The case of A. S. Ulrich, Esq., and Fred. Shaeffer, was on trial last week, in Philadelphia, before the U.S. District Court. The attention of the Court was occupied for the best part of two days with this trial, and resulted in a disagreement and discharge of the jury, which is said to be equivalent to an acquittal, as the case will never be called up again, except it be at the request of the defendants. The jury stood 11 for acquittal and 1 the contrary.

Her husband owned a con siderable tract of Venango county land, which was then almost worthless. But the development of "oil" put a new face upon affairs, and made the property very valuable. From indigence, its owner sprang to opulence in the twinkling of an eye. Among the investments made a farm was bought in Upper Dublin tp., this county, and the family made preparations to remove to it. The National Debt has been ciphered up, and the sum total is a big one, but the American People is a big one too. On the Ist-of July next our Debt will foot up in round numbers Three Thousand Millions. We can pay it without strain, without oppression. We can pay it, and add to our wealth. But we have got to practice ecocomy, public and private. We have particularly to apply economy and watchfulness to the Legislation of Congress, and to the administration of the Departments and Bureaus in Washington. The expenses of the Goyerment must be shoved back rapidly and in good faith toward the old peace footing of 1889. We may never again got quite to that,—but let us get as near to it as two can.

vanced stages of the disease.

Co wide is the field of its usofulness and so numerous are the cases of its cures, that almost every section of the country abounds in persons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use, When once tried, its superfority over every other expectorate is too apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidote to employ for the distressing and dangarous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upou the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

We can only assure the public, that its quality is carefully kept up to the best it ever has been, and that it may be relied on to do for their relief all that it has ever done.
