HOW TO GROW CAULIFLOWER AND CAPE BROC-How to GROW CAULTLOWER AND CAPE BRC-coll.--Many farmers say they cannot grow cau-liflowers and cape broccoli. I will give you my way, as I have not failed to grow a good crop for twenty years on a candy, gravelly soil, giving them the same cultivation that I do my cabbage. About the 1st of May I saw the large English cauliflower seed in the bed previously prepared, together with my broccoli and cabbage. When the plants are about three or four inches high, I transplant out into my grounds prepared for brocthe plants are about three or four inches high, I transplant out into my grounds propared for broc-well and cabbage. In setting, I water immedi-'atshy with liquor guana, or in case I have no guana, I take about half a bushel of hen manure and put 'it in a barrel, and fill up with 'soap suds after washing, and dish slops, giving 'each plant about half a pint each. I stir the earth around the plants at least once a week giv-ing each about one gill of the liquid as prepared. As soon as the cauliflowers and broccoli begin to show heads. I draw the larva from the opposite show heads, I draw the leaves from the opposit sides of the plant, crossing the tucking one over the other, so as to make them fast. This covers the heads from the bot sun, and blanches them so they are much more delicate and tender than when left to grow natural. I had them the pre-ent season early in August weighing from six to nine pounds when divested o; their leaves.

A QUEER FROG .- On the island of False river found a frog whose peculiarities we believe we hitherto escaped the attention of naturalists. It is the "egg frog," from its great hankering af-ter "hen fruit," and is a great nuisance to farmers in consequence. Being unable to break the shell of the egg, it is swallowed whole, after which the frog climbs a tree and then precipitates it self to the ground. The fall breaks the shell, and the frog spits it out piece by piece. Queer frog !--Baton Rogue Sugar Plunter.

THE undersigned having purchased the entire establishment of A.
