GREAT FIRE IN HARRISBURG.

The most destructive conflagration that has visited the city of Harrisburg for many years, took place this morning. At about helf-past two o'clock a fire was discovered in the wooden building used as a carriage manufactory, nearly opposite this office. Unfortunately the fire was not discovered until it had made such tremendous headway that all efforts to quench it were utterly unavailing. The building being an old dry and rotten one, which has been standing for more than a quarter of a century, the flames spread rapidly and soon the entire house was in a blaze. The crashing of timber and the tre-The most destructive conflagration that has spread rapidly and soon the entire house was in a blaze. The crashing of timber and the tremendous heat emanating from the building gave warning that the destruction would not be confined to its limits. Immediately the flames spread to the adjoining wooden buildings, occupied by Joseph L. Poulton as a ten-pin alley and hilliard saloon. This being composed of the same combustible material as Mr. Fleming's building, it easily gave way, and in less than fifteen minutes after the fire had reached the house it was a living mass of flames. The wind blowing in a westerly direction the fire soon ifteen minutes after the fire had reached the house it was a living mass of flames. The wind blowing in a westerly direction the fire soon spread to the building situate to the left of Mr. Fleming's, towards Walnut street, occupied by Mr. Wm. Parkhill as a plumbing and gas fitting establishment. This was also consumed in an incredibly short time, and the flames continued on to the stationary and fancy store of Josiah M. Hess, situate next to the Telegraph building. This, too, was soon in a blaze, and the roaring mass from Strawberry alley to the Telegraph building, threw outso great a heat that it was certain that that building could not sufferit long. Indeed, the entire space of more than an acre from the alley towards Walnut street was a mass of blazing timber. For some time the strong brick building of the Telegraph stood the heat, but the flames gradually caught the edge of the roofing and the windows or that office. As soon as it reached the timbers of the roofing, it made rapid progress and the third story was soon in a blaze. So it continued until the third floor was entirely burnt out and the second floor considerably damaged. The fire was not confined to this limit. It also burnt out the rear of the several houses situate in Walnut street, near the premises. The county prison was saved by the

premises. The county prison was saved by the strong stone wall, which was a barrier to the flames and the slate roof which covers the jail. The Harris House, kept by Mr. John Gross, Several of the Collieries in this and but recently opened, was damaged considerably on the west side. The windows at the rear of Brant's Hall were all burned out. Cause of the Fire.—The fire is supposed to have been the work of an incendiary. It was discovered in two places at the east and west corners of the rear of Fleming's ceach factory.—

REMARKABLE CURE OF STIFF KNEE BY ALLCOCK'S POROUS PLASTERS.—How many persons, from stepping on a piece of orange peel, have been lamed for life. A case which might have been of this kind has just been brought to our notice. A gentleman, from placing the heel of his boot on a piece of orange peel, was suddenly thrown down, and violently sprained his knee. He was six months confined to the house, though he had the best medical advice. As a last resort a very eminent physician was called in to see if anything more could be done. After examination he said, "My opinion is, your knee will never be bent again," He recommonded that the whole leg and knee should be encased in a plaster of Paris bondage, which would accelerate the permanent stiffening of the knee, and said, "the scontar it was done the better." But the patient, before trying this application and having a stiff knee for life, enveloped it in our Porous Plasters, and in less than two months his knee was perfectly eured.

Owide is the field of its usefulness and so numerous are the cases of its cures, that almost every section of the country abounds in porsons publicly known, who have been restored from alarming and even desperate diseases of the lungs by its use, When once apparent to escape observation, and where its virtues are known, the public no longer hesitate what antidete to employ for the distressing and dang arous affections of the pulmonary organs that are incident to our climate. While many inferior remedies thrust upou the community have failed and been discarded, this has gained friends by every trial, conferred benefits on the afflicted they can never forget, and produced cures too numerous and too remarkable to be forgotten.

We can only savere the public, that its quality is carefully kept up to the best it ever has been, and that it may be relied not do for their relief all that it has ever done.

Lebanon, June 14, 1864.—4t.

LAND, FRANCE AND GERMANY.

ECURED by ten different patents in the United States, and fully licensed under the patents of Howe, Bachelder, Wheeler & Wilson, Grover & Baker, and Singer & Co., these being the only cheap machines of any kind which are thus licensed, and all other cheap machines, it sold for less than forty dollars each, are infringements, and sellers and buyers make themselves liable to prosecution. The words "Shaw & Clark, Biddeford, Maine," are cast into the iron work of each machine, and it has also a round silver plated patent plate on it with the manufacturers' names.—These machines are a perfect marvel of simplicity and mechanical ingenuity, being almost cuttrely unlike all others, both in design and principle. They make the celebrated elastic lock stitch, now acknowledged to be the best for all family purposes. The length of the stitch can be changed while the machine is running; they are not injured by being run backwards; they use thread, linen or silk, directly from the original spools without unwinding or oiling; they work with equal facility on the finest Swiss muslin, or through several thicknesses of woolen cloth. No part of them requires removal to be oiled. They hem, felt, stitch, bind, embroider, quilt, tuck, braid, guage and plait, and a child or person who never saw a sewing machine of any kind can learn to run them in a few minutes, their wooderful simplicity rendering instructions for using them almost ontirely superfinous.

LARGE MACHINE, PRICE \$25, We give with it Free a Hemmer, No. 6, Oil Can. Screw Driver, Guage and Screw, an assortment of How Lost, How Restored.

JUST published, a new edition of Dr. Culverwell's Celebraced Essay on the radical cure, (without medicine) of Spermatorhloca, or seminal Weakness, Involuntary Seminal Losses, Impotency, Mental and Physical Incapacity, Impediments to Marriage, etc; Consumption, Epilepsy, and Fits, induced by self-indulgence or sexual extravagance.

As Price, in a sealed envelope, only 6 cents. The celebrated author in this admirable essay clearly demonstrates, from a thirty years' successful practice, that the alarming consequences of self-abuse may be radically cured without the dangerous use of internal medicine or the application of the knife-pointing out a mode of cure at once simple, certain, and effectual, by means of which every sufferer, no matter what his condition may be, may cure himself cheaply, privately, and radically.
