our Advertising columns.\_\_ For the Advertiser. Cornwall Tr., Dec. 4th, 1863. Ma. Entron: During my peregrinations, a few weeks since, through Cornwall, so renowned in the history of Lebanon county for its ore banks and its rapid strides in the march of education, I learned through a friend with whom I had de-I learned through a friend with whom I had decided to spend the evening, that a spelling school was to be held in the neighborhood, and as the proceedings were rather spicy, I concluded to furnish you with them. Wending my way to the spelling school, I soon halted before the door of "Farview." Stepping in, I found the whole genealogy of Adam represented,—a crowded house, and a perfect furore going on. I perceived that all were in high expectations, and, on inquiry, learned that eloquent speakers of the literati of Lebanon, and several other "extinguished" speakers were expected to be present. Hark! the rumbling wheels of a carriage are heard, and ho! they come! the Greek! the Greek! Making my exit from the room, I beneld a carriage loaded down with the expected speakers. One of them had charge of a lamp, (a symbol of light) another of what appeared to be a large box. (apparently full of provisions for a grand lunch, in case the speaking continue too long,) but to my surprise, it was a melodeon. After the arrival of several other delegations, the exercises opened, the tancher leading off with a flaming salutatory importuning "all to conduct themselves like bu man beings!" Next comes hausic on the melode-on, and the manner in which the would be Siren who officiated, and bellows blowers, acquitted themselves, seemed as though they were deter-mined to ontyje the nightingale in her most enchanting strains. A spelling match was now an nounced, and though all defended themselves gallantly against the assaults of crooked words, e "big guns" were finally taken off their pins. The first speaker was introduced, and after souring in lofty, regions high, by which he bordered on a blending of the comedean and tragedian, he came to a dead halt. The theories of Socrates and Plato all went down before the ponderous force of his beaven soaring, sea-exploring, transcendental, philosophical logic! Speaker number two followed, and as he entreated all to give special attention to his remarks, I expected to hear a speech that would do credit to a Demosthenes, yet I am unable to say "which horse he rode." Music, after which the third speaker endeavored to show that education does not increase crime, but as quite a number "couldn't see it," I fear that was what is styled "love's labor lost." Another contest in spolling, after which a half-Dutch speaker made his appearance, (with a bow that would put to blush a city dandy,) and opened by giving a dissertation on "reaben soup!"—
Had Webster been present he would have gone in ecstasies to hear how his dictionary takes.—
Music, in which the whole school joined, doing remarkably well: and yet another speaker, who dourished considerable moustache. He attempted to compare schools as they used to be with our public schools, and labored hard to make it appear that the balance is in favor of the present system, as though we were too ignorant to know what he just discovered. Though I feel like complimenting the speakers, I would advise them hereafter to come prepared, if they design en-lightening us country folks, who know nothing about "grammar and geography." The teacher delivered the closing address, thus boring us with only seven speeches in one evening. In conclu-tion, I think the pupils of "Farview" are doing well, and the patrons may feel satisfied that they we procured the services of their enterprising EUREKA.

Nancy, where are you going, that you are in such a burry?

ANSWEE.—Why we are just on our way to Daily's Photograph Gallery, to have our pictures taken. He takes eplendid pictures, and his Gallery is nearly all the time crowded, so I said to Nancy we will go early this morning before any body else g ets there, or we will have to come away again without getting any.

Quest.—Yes! I have heard too that Daily's Gallery is nearly all the time crowded, and so why don't you go to some other Gallery?

ANS.—Oh my! we could not think of such a thing—We admire the true and beautiful picture that Daily takes, so much that we would not go to another Gallery if we could get them for nothing. He has seven years, experience in the business, hace a complete set of improved instruments, an excellint sky-light, and there fore takes the bost pictures n town, and so of course every body that wants a good picture goes to him. gloomy apprehensions which are being continu ally conjured up by those who are disposed to exaggerate the extent of the calamity occasioned by our rebellion. A reference to the state of most of the prosperous nations of the old world clearly disproves such a position, and shows that the highest conditions of pational advancement ed wars in which those nations have been immemorially engaged, and that a heavy national
indebtness has not proved an unmitigated evil.

"For instance, Grent Britian, France and the
Netherlands will undoubtedly be conceded to
represent the highest prosperity that has been
attained by any of the European nations. And
yet no nations have been called upon to endure
figures or more prolonged wars demestic and

fiercer or more prolonged wars, domestic and foreign, than they. The effect has been unquestionably, to incur an enormous national indebtness; but neither their wars nor their indebtness have had the effect to distroy their elasticity, nor promounced more truinful and life like than some that have been taken in our large cities. His Ambrotypes are beautiful, and can't be beat. He also excels in copying pictures from small Daguerrootypes, and enlarging them almost to any size.

QUEST.—Where is this Gallery? I must give him a call ton The result would have been different, probably, if these nations had been falling into decay, instead of being, as they really were, in a state of development; and in this respect their case resembles our own, with enormous advantages in our favor. These nations, while undergoing the

# U. S. 5-20'S

THE Secretary of the Treasury has not yet given notice of any intention to withdraw this popular Loan from Sale at Par, and until ten days notice is given, the undersigned, as "GENERAL SUBSCRIPTION AGENT," will continue to supply the public. the public.

