Considerable discussion is again going on about the feasibility of introducing water into this borough. The necessity for its introduction is admitted by many, but the questions are where to get it from? the cost? and how the needful is to be raised? As business is dull in this place just now, and many men out of employment, such an enterprize as what really can be done.

AMERICAN WATCH IS THE BEST

It is made on the best principle, while the foreign watch is generally made on no principle at all. The foreign watch is mostly made by women and boys, by hand. While their labor is cheap, their work is dear at any price. Such watches are made without plan, and sold without guarantee. They are irregular in construction and quite as irregular in movement. They tion, and quite as irregular in movement. They are designed only to sell, and the buyer is the party most thoroughly sold. Those who have kept "anores," "lepines" and "Swiss levers" in professed repair for a few years will appreciate

he truth of our statement.

THE PLAN OF THE AMERICAN WATCH. Instead of being made of several hundred lit-tle pieces, screwed together, the body of the American Watch is formed of SOLID PLATES. No jar interferes with the harmony of its working, and no sudden shock can throw its machinery out of gear. In riding or any business pur-suit, it is all held together as firmly as a single piece of metal. It is just what all machinery should be—
