WEIGHT OF CANNON BALLS.—It is not generally known or recollected that the weight of spheres or balls does not increase proportionally with their diameter but much more rapidly-or that the weight of a ball of 6 inches diameter is not double but eight times as great as that of a ball three inches in diameter, but so it is. We are, therefore, strongly inclined to the opinion that balls of 20 inch diameter (the introduction of which has recently been suggested) would be rendered of little use by their weight alone, without taking into consideration that of the cannon large enough to propel them. Assuming the specific gravity of cast

tilled water, and that the balls are perfect spheres,—their weight will be as follows in pounds and tenths: Weight. Inc. 37 pounds. 9. 8.7 " 10. 11. 29.4 " 12. Weight. 99.4 pounds 136.3 "

Your Pills are the prince of purges. Their excellent qualities surpuss any cathartic we possess. They are mild, but very cartain and effectual in their action on the bowels, which makes them invaluable to us in the daily treatment of disease.

From Dr. Theodore Bell, of New York City.

Not only are your Pills admirably adapted to their purpose as an aperient, but I find their beneficial effects upon the Liver very marked indeed.
