mad sil from a slight impurity at the tountain-head of life—the Blood! As it you had thrown some earth, for instance, in a pure spring, from which ran a tiny rivulet, in a few minutes the whole course of the stream becomes disturbed and discolored, As quickly does impure blood fly to every part, and leave its sting behind. All the passages become obstructed, and unless the obstruction is removed, the lamp of life soon dies out.

These pills not cally purify the blood, but regenerate all the secretions of the body; they are, therefore, unrivalled as a

These pills not only purify the blood, but regenerate all the secretions of the body; they are, therefore, univalled as a CURE FOR BILIOUS DISEASES,

Liver Complaint, Sick Headache, &c. This Anti-Bitious Medicine expels from the blood the hilden seeds of disease, and renders all the flidids and secretions pure and fluent, clearing and resuscitating the vital organs.

Plensant indeed, is it to us, that we are able to place within your reach, a medicine like the "flournaix Herm Pulls," that will pass directly to the afflicted parts, through the blood and fluids of the b.dy, and cause the sufferer to brighten with the flush of beauty and health. Judson's Pills are the Best Remedy in existence for the following complaints.

Beyol Complaints, Debility, Inward Werkness, Coughs, Rever and Ague, Liver Complaints, Colds, Female Complaints, Cowness of Spirits, Chest Diseases, Headaches, Piles, Costiveness, Indigestion, Stope and Gravel, Dyspepsia, Inflanation, towns.

Bropsy, Inflanation, towns.

GREAT FEMALE MEDICINE!

GREAT FEMALE MEDICINE! GREAT FEMALE MEDICINE!
From lies who value health, should never be without those Pills. They purify the blood, remove obstructions of all kinds, cleavase the skin of all pimples and blutches, and bring the rich color of health to the pulc check.

193. The Plants and Herbs, but which, these Pills are hade, were discovered in a very surprising way among the Tezucans, a tribe of Aberigines in Mexico. Get the Almanac of our Agent, and you will read with delight, the very interesting account it contains of the "Great Medicans" of the Astecs.

OBSERVE.—The Mountain Herb Pills are put up in a Beautiful Wrapper. Each box contains 40 pills, and Retail at 25 cents per box. All gourine, have the signature of B. L. JUDSON & CO., on each box.

An aperient and Stomachic preparation of IRON purified of Oxygen and Carborn by combustion in Hydrogen. Sanctioned by the highest Medical Authorities, both in Europe and the United States, and prescribed in their practice.

The experience of the Mands deily proves that no preparation of Iron can be compared with it. Impurities of the blood, depression of with energy, pale and otherwise sickly complexions inflicate its necessity in almost every conceivable case. Impoxious in all maladies in which it has been tried, the has proved absolutely curative in each of the following complaints, viz:

In Debility, Nervous Affections, Emaciation, Dyspepsia, Constipation, Diarrhea, Dysentery, Incipient Consumption, Scrofulous, Tuberculosis, Salt Rheum, Mismonstruation, Whites, Chlorosis, Liver Complaints, Chronic Headaches, Rheumatism, Intermittent Feyers, Pimples on the Face,

gle box of these Chalybeate Fills has often sufficed for the most habitual cases, including the attendent Coxiveness.

In unchecked DIARRHGEA, even when advanced to DYSENTERY, confirmed, emaciating, and supparently mailgnant, the effects have been equally decisive and astronabling.

In the local pains, loss of flesh and strength, debilitating cough, and remittent heatic, which generally indicate INCPIENT CONSUMPTION, this remedy has allayed the alarm of friends and physicians, in several very gratifying and interesting instances.

In SCROFULOUS TUBERCULOSIS, this medicated from has shad far more than the good effect of the most cautiously balanced preparations of fodine, without any of their well known liabilities.

The attention of females cannot be too confidently in wited to this remedy and restoration, in the cases peculiarly affecting them.

In RHEUMATISM both chronic and inflammatory—in the latter, however, more decidedly—it has been invariably well reported, both as alleviating pain and reducing the well-incomed and inflammatory—in the latter, however, more decidedly—it has been invariably well reported, both as alleviating pain and reducing the aveilings and stiffness of the loists and muscles.

In INTERMITTENT ENVERS it must necessarily be ductife the swellings and stiffness of the louis and muscles.

In INTERMITTENT FEVERS it must necessarily be a great remedy and energetic restorative, and its progress in the new settlements of the West, will probably be one of high renown and usefulness.

No remedy has ever been discovered, in the whole history of medicine, which exerts such prompt, happy, and fully restorative effects. Good appetite, nomplete digestion, mpth acquisition of acrength, with an unusual disposition for active and cheerful exercise, immediately follow its use.
