It must be borne in mind, however, that all stones marked on the north side, on which the sun does not shine, are much more readily cleansed than such as look to the south, east or west, as the light of the sun has a tendency to deepen the stain of the caustic, and burn it more deeply into

the stone : Take of Iodidc of Potassium, half an ounce ; Bromide of Potassium, half a drachm ; Distilled Rain Water, half a fluid ounce; mix.

Apply this solution carefully with a camel's hair pencil over all the blackened, portion of ithe stone : being careful that it does not run." Let it dry, and give the light time to exercise its bleaching effect upon it. If not entirely gone by the next day, apply again in the same way, and so on, until all traces of the disfigurement are removed. Then wash the entire surface with fine scap and plenty of rain water, and dry with a soft eloth.

The longer the application is delayed, the more difficult of removal will be the stains Having tried the experiment myself on severa ments. I can youch for the success of the suggestion, if the directions are carefully fol-

On white painted wood work the remedy will not answer so well, producing the iodide of lead, of an intensely yellow color, and quite as un of an intensely yenow color, and sught to be re-sightly as the stain which is sought to be re-moved. B. F. SCHNECK.
