

THE LITTLE ONES.

THE LITTLE ONES. Do you ever think how much work a child does in a day?— How from sunrise to sunset, the dear little feet patter around—to us—so aimlessly. Climbing up here, kneel-ing down there, running to another place, but never still. Twisting and turning, and reaching and doubling, as if testing overy bone or muscle for fature uses. It is very curious for watch it. One who does so may well understand the deep breathing of the roav little sleeper, as with one arm roay little sleeper, as with one arm tossed over its curly head, it prepares for next day's gymnastics. Tiroless through the day, till that time comes, as the maternal love that accommo. dates itself, hour after hour, to its thousand wants and caprices, real or fancied.

A busy creature is a little child .-To be looked on with awe as well as delight, as its clear eye looks trust delight, as its clear eye looks trust ingly into faces that to God and man have essayed to wear a mask. As it sits down in its little chair to ponder, precociously, over the white lie you thought it "funny" to tell it. As ris-thought it "funny" to tell it. As risthought it "funny" to tell it. As ris-ing and leaning on your knees it says, thoughtfully, in a tone that should provoke a tear, not a smile—"If I don't believe it." A lovely and yot a foarful thing is that little child. foarful thing is that little child.

Dyspepsia, Jaundice,

If is an established fact, that all diseases arise from IMPURE BLOOD! The blood is the life! and when any foreign or un healthy matter gets mixed with it, it is all at once dis-tributed to every organ of the body. Every nerve feels the poisen, and all the vital organs quickly complain.— The stomach will not digest the food perfoctly. The liver ceases to secrete a sufficiency of bile. The action of the heart is weakened, and so the circulation is fac-ble. The lungs become clogged with the poisonous mat-ter; hence, a cough—and all from a slight impurity at the fountain-bead of life—the Blood! As if you had thrown some earth, for instance. In a pure spring, from which run a tiny rivulet, in a few minutes the whole course of the stream becomes disturbed and discolored. As quickly does inpure blood fly to every part, and leave its sting behind. All the passages become ob-structed, and unless the obstruction is removed, the hamp of life soon dies out. These pills not only purify the blood, but regenerate all the secretions of the body; they are, therefore, un-rivalled as a CURE FOR BILIOUIS DISEASES
