THE CORNER.

THE NEW YORK DRY GOODS SELL-ERS. The New York correspondent of the Boston Post furnishes the collowing statements in regard to the leading traders of New York city:

Claffin, Mellen & Co., are the heaviest dealers in merchandize in New-York-their yearly business exceeding that of Stewart by some three millions of dollars. Their aggregate sales swell up to the enormous figures of eleven millions annually. The per contage of not profits on this amount is, however quite small; but even at eight per cent. the sum of eight hun. dred and eighty thousand dollars must find its way into the private bank accounts of the several partners. Next, in amount of sales, comes the es tablishment of A. T. Stewart & Co. They sell eight millions a year, of which two and a half millions are disposed of at a retail, and the remainder at wholesale; \$300,000 worth of gloves alone are handled by this house. No paitry per centage is assessed upon the buyers at the Broadway marble palace. The class of goods sold is such as a ways bears a high price and a large profit. I happen to know of one instance, where a twentieth share netted one of the partners \$60,-000 in a single year, which proves the profits of that year to have been \$1,-200,000. One million dollars a year will be about the margin of excess over all expenditure. Next in the same line come the houses of Lord & Taylor, and Arnold, Constable & Co., the former of which does a business, in several stores of \$6,000,000 annually, at a profit of some \$800.000: while the latter firm enjoys a regular unchanging trade of about four and a half or five millions, which pays a yearly profit of not far from six hundred thousand dollars.

Of houses in the dry goods trade, whose yearly trade ranges from five to seven millions, there are several, as for instance C. W. & J. T. Moore & .Co., Phelps, Bliss & Co., and S. B. Crittenden & Co. Their profits foot up variously from two to four hundred thousand dollars. J. R. Jaffray & Sons, our leading lace house, sell enough of that strictly female fabric to not them six hundred thousand delars a year profit. Some of the Boston branches located here, exceed in their sales five millions yearly.
Such are A. & A. Lawrence & Co., J. W. Paige & Co., and A. F. Skinner & Co. The first-named firm, as every one knows, sell some ton million dollars worth of domestic fabrics per year. The profits of all those commission shouses are only from one to two per cent. The sales. Gardner Co., a commission firm, sell between eight and nine millions per year at paying rates; while, of those doing a dry goods commission business of from three to five millions, may be named Hoyt, Spragues & Co., Low, Harriman & Co., and Hunt, Tillinghast & Co. Their profits overleap a hundred thousand dollars a year. There are several French and English importing houses whose sales overrun into the millions and whose profits are a fortune every year.

In cases of GENERAL DEBILITY, whether the result of acute disease of of the continued diminution of nervous and muscular energy from chronic complaints, one rital of this restorative has proved successful to an extent which no description, nor written uttestation would render credible. Invalids so long bed ridden as to have become forgotten in their own neighborhood; have and dedly re-appeared in the busy world as if just returned from protracted trayel in a distant land. Some very signal instances of this kind are attested of female Sufferers, emacinted victims of apparent marsamas, sanguineous exhaustion, critical changes, and that complication of nervous and dyspetic aversion to air and exorcise for which the physician has no name.

In NERVOUS AFFEOTIONS of all kinds, and for reasons familiar to medical men, the operation of this prepparation of iron must necessarily be salutary, for unlike the old oxides, it is vigorously tonic, without being exciting and over-heating; and gently regularly aperture, even in the most, obstinate cases of costireness, without ever-heing a gustric purgative, or inflicting a

In the local pains, loss of flesh and strength, debilitating cough, and resulttent bectio, which generally indicate INUIPLENT CONSUMPTION, this remedy has alleged the alarm of friends and physicians, in several very gratifying and interesting instances.

In SCROFULOUS TUBERCULOSIS, this medicated iron has had far more than the good effect of the most cautiously balanced preparations of lodine, without any of their well known liabilities.
