PARTICULARS OF THE DEATH OF JOHN A. WASHINGTON.

A correspondent, writing from Cheat Mountain, says: "I send you the news of the death of John A. Washington, who was killed yesterday afternoon, about seven miles south of Elkwater Camp. The circumstances are as follows: In company with three other officers, he was approaching our fortifications with a view of making reconnoissances. Secreted in a bush by the roadside were a number of the Seventeenth Indiana regiment, and as Wash-Ington and his companions came up the road, the Indiana boys arose from their place of concealment and fired. Washington fell from his horse on the first round having received three bullets, two of which passed entirely through the body, entering at the right breast, and one of the quartette was also hit, but the two remaining unhurt managed to get him away by supporting him on his horse. The budy of Washington was conveyed to the quarters of Col. Waggoner. He lived for the space of half an hour, and never spoke gave to utter once, 'O, my God!' The next day his body was sent to the Confederate camp und r a flug of truce. In the pockets of Washington were found one hundred dollars in United States gold currency and a splendid gold wach. His dress was new and of the most elegant make, broadcloth coat and pants, and a white satin vest. His shou der straps denote him to be a Col.-in one of the Vir-

ginia regiments, I suppose."

This place, having been selected by the Government for the safe keeping of its political prisoners, has been quite an important post. Heretofore it has been but little known to the country. There are now between fifly and one hundred men confined within its walls.

The Fort is built in a isolated position, on a shoal or a small island in the nar rows, about seven miles below New York and about four hundred yards from the shore. Fort Hamilton is also near it, on the sea shore. The shape of the Fort is quadrangular, with the angles pointing to the sea and bay and either shore, diamond wise. Facing Fort Hamilton are two tiers of heavy cannon, in bomb proof casemates. On this side, which is less protected than the others, appear to be barracks for the troops, and other necessary buildings, the roofs of which are seen rising above the walls of the Fort. There are consequently no barbette guns here.— This part of the Fort, however, is completely commanded by Fort Hamilton, opposite which is the sally port in one of the

On the other side guns are mounted on barbette, in addition to the heavy casement guns below. In fact, the entire structure, whatever may be said of its capacity as a defence against foreign invation, seems to be more than sufficiently strong to keep in security as many State prisoners as are likely to be put in it. It would sorely puzzle Jack Shephard or Baron Trenck themselves, were these worthles alive and confined in Fort Lafayette, to make their way out of that stronghold, surrounded as they would be by granite walls, with sea washing their base on every side.