The whole amount of the Loan authorized is Five Hundred Millions of Dollars. NEARLY FOUR HUNDRED MILLIONS HAVE BEEN ALREADY SUBSCRIBED FOR AND PAID INTO THE TREASURY, SCRIBED FOR AND PAID INTO THE TREASURY, mostly within the last seven months. The large demand from abroad, and the rapidly increasing home demand for use as the basis for circulation by National Banking Associations now organizing in all parts of the country, will, in a very short periodicalsorb the balance. Sales have lately ranged from ten to fitteen millions weekly, frequently exceeding three millions daily, and as it is well known that the Secretary of the Treasury has ample and unfailing resources in the Duties on Imports and Internal Revenues, and in the issue of the Interest bearing Logal Tender Treasury Notes, it is almost a certainty that he will not find it necessary. For a long time to come, to seek a market for any other long or permanent Loans. THE INTEREET AND PRINCIPAL OF WHICH ARE PAYABLE IN GOLD.

IN GOLD.

Prudence and self interest must force the minds of those contemplating the formation of National Banking Associations, as well as the minds of all who have idle money on their hands, to the prompt conclusion that they should lose no time in subscribing to this most popular Loan. It will soon be beyond their reach and advance to a handsome premium, as was the result with the "Seven Thirty" Loan, when it was all sold and could no longer be subscribed for at par.

It is a Six per Cent Loan, the Interest and Principal payable in Coin, thus yielding It is a Six per Cent Loan, the Interest and Principal payable in Coin, thus yielding over Nine per Cent. per annum at the present rate of premium and coin.

The Government requires all duties on imports to be paid in Coin; these duties have for a long time past amounted to over a Quarter of a Ni Jion of Dollars duity, a sum nearly three times greater than that required in the payment of the interest on all the 5-20 's and other permanent Loans. So that it is hoped that the surplus Coin in the Treasury, at no distant day, will enable the United States to resume specie payment upon all liabilities.

on all liabilities.

The Loan is called 5-20 from the fact that whilst the Fonds may run for 20 years yet the Government has a right to pay them off in Gold at par, at any time after 5 years.

The Interest is paid half yearly, viz: on the first days of November and May.

Subscribers can have Conpon Bonds, which are payable to bearer, and are \$50, \$100, \$500, and \$1000; or Registered Bonds of same denominations, and in addition, \$5,000 and \$10,000. For Banking purposes and for investments of Trust-monies the Registered Bonds pre preferable. for investments of Trust monies the Registered Bounds pre preferable.

These 5-20's cannot be taxed by States, cities, towns or counties, and the Government tax or them is only one-and-a-half per cent., on the amount of income, when the income of the holder exceeds Six Hundred dollars per annum; all other investments, such as income from Mortgages, Railroad Stock and Bonds, etc., must pay from three to five per cent tax on the income.

come.

Banks and Bankers throughout the Country will continue to dispose of the Bonds; and all orders by mail, or otherwise promptly attended to.

The inconvenience of a few days' delay in the delivery of the Bonds is unavoidable, the demand being so great; but as interest commences from the day of subscription, no loss is occasioned, and every effort is being made to dim inish the delay.

## A WORD ABOUT

AMERICAN WATCHES. AFTER A THOROUGH TRIAL OF MORE THAN TEN YEARS, the time pieces manufactured by the American Watch Co., of Waltham, Mass. have gained a firm hold upon the favor of the public, and now, no less than 75,000 of them are speaking for themselves in the pockets of the people. From a very insignificant beginning the business has increased until we are justified in stating that WE MAKE MORE
THAN ONE HALF of all the watches sold in the United States. Repeated enlargement of our factory buildings, and the labor of 500 operatives, still find us unequal to supply the constantly increasing demand.— And we may here observe that notwithstanding the high price of labor and materials; we actually sell our products at less prices than those current five year.

We refer to these facts only for purposes of proper-ly introducing another subject relative to our manu-facture of watches. Hither to our chief object has been to make acon watches for the million at the lowest pos-sible price—something to take the place of the make-believe watches called "Aneres," "Lepines," "Eng-lish Patent Levers," &c. annually thrown upon this market, in countless numbers, by European work-shops—watches which are the refuse of their facto-ries, unsaleable at home and perfectly worthless ev-erywhere. erywhere.
This object we have accomplished, and now we have to announce, that we have commenced the manufacture of watches of the very
HIGHEST GRADE KNOWN TO CHRO-

HIGHEST GRADE KNOWN TO CHRONOMETRY,
unequalled by anything hitherto made by ourselves
and unsurpassed by anything made in the world. For
this purpose we have the amplest facilities. We have
erected an addition to our main buildings expressly
for this branch of our business, and have filled it with
the best workmen in our service. Profiting by our
long experience, we have remodelled the form of our
watches, introducing such improvements as have been
suggested and proved to be good from time to time,
and have instituted new and severe tests of isochronism, adjustment and compensation. New mach nes
and appliances have been constructed, which perform
their work with consummate delicacy and exactitude,
and the choicest and most upproved materials only are
used. Nothing in fact is wanting either in mechanirel principles, material of workmanship to ensure perfection in the result.

We continue to manufacture our other well-known
qualities under the follow mg names:

"APPLETON, TRACY & CO."

"P.S. BARTLETT,"

"WY ELLIETY"

"WY ELLIETY"

"P.S. BARTLETT,"
And the "Soldier's Watch,"
"WM. ELLERY."

The letter, the lowest priced watch we make, is a substantial, reliable time-piece, cased in sterlingsilver—hunting pattern, and is not liable to get out of order either in marching riding or fighting. All the above described watches, including the PINEER, which is named "American Watch Company," are sold by watch idealers generally throughout the country.
