## THE CORNER.

The following touching literary composition was discovered among the trophies captured by our forces at Manassas. It is said to be the eleverest among the fugitive poems found at that point, and, as a specimen of Southern literature, it is worthy of preservation : A SOJERS REFRAIN

PULL ARMSTRONG, PULL ADMIRALTY. A PROBABLE CHRONOLOGY.

1860. Mr. Armstrong, of Newcastle-upon-Tyne, invents rifled ordnance that will knock any ship to pleass. He is knighted and the Admiralty is benighted.

1861. The Admiralty recovers, and invents iron ships that resist any known cannon-balls. 1862. Sir William Armstrong invents a gun that smashes the iron ships into backsmither-

cons. The Admiralty collapses. 1863. The Admiralty re-expands and invents

plating ships fastened with diamond cement, and Sir William Armstrong's balls fly to pieces like bons-bons. Mr. Gladstone doubles the income tax.

1864 Sir William Armstrong invents brazer thunderbolts (supposed to be the original Jupiters), and in a pleasing experiment sends the greater part of the British fleet to the bottom of the sea.

1865. The Admiralty invents torpedo vessels which shall sail under water, and below any range of guns. Sir William Armstrong tears his hair and swears in the Newcastle dialect.

1866. Sir William Armstrong invents a vertical gun that discharges Greek fire straight down. and a second time he destroys the greater part of the British fleet. The Lords of the Admiralty were about to hang themselves, when a thought strikes them, and they don't.

Mr. Gladstone again doubles the income tax. 1867. Dr. Cumming, who has for some weeks heen heaving in his coals by the sack only, anddealy proclaims the Millennium. As there is now to be peace everywhere, the Admiralty does not invent anything, but waits to see.

In order to test Dr. Cumming's veracity, an to find out whether lions will lie down with kids. the Zoological Society (against the advice of their excellent secretary, Mr. Sclater) lets loose their biggest lion while a charity school is in the gardens. As the lion, instead of lying down with a kid, only lies down to digest him, the Admiralty thinks there is some mistake somewhere, and determines to invent a new fleet.

Mr. Gladstone once more doubles the incom fax.

1868. The Admiralty invents a stone fleet, with cork keels, and defies Sir William Armstrong. 1869. Sir William Armstrong invents the Han-

nibal, or Alp-shell, which contains the strongest vinegar, and melts the stone ships. Having for the third time destroyed the British fleet, he is

raised to the peerage of Lord Bomb. 1870. The Admiralty invents an aerial fleet, which sails in the clouds, out of shot range, and

the first Lord takes a double sight at Sir William Armstrong. Mr. Gladstone a fourth time doubles the in-

come tax. 1871. Lord Bomb invents a balleon battering train, and in an experimental discharge brings down all the British fleet into the German Ocean. 1872. The Admiralty, in desperation, invents a subterranean fleet, which is to be conveyed by tunnels to all the colonies, but Mr. Gladstone blandly suggests that as everybody now pays twice his income in taxes, the people may object to further imposts unless some proof of economy is given.

me The negroes from the near counties of Maryland steal their masters' stock and wagons to come into Baltimore, and parties in Maryland have frequently stopped them to search the wagons for "contrabands." A negro driving a wagon to town a few days ago, was thus stopped, when he said : "No use looking in this wagon, massa; I han't got any concubines dar."

SIGN OF A GOOD OX .- You should stand before him and he sure he has a fine hazel eye, large nostrils, broad at and above the eyes, rather slim horns, toes straight out before him, straight in the knees, bosom full, back straight, and wide hips. If you find these points, you need not ask of what breed he is, but if you want one buy him. A black eyed ox is not to be depended on, as be will kick and be ugly, while a short headad ox will start from the whip, but will soon forget it.

THIS valuable preparation, freed of all the com-mon components, such as Opiatos, or Expectorants, which not only run down the system, but destroy all chance of cure, will be found on trial to possess the fol-lowing properties, and to which the most valuable testi-monials may be found in the pamphlets. For whooping Cough, and as a Sooking Syrup, it meets every want, and by early use will save the largest proportion of ruptures in children which can be traced to Whooping Cough. In ordinary Coughs and Bronchist Complaints, the forerunners of Consumption, its splendid tonic proper-ties make it not only the most perfect enemy to disease, but builds up and sustains the system against recur-rence of the Complaint. No nursery should be without it, nor should parents fail to get a pamphlet, to be found with all dealers, as the only way to do justice to its value.
